Newest HPE0-S59 Sample Exam - 100% Pass HPE0-S59 Exam

Both practice exams (web-based & desktop) give a HP HPE0-S59 real exam feeling and identify your mistakes so you can overcome your weaknesses before the HPE0-S59 final test. The desktop HP HPE0-S59 Practice Test software works on Windows after software installation. You can take the web-based HPE Compute Solutions HPE0-S59 practice exam via any operating system.

HPE Compute Solutions Sample Questions (Q153-Q158):

NEW QUESTION # 153

How will traffic for a given network be affected if the purpose is changed from General to VM Migration?

REFERS TO LIFE EXTENSION

Create Network ?

Name:

Type: Ethernet Fibre Channel FCoE RoCE

VLAN:

VLAN ID:

Associate with IPv4 subnet ID: Subnet IDs cannot be assigned when creating networks in bulk

Associate with IPv6 subnet ID: Subnet IDs cannot be assigned when creating networks in bulk

Purpose:

Preferred bandwidth: Gb/s

Maximum bandwidth: Gb/s

Smart link

- A. If VM Migration is selected, all types of traffic other than vMotion will be blocked.
- B. This parameter will allow an administrator to define a VMkernel port.
- C. Changing this parameter does not affect the behavior of the network or traffic.
- D. Changing this parameter to VM Migration will give higher priority for vMotion traffic.

Answer: D

NEW QUESTION # 154

Match each HPE Synergy logical component with the definition.

Component	Definition
Enclosure group	Acts as a recipe for creating a group that represents the available networks, uplink sets, and interconnect settings for a set of physical interconnects in a set of enclosures.
Logical enclosure	A single administrative entity that consists of the configuration for a set of interconnects in a single enclosure or a frame link topology.
Logical interconnect	A logical resource that defines a consistent configuration for an enclosure or a set of enclosures making up a logical enclosure.
Logical interconnect group	Contains the configuration intended for a set of physical enclosures.

Answer:

Explanation:

Component	Definition
Enclosure group	Acts as a recipe for creating a group that represents the available networks, uplink sets, and interconnect settings for a set of physical interconnects in a set of enclosures.
Logical enclosure	A single administrative entity that consists of the configuration for a set of interconnects in a single enclosure or a frame link topology.
Logical interconnect	A logical resource that defines a consistent configuration for an enclosure or a set of enclosures making up a logical enclosure.
Logical interconnect group	Contains the configuration intended for a set of physical enclosures.

Explanation:

Here are the correct matches for each HPE Synergy logical component with their respective definitions:

- * Enclosure group Definition: Contains the configuration intended for a set of physical enclosures.
- * Logical enclosure Definition: A logical resource that defines a consistent configuration for an enclosure or a set of enclosures making up a logical enclosure.
- * Logical interconnect Definition: A single administrative entity that consists of the configuration for a set of interconnects in a single enclosure or a frame link topology.
- * Logical interconnect group Definition: Acts as a recipe for creating a group that represents the available networks, uplink sets, and interconnect settings for a set of physical interconnects in a set of enclosures.
- * Enclosure group: An enclosure group in HPE Synergy defines the configuration settings, including logical interconnect groups and firmware baselines, for a set of physical enclosures.
- * Logical enclosure: A logical enclosure in HPE Synergy is a resource that includes one or more physical enclosures and their associated logical interconnects, providing a consistent configuration for those enclosures.
- * Logical interconnect: A logical interconnect represents a set of interconnects within an enclosure, managed as a single entity. It includes the configuration of the interconnects and their connections.
- * Logical interconnect group: A logical interconnect group (LIG) defines the network configuration, including available networks, uplink sets, and interconnect settings, that can be applied to multiple enclosures.

NEW QUESTION # 155

Which statement about login redistribution is true?

- A. Login redistribution is a licensed feature and the number of licenses required depends on the number of active ports
- **B. Login redistribution is supported only on the HPE Synergy Virtual Connect SE 32Gb FC Modules**
- C. Login redistribution is available only if HPE Primera or HPE Alletra is connected directly to the HPE Synergy frame
- D. Login redistribution is used for login balancing when they are not distributed evenly over the FC links

Answer: B

Explanation:

Login redistribution is a feature that ensures logins are balanced across available FC (Fibre Channel) links.

This process helps maintain optimal performance and redundancy by redistributing logins if they are not evenly distributed. This feature is essential in environments where maintaining balanced load distribution is critical for performance and reliability.

NEW QUESTION # 156

Your customer experienced some problems caused by outdated HPE Superdome Flex firmware. Which update method should they use to avoid these issues in the future?

- A. HPE OneView method for I/O firmware update procedure
- B. RMC CLI to update I/O and HPE Persistent Memory firmware
- **C. HPE SUM if HPE Persistent Memory firmware must be updated**
- D. HPE OneView IT HPE Persistent Memory firmware must be updated.

Answer: C

Explanation:

HPE System Update Manager (SUM) is the recommended method for updating firmware on HPE Superdome Flex systems, especially when HPE Persistent Memory firmware needs to be updated. HPE SUM ensures that all firmware components are updated correctly and consistently, reducing the risk of compatibility issues.

NEW QUESTION # 157

Which compute node parameters are captured within server hardware type?

- A. Size of the memory Installed
- B. Number of the CPUs
- **C. Mezzanine card configuration**
- D. installed operating system

Answer: C

Explanation:

The server hardware type in HPE OneView captures parameters such as the mezzanine card configuration. This information is crucial for defining the connectivity and expansion capabilities of the compute node, ensuring that the appropriate resources are available for specific workloads.

NEW QUESTION # 158

.....

There has been fierce and intensified competition going on in the practice materials market. As the leading commodity of the exam, our HPE0-S59 practice materials have get pressing requirements and steady demand from exam candidates all the time. So our HPE0-S59 practice materials have active demands than others with high passing rate of 98 to 100 percent. We are one of the largest and the most confessional dealer of practice materials. That is why our HPE0-S59 practice materials outreach others greatly among substantial suppliers of the exam.
