Purchase Pass4Leader best C_SIGDA_2403 study material today and get these stunning offers.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q28-Q33):

NEW QUESTION # 28

How can SAP Signavio's Process Governance be used to ensure process compliance and audit readiness?

- A. By ensuring all changes are logged and reviewed
- B. By creating comprehensive process documentation automatically
- C. By implementing strong access control mechanisms
- D. By using data encryption for all stored process models

Answer: A

NEW QUESTION # 29

What is a Query?

- A. A request created by the system
- B. A request to show a data model
- C. A request for information from a database
- D. A request to start a workflow

Answer: C

Explanation:

A query in the context of SAP Signavio Process Intelligence is a fundamental concept for data retrieval. The documentation provides a clear definition:

* Exact Extract: "A query is a request for information from a database, typically written in SQL, to retrieve specific data or perform calculations based on defined criteria. In SAP Signavio Process Intelligence, queries are used to extract process data for analysis, such as case attributes or event sequences." (SAP Signavio Process Intelligence User Guide, section on "SQL Query Editor and Data Retrieval").

* Explanation:

* Option B (A request for information from a database): This is correct as a query is a structured request, often in SQL, to retrieve or manipulate data from the database underlying Process Intelligence, such as fetching cases with specific attributes.

* Option A (A request to start a workflow) is incorrect because workflows are managed in SAP Signavio Process Governance, and queries do not initiate them.

* Option C (A request to show a data model) is incorrect as displaying a data model is a configuration task, not the purpose of a query.

* Option D (A request created by the system) is incorrect because queries are user-defined or configured, not automatically generated by the system.

Reference: SAP Signavio Process Intelligence User Guide, section on "SQL Query Editor and Data Retrieval"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 4: Query Fundamentals.

NEW QUESTION # 30

How would you start capturing process documentation? Note: There are 3 correct answers to this question.

- A. Running workshops with process participants
- B. Creating task descriptions
- C. Creating process-related surveys
- D. Verifying customer data
- E. Conducting process interviews

Answer: A,C,E

Explanation:

Capturing process documentation in SAP Signavio involves gathering detailed information about how processes are executed. The SAP Signavio Process Manager Documentation provides guidance:

- * Exact Extract: "To capture process documentation, organizations should:
- * Run workshops with process participants to map out process steps and responsibilities.
- * Create process-related surveys to collect input from stakeholders on process details.
- * Conduct process interviews to gather in-depth insights from key process owners or performers." (SAP Signavio Process Manager User Guide, section on "Process Documentation Methods").
- * Explanation:
- * Option A (Running workshops with process participants): Workshops bring together stakeholders to collaboratively map processes, identify steps, and document roles, often using tools like SAP Signavio Process Manager for modeling.
- * Option D (Creating process-related surveys): Surveys collect feedback from a broader group of process participants, capturing details about tasks, challenges, or variations that may not emerge in workshops.
- * Option E (Conducting process interviews): Interviews with process owners or key performers provide detailed, qualitative insights into process execution, helping to refine documentation.
- * Option B (Creating task descriptions) is incorrect as task descriptions are an output of documentation, not a method to start capturing it.
- * Option C (Verifying customer data) is incorrect because customer data verification is related to data quality, not process documentation.

Reference: SAP Signavio Process Manager User Guide, section on "Process Documentation Methods"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 2: Documentation Techniques.

NEW QUESTION # 31

How do you filter all published processes in the workspace?

- **A. Switch to Advanced Search, and select the field "Publishing state".**
- B. Switch to Advanced Search, and select the field "Publishing date".
- C. Type the word "Publishing state" in the search field and press Enter.
- D. Type the word "Publish" in the Search field and press Enter.

Answer: A

NEW QUESTION # 32

What is the purpose of Workflow Management Systems?

- A. To onboard new employees
- B. To collect data on employee operations
- **C. To simplify reoccurring procedures through delegation**
- D. To provide reports on business problems

Answer: C

NEW QUESTION # 33

.....
