The high pass rate of our study materials means that our products are very effective and useful for all people to pass their exam and get the related certification. So if you buy the CPRE-FL_Syll_3.0 study questions from our company, you will get the certification in a shorter time.

ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q39-Q44):

NEW QUESTION # 39

The template "The <system name> shall <system response>" is suited for:

- A. State-driven requirements
- B. Event-driven requirements
- C. Ubiquitous requirements
- D. Unwanted behaviour

Answer: C

NEW QUESTION # 40

Which of the following are principles of Requirements Engineering? (Select 2 answers.)

- A. Systems should be isolated from proper understanding.
- B. Non-validated requirements are worthless.
- C. Changing requirements are the exception, not the normal case.
- D. Requirements Engineering is about satisfying only users' needs.
- E. Requirements should be viewed as means to an end, not the end in itself.

Answer: B,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

IREB defines a set of RE principles. Principle 1 states that requirements are a means to an end (such as reduced risk and successful systems), not an end in themselves; they support achieving project and business goals. Principle 6 states that non-validated requirements are worthless because unvalidated statements may be incorrect, incomplete, inconsistent or misaligned with stakeholder needs. Requirements normally change over time; change is expected, not exceptional. Systems cannot be understood in isolation from their environment, and RE must consider all relevant stakeholders, not only users. Hence options A and D reflect official principles; the others contradict them.

NEW QUESTION # 41

Requirements Engineering is useful for all of the following, EXCEPT:

- A. Better understanding the problem to be resolved
- B. Reducing development risks
- C. Rushing straight into building the system
- D. Producing a reference against which the system will be tested

Answer: C

NEW QUESTION # 42

Choose the WRONG answer regarding good practices when dealing with abstraction levels of requirements.

- A. In small work products, requirements should stay at the same abstraction level.
- B. In large work products, requirements from different abstraction levels should be organized by structuring the specification.
- C. If the subject to be specified is a low level element of the solution, the requirement should naturally be specified at a low abstraction level.
- D. There is no problem in mixing requirements from different abstraction levels in medium sized work products.

Answer: D

NEW QUESTION # 43

A linear, explorative and customer-specific RE process is called:

- A. Product-Oriented RE Process
- **B. All the other options are wrong.**
- C. Participatory RE Process
- D. Contractual RE Process

Answer: B

NEW QUESTION # 44

.....
