Therefore, we offer three formats of CIPP-E Practice Test material. Now every Certified Information Privacy Professional/Europe (CIPP/E) (CIPP-E) exam candidate can prepare as per his style by selecting the suitable format.

## Exam Details

The exam for the CIPP/E certification is made up of 90 questions, 75 of which are scored. There are two types of questions that appear in this test: answer options as well as cases. The examinees are given 150 minutes of allocated time to complete all these questions.

All the IAPP certification exams are computer-based and are delivered at the authorized testing centers worldwide. It is impossible to sit for the CIPP/E exam online. The IAPP tests are administered through the Pearson VUE centers. The exam can be also taken via OnVUE, the Pearson VUE's remote online proctoring platform. To register for the test, you need to log into the official website, purchase your exam and schedule it at the most convenient testing center. You can schedule your exam up to 90 days in advance.

Just like all the IAPP exams, the CIPP/E certification test is delivered in the English language. In addition, the applicants can take it in French and German. As for the price, you will be required to pay the registration fee of \$550 for your first attempt. If you fail to pass your exam on your first try, you will have to wait for at least 30 days to have a subsequent attempt. The students who retake their test are allowed to try again at a reduced fee of \$375.

To pass the exam and get certified, you need to achieve the passing score of 300 marks on a scale of 100-500. The candidates who successfully complete their CIPP/E test will be awarded the relevant digital certificate that will be emailed to them within three weeks after passing the exam. The CIPP/E certification is only valid for 2 years. After the expiration of this period, you will have to undergo the recertification process. This includes paying the maintenance fee of \$250 and submitting at least 20 hours of Continuing Privacy Education (CPE). The CPE units can be earned by attending various educational events, programs, publishing written materials,

making presentations and instruction courses, or by performing any other activity related to privacy & security.

## IAPP Certified Information Privacy Professional/Europe (CIPP/E) Sample Questions (Q226-Q231):

### NEW QUESTION # 226

Which of the following is NOT recognized as being a common characteristic of cloud-computing services?

- A. The supplier determines the location, security measures, and service standards applicable to the processing.
- B. The supplier allows customer data to be transferred around the infrastructure according to capacity.
- C. The service's infrastructure is shared among the supplier's customers and can be located in a number of countries.
- D. The supplier assumes the vendor's business risk associated with data processed by the supplier.

**Answer: D**

**NEW QUESTION # 227**

Which aspect of the GDPR will likely have the most impact on the consistent implementation of data protection laws throughout the European Union?

- A. That it makes appointment of a data protection officer mandatory
- B. That it essentially functions as a one-stop shop mechanism
- C. That it makes notification of large-scale data breaches mandatory
- **D. That it takes the form of a Regulation as opposed to a Directive**

**Answer: D**

Explanation:

One of the main differences between a Regulation and a Directive in the EU law is that a Regulation is directly applicable and binding in all EU member states, without the need for national implementing measures, while a Directive sets out the objectives and principles that the member states must achieve, but leaves them the choice of form and methods to transpose it into their national laws. Therefore, by taking the form of a Regulation, the GDPR aims to harmonize and unify the data protection rules across the EU, and to ensure a consistent implementation and enforcement of the data protection laws throughout the EU. The other aspects of the GDPR listed in the question, such as the one-stop shop mechanism, the mandatory notification of large-scale data breaches, and the mandatory appointment of a data protection officer, are also important features of the GDPR, but they do not have the same impact on the consistency of the data protection laws as the form of a Regulation.

**NEW QUESTION # 228**

Which type of personal data does the GDPR define as a "special category" of personal data?

- A. Financial information.
- B. Educational history.
- C. Closed Circuit Television (CCTV) footage.
- **D. Trade-union membership.**

**Answer: D**

**NEW QUESTION # 229**

In which situation would a data controller most likely be able to justify the processing of the data of a child without parental consent?

- A. When the data is to be processed for market research.
- **B. When providing preventive or counselling services to the child.**
- C. When a legitimate business interest makes obtaining consent impractical.
- D. When providing the child with materials purely for educational use.

**Answer: B**

**NEW QUESTION # 230**

Under Article 58 of the GDPR, which of the following describes a power of supervisory authorities in European Union (EU) member states?

- A. The authority to select penalties when a controller is found guilty in a court of law.
- **B. The right to access data for investigative purposes.**
- C. The discretion to carry out goals of elected officials within the member state.
- D. The ability to enact new laws by executive order.

**Answer: B**
