

# Pass Guaranteed Pass-Sure HPE7-J02 - Preparation Advanced HPE Storage Integrator Solutions Written Exam Store

BTW, DOWNLOAD part of Real4test HPE7-J02 dumps from Cloud Storage: <https://drive.google.com/open?id=1OMz6rybxFMfIJD-SdGmuVr2sDHilBm8R>

Regarding the process of globalization, every fighter who seeks a better life needs to keep pace with its tendency to meet challenges. HPE7-J02 certification is a stepping stone for you to stand out from the crowd. The HPE7-J02 exam guide function as a time-counter, and you can set fixed time to fulfill your task, so that promote your efficiency in real test. The key strong-point of our HPE7-J02 Test Guide is that we impart more important knowledge with fewer questions and answers, with those easily understandable HPE7-J02 study braindumps, you will find more interests in them and experience an easy learning process.

Now in such society with a galaxy of talents, stabilizing your job position is the best survival method. But stabilizing job position is not so easy. When others are fighting to improve their vocational ability, if you still making no progress and take things as they are, then you will be eliminated. In order to stabilize your job position, you need to constantly improve your HPE7-J02 professional ability and keep up with the pace of others to let you not fall far behind others.

## Valuable HPE7-J02 Feedback | HPE7-J02 Vce Test Simulator

Our HPE7-J02 study materials can provide you with multiple modes of experience, there are three main modes to choose from: PDF, Software and Online. Firstly, the PDF version is printable. Secondly, the Software version of HPE7-J02 exam questions can simulate the real exam environment to give you exam experience more vividly. Thirdly, the online version supports all web browsers so that it can be worked on all the operating systems. And our HPE7-J02 Study Materials will help you in a more relaxed learning atmosphere to pass the HPE7-J02 exam.

## HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Competitive Positioning of HPE Storage: This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Planning and Validating Storage Solutions: This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Advanced Troubleshooting and Prevention: This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions.</li> </ul>

## HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q15-Q20):

### NEW QUESTION # 15

You are meeting with a customer who wants to replace their current file storage system. You plan to recommend HPE GreenLake for File Storage. The customer asks whether the solution can provide cross-protocol access to the same data using both NFS and SMB simultaneously.

What is the impact on your design?

- A. A 3rd-party SDS solution such as Qumulo or Scality should be discussed since the HPE GreenLake for File Storage does not support this
- B. Two different IP pools are required, one for each access protocol. The virtual IP pool address enables cross-protocol functionality
- C. HPE GreenLake for File Storage supports native cross-protocol access with NFS, SMB, and S3. You must enable both protocols per share
- D. This is perfectly possible with HPE GreenLake for File Storage by creating two file shares (one for each protocol) and setting up replication

**Answer: C**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE GreenLake for File Storage, powered by VAST Data software, natively supports cross-protocol access (NFS, SMB, and S3) to the same dataset. This means a file written via NFS can be accessed via SMB or S3 without replication. For cross-protocol access, both protocols must be enabled at the share/bucket level.

This is a core differentiator of HPE's GreenLake for File Storage solution.

Distractors:

A: Wrong, because GreenLake for File Storage already has native multi-protocol support - no need for 3rd party SDS.

C: Incorrect, as replication between separate shares is not required; it is a native capability.

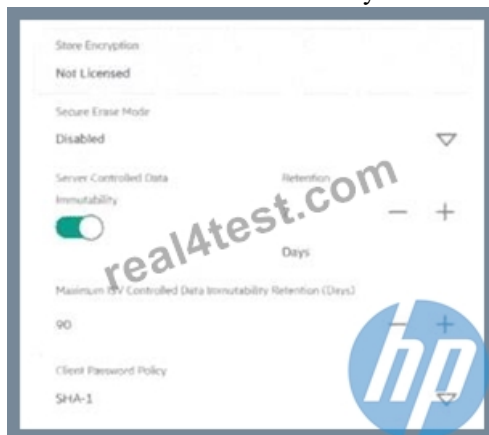

D: Misleading - IP pools are used for load balancing and client connectivity, but not required to enable cross- protocol access.

Key Concept: Multi-protocol access in HPE GreenLake for File Storage (NFS/SMB/S3).

Reference: HPE GreenLake for File Storage Technical Overview, VAST Data Universal Storage white papers

### NEW QUESTION # 16

Exhibit shows HPE StoreOnce Catalyst Store Security Settings:

StoreOnce Support Matrix for a list of Data Immutability  
Supported Catalyst  
applications (<https://www.hpe.com/storage/StoreOnceSupportMatrix>)

Learn more

OK Defaults

Server Controlled Data Immutability enabled (7 days).

Maximum ISV Controlled Data Immutability Retention (90 days).

Which statement is correct?

- A. Server-Controlled and ISV-Controlled Data Immutability values do not need to match when both are configured.
- B. Maximum ISV Controlled Data Immutability Retention allows the ISV backup application to manage item-level immutability.
- C. The Maximum ISV Controlled Data Immutability Retention parameter must be set to 0 for optimal Veeam v12 support.
- D. Server-Controlled Data Immutability is required to achieve the highest immutability with Veeam v12 backups.

Answer: B

### NEW QUESTION # 17

Your customer has 2 Alletra 6000 arrays configured for asynchronous replication. The facilities team is planning grid maintenance in the datacenter hosting the source array. They want to proactively move all host I/O to the target array.

Which action needs to be done on the Alletra group level to move the host I/O to the other datacenter?

- A. Handover
- B. Demote
- C. Promote
- D. Failover

Answer: D

### NEW QUESTION # 18

Your customer is a software development company using Kubernetes, Canonical, and Tanzu. They are expanding their Dev/Ops container environment and are considering HPE Private Cloud Business Edition (PCBE).

What is a unique benefit that HPE PCBE would bring to this customer's environment?

- A. Infinite scale to the customer at no additional cost
- B. Container level protection
- C. Multi-tenant VASA
- **D. Full stack intelligence**

**Answer: D**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE PCBE provides full-stack intelligence across compute, storage, and virtualization layers. It integrates with Kubernetes distributions like Tanzu and Canonical, giving visibility and lifecycle automation across the entire stack. This helps Dev/Ops teams simplify operations, capacity planning, and performance optimization in hybrid environments.

Distractors:

B: Multi-tenant VASA applies more to VMware vVols in multi-tenant setups.

C: No platform offers "infinite scale at no cost" - this is misleading.

D: Container-level protection is delivered through HPE CSI with data protection solutions, not unique to PCBE.

Key Concept: HPE PCBE delivers unified lifecycle management with full-stack intelligence.

Reference: HPE Private Cloud Business Edition Overview.

## NEW QUESTION # 19

Refer to the exhibit.

Qty	Part Number	Description
1	51R06A	HPE GL Block STG MP Base Cstr Config
1	R7C75A	HPE Alletra STG MP 2U Chassis
4	R7C76A	HPE Alletra STG MP C14 1600W AC PS
2	R9R52A	HPE C13 - C14 250V Blk 1.4m WW Pwr Cord
2	R9S00A	HPE C13 - C14 250V Gry 1.4m WW Pwr Cord
2	R7D02A	HPE Alletra STG MP 16c Cluster Blk Node
6	52A68A	HPE Alletra STG MP 100GbE 2p OCP

1	51J10A	HPE AL STG MP NVMe CTO Block Shelf
2	51R28A	HPE Alletra STG MP Block Exp Shelf Node
24	R9H67A	HPE Alletra STG MP 3.84TB NVMe SED SSD
1	50A98A	HPE SED LTU
1	53Q00A	HPE GreenLake for Block Storage MP OS per TB 3-year LTU
92	53Q00AAE	HPE GreenLake for Block Storage MP OS per TB 3-year Software and Support SaaS

Your customer had an unexpected failure of their current storage array, causing them to lose some of their critical data. As a result, they are looking for a storage array with a guarantee of 100% data availability to prevent this failure and loss in the future.

They need 80TB raw and two new 25GbE top-of-rack switches to connect to their environment.

They expect 5% annual growth.

Which correction should be made to the configuration in the exhibit to meet the customer's requirements?

- A. Decrease to 20 × 3.84TB drives
- **B. Change to 25G networking**
- C. HPE GreenLake financial model
- D. Add 2 × Aruba 8325 switches

**Answer: B**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

The exhibit shows the use of 32Gb FC HBAs and 100GbE switches (Aruba 100G). However, the customer specifically requires 25GbE top-of-rack switches. Therefore, the configuration needs to be corrected to 25GbE networking. The HPE Alletra MP B10000 guarantees 100% data availability SLA, so the primary correction is networking alignment, not drives or financial model.

Distractors:

B: Reducing drives reduces raw capacity below 80TB requirement.
