## Valid Salesforce Platform-App-Builder Test Discount - Pdf Platform-App-Builder Braindumps

The Salesforce Platform-App-Builder certification differentiates you from other professionals in the market. Success in the Salesforce Platform-App-Builder exam shows that you have demonstrated dedication to understanding and advancing in your profession. Cracking the Salesforce Platform-App-Builder test gives you an edge which is particularly essential in today's challenging market of information technology. If you are planning to get through the test, you must study from reliable sources for Salesforce Certified Platform App Builder Platform-App-Builder Exam Preparation. Easy4Engine real Salesforce Platform-App-Builder exam dumps are enough to clear the Platform-App-Builder certification test easily on the first attempt. This is because Easy4Engine Salesforce Platform-App-Builder PDF Questions and practice test is designed after a lot of research and hard work carried out by experts.

### Salesforce Certified Platform App Builder Sample Questions (Q238-Q243):

#### NEW QUESTION # 238

A new field is being created on a custom object. However, the app builder does not want the field to show up on pre-existing custom report types.

What should the app builder do on the custom field setup to fulfill this requirement?

- A. Remove the new field from all page layouts.
- **B. Deselect auto add to custom report type.**
- C. Grant read-only access to all report profiles.
- D. Remove visibility to all report profiles.

**Answer: B**

Explanation:

When creating a new field, if an app builder does not want the field to be automatically added to pre-existing custom report types, the step to take is:

Deselect 'Add Field to Custom Report Types' (D). This option is available when creating or editing a custom field and ensures that the field is not automatically included in report types where 'Automatically add new custom fields to report type layouts' is enabled. Removing the field from page layouts (A) affects the visibility on record pages but not reports. Adjusting visibility (B) or setting read-only access (C) for report profiles affects user permissions to see the field in reports, but does not remove the field from report types if it was previously added.

Reference for managing fields in custom report types:

Custom Report Types and Fields: [https://help.salesforce.com/articleView?id=reports\\_report\\_type\\_layouts.htm&type=5](https://help.salesforce.com/articleView?id=reports_report_type_layouts.htm&type=5)

#### NEW QUESTION # 239

Universal Containers wants to display the real time stock price for each account on the account record page. How should an app builder implement this request?

- A. Build a visual flow that uses API calls
- B. Create a lightning web component
- **C. Install a solution from the appexchange**
- D. Add a dynamic report to the page layout

**Answer: C**

#### NEW QUESTION # 240

An app builder has created a new report type but users are unable to select it from the Report Type list when making a new report

for records they own.

What could be causing this issue?

- A. The report type is in a status of Deployed.
- B. Access to Create and Customize Reports is disabled.
- C. Access to the necessary object is unavailable.
- **D. The report type is in a status of In Development.**

**Answer: D**

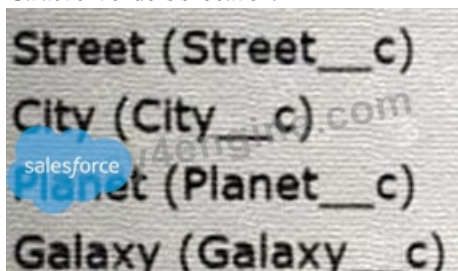

Explanation:

Explanation

A report type that is in a status of In Development is not available for users to select when creating a new report. The app builder needs to change the status to Deployed to make it visible to users

#### NEW QUESTION # 241

Ursa Major Solar (UMS) has a custom object where they track Galactic Vendors. The object has four custom fields for the Galactic Vendors's location:

The UMS's leadership wants these fields to be concatenated into a single formula field on two lines.

Which formula fulfills this requirement?

- A.   
Street  
City, Planet Galaxy
- B.   
Street\_\_c  
City\_\_c Planet\_\_c Galaxy\_\_c
- C.   
Street\_\_c & BR() &  
City\_\_c & \", \" & Planet\_\_c & \" \" & Galaxy\_\_c
- **D.**

**Answer: D**

Explanation:

This formula concatenates the four custom fields for the Galactic Vendor's location into a single text value, separated by commas and spaces. The formula also uses the BR function to insert a line break after the second field, creating two lines of text. Option A, B, and D are not formulas that fulfill the requirement.

#### NEW QUESTION # 242

The sales Operations team at AWS Computing deletes accounts for a variety of reasons. The sales ops director is worried that the Sales team may delete accounts that sales reps are actively selling into.

Now should the app builder keep accounts with open opportunities from being deleted?

- A. Remove the Delete permission from the Sales Rep profile.
- B. Remove the delete button on the account layout
- **C. Create a validation rule on the Account object.**
- D. Create an Apex Trigger on the Account object

**Answer: C**

Explanation:

Explanation

Create a validation rule on the Account object is how the app builder can keep accounts with open opportunities from being deleted. According to the Salesforce documentation, "Validation rules verify that data entered by users in records meet the standards you specify before they can save it." A validation rule can check if an account has any open opportunities and display an error message if someone tries to delete it.

Create an Apex trigger on the Account object, remove the delete button on the account layout, and remove the Delete permission from the Sales Rep profile are not valid or sufficient solutions for this requirement.

## NEW QUESTION # 243

.....

The quality of our Platform-App-BUILDER exam questions is of course in line with the standards of various countries.
