### NEW QUESTION # 28

Which of the following is a relevant process metric during the requirements gathering stage?

- A. Expected increase in transaction volume
- **B. Number of applications used**
- C. Process time dependencies
- D. Average Handling Time

**Answer: B**

Explanation:

During the requirements gathering stage, one of the relevant process metrics is the Number of applications used. This metric is important because it provides insight into the complexity of the process and the potential integration points required for automation. Understanding the number of applications involved in a process can help in assessing the scope of the automation project, the variety of interfaces that need to be worked with, and the level of effort required to automate the process.

References: The relevance of this metric is supported by UiPath's documentation on process metrics, which emphasizes the importance of identifying the number of applications used during the process discovery phase to ensure a comprehensive understanding of the process landscape.

**NEW QUESTION # 29**

Who should be involved in the UAT phase?

- A. Process Owner, RPA Developer, Business Analyst and Support Team
- B. RPA Developer, Solution Architect, and Client Business Team
- C. Support Team, Solution Architect, Business Analyst and Process Owner
- **D. Business Analyst, Process Owner, and Subject Matter Expert**

**Answer: D**

Explanation:

During the User Acceptance Testing (UAT) phase, the individuals who should be involved include the Business Analyst, Process Owner, and Subject Matter Expert. This group ensures that the automation meets business requirements, is technically accurate, and adheres to operational needs, which are critical for validating the solution before full deployment.

**NEW QUESTION # 30**

Which of the below options best applies to the role of the Business Analyst?

- A. Understands the business requirements and the problem
- B. Translates the business problem into a technology problem
- **C. Bridges the gap between the stakeholders and the delivery team**
- D. Assists in solution design and confirms the solution

**Answer: C**

Explanation:

The role of the Business Analyst best applies to bridging the gap between the stakeholders and the delivery team. This involves understanding and translating business requirements into actionable and understandable tasks for the technical team, ensuring that the automation solutions meet the business needs effectively.

**NEW QUESTION # 31**

What would be the most cost effective way to extract an email address from a structured document?

- A. Using the ML Extractor in combination with an ML model
- B. Using FormsAI
- **C. Using the RegEx extractor**
- D. Using the Form Extractor

**Answer: C**

## Explanation:

The most cost-effective way to extract an email address from a structured document is by using the RegEx extractor. This method is efficient because regular expressions can be tailored to match the specific pattern of email addresses without the need for more complex and resource-intensive tools. The RegEx extractor is particularly suitable for structured documents where the format is predictable and consistent, making it easy to identify and extract email addresses based on their common patterns1.
