First of all, we have done a very good job in studying the updating of materials. In addition, the quality of our E_S4CPE_2405 real E_S4CPE_2405 study guide materials is strictly controlled by teachers. So, believe that we are the right

choice, if you have any questions about our E_S4CPE_2405 study materials, you can consult us.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q59-Q64):

NEW QUESTION # 59

When do you use the SAP Fiori app "Launchpad App Manager?" Note: There are 2 correct answers to this question.

- A. To create custom catalogs
- B. To maintain technical catalogs
- C. To view where launchpad content is used
- D. To manage business catalogs with references to SAP Fiori app tiles in technical catalogs

Answer: A,B

Explanation:

The "Launchpad App Manager" Fiori app in SAP S/4HANA Cloud Private Edition is used to manage Fiori Launchpad content, such as catalogs and tiles. Let's evaluate its uses:

- * A. To create custom catalogs: This is correct. The Launchpad App Manager allows administrators to create custom catalogs, grouping Fiori app tiles for specific roles or purposes, enhancing user access in the Launchpad.
- * B. To manage business catalogs with references to SAP Fiori app tiles in technical catalogs: This is incorrect. Business catalogs are managed via the "Maintain Business Roles" app, not the Launchpad App Manager. The latter focuses on technical and custom catalogs, not business catalog references.
- * C. To maintain technical catalogs: This is correct. The app is used to maintain technical catalogs, which contain references to Fiori apps and their configurations (e.g., OData services). These catalogs are then linked to business roles.
- * D. To view where launchpad content is used: This is incorrect. Viewing usage of Launchpad content (e.g., where tiles are assigned) is handled by tools like the "Launchpad Content Manager" or role analysis, not the Launchpad App Manager's primary function.

In summary, the Launchpad App Manager is used for A (To create custom catalogs) and C (To maintain technical catalogs).

NEW QUESTION # 60

Where is the initial list of known integrations documented?

- A. In the Digital Discovery Assessment
- B. In the Business Driven Configuration Questionnaire
- C. In the SAP Integration Solution Advisory Methodology
- D. In SAP Cloud ALM

Answer: A

NEW QUESTION # 61

What is in scope of Fit-to-Standard workshops in a new implementation? Note: There are 2 correct answers to this question.

- A. Providing feedback if changes are necessary to make the process fit the customer's needs
- B. Estimating relative effort of the planned changes
- C. Completing the user acceptance testing on the business processes
- D. Teaching the customer LOB experts how to navigate end-to-end business processes

Answer: A,D

Explanation:

Fit-to-Standard workshops are a cornerstone of the SAP Activate Methodology for a new implementation of SAP S/4HANA Cloud Private Edition. These workshops, conducted during the Explore phase, aim to align customer requirements with SAP's standard processes. Let's evaluate the options:

* A. Teaching the customer LOB experts how to navigate end-to-end business processes: This is correct. A primary goal of Fit-to-Standard workshops is to educate customer line-of-business (LOB) experts on SAP S/4HANA's standard end-to-end processes (e.g., order-to-cash, procure-to-pay).

Consultants demonstrate these processes in a sandbox system, enabling customers to understand the system's capabilities and how they align with their business needs.

* B. Estimating relative effort of the planned changes: This is incorrect. While effort estimation for gaps or customizations may occur later (e.g., in backlog prioritization), it's not a core activity of Fit-to-Standard workshops. The focus is on exploring standard processes and identifying gaps, not detailed effort planning.

* C. Completing the user acceptance testing on the business processes: This is incorrect. User acceptance testing (UAT) occurs in the Realize or Deploy phase, not during Fit-to-Standard workshops in the Explore phase. These workshops are about analysis and alignment, not formal testing.

* D. Providing feedback if changes are necessary to make the process fit the customer's needs: This is also correct. During the workshops, customers and consultants collaboratively assess whether the standard processes meet requirements. If gaps are identified, feedback is provided to determine necessary changes (e.g., configuration, extensions), which are then documented for the Realize phase.

In summary, the scope of Fit-to-Standard workshops in a new implementation includes A (Teaching the customer LOB experts how to navigate end-to-end business processes) and D (Providing feedback if changes are necessary to make the process fit the customer's needs).

NEW QUESTION # 62

When is a customer required to upgrade their SAP S/4HANA Cloud Private Edition system?

- A. When the base release falls out of mainstream maintenance
- B. When the current base release has only 12 months of mainstream maintenance remaining
- C. When two support packs have been released for the current base release
- D. When the latest base release is launched

Answer: A

NEW QUESTION # 63

What can you use to migrate data to SAP S/4HANA Cloud Private Edition for a new implementation? Note: There are 3 correct answers to this question.

- A. XML or CSV templates
- B. Core data services
- C. The zero-downtime service
- D. A separate SAP HANA database
- E. A direct connection to an SAP ERP system

Answer: A,D,E
