BONUS!!! PassTest Data-Con-101ダンプの一部を無料でダウンロード：<https://drive.google.com/open?id=1FI-tGpQT3xPenkPpJrYXkGb2pIyqA1si>

明日ではなく、今日が大事と良く知られるから、そんなにぐずぐずしないで早く我々社のSalesforce Data-Con-101日本語対策問題集を勉強し、自身を充実させます。我々社の練習問題は長年でData-Con-101全真模擬試験トレーニング資料に研究している専業化チームによって編集されます。Salesforce Data-Con-101資格問題集はPDF版、ソフト版、オンライン版を含まれ、この三つバージョンから自分の愛用することを選んでいきます。他の人に先立ってSalesforce Data-Con-101認定資格を得るために、今から勉強しましょう。

## Salesforce Data-Con-101 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none"> <li>Data Cloud Setup and Administration: This domain focuses on configuring and managing Data Cloud environments through permissions, data streams, data bundles, and data spaces. It also covers administrative tools and techniques for diagnosing and exploring data using reports, dashboards, flows, APIs, and explorer tools.</li> </ul>
トピック 2	<ul style="list-style-type: none"> <li>Data Ingestion and Modeling: This domain addresses bringing data into Data Cloud and structuring it properly through transformation, ingestion from various sources, and data mapping. It emphasizes best practices for modeling data to support identity resolution and validating ingested data using available tools.</li> </ul>
トピック 3	<ul style="list-style-type: none"> <li>Data Cloud Overview: This domain covers the foundational understanding of Data Cloud including its core purpose, terminology, business value, and technical architecture. It also addresses typical use cases and the essential principles of ethical data handling when working with customer data.</li> </ul>
トピック 4	<ul style="list-style-type: none"> <li>Act on Data: This domain focuses on leveraging Data Cloud data for downstream actions through activations and data actions. It covers working with attributes, managing timing dependencies, troubleshooting activation issues like errors and rejected counts, and understanding requirements for triggering automated processes.</li> </ul>

## Salesforce Certified Data Cloud Consultant 認定 Data-Con-101 試験問題 (Q135-Q140):

### 質問 # 135

A customer is trying to activate data from Data Cloud to an Amazon S3 Cloud File Storage Bucket. Which authentication type should the consultant recommend to connect to the S3 bucket from Data Cloud?

- A. Use an S3 Encrypted Username and Password.
- **B. Use an S3 Access Key and Secret Key.**
- C. Use a JWT Token generated on S3.
- D. Use an S3 Private Key Certificate.

正解: B

解説:

To use the Amazon S3 Storage Connector in Data Cloud, the consultant needs to provide the S3 bucket name, region, and access key and secret key for authentication. The access key and secret key are generated by AWS and can be managed in the IAM console. The other options are not supported by the S3 Storage Connector or by Data Cloud. References: Amazon S3 Storage Connector - Salesforce, How to Use the Amazon S3 Storage Connector in Data Cloud | Salesforce Developers Blog Learn more 1blob:<https://www.bing.com/fed40cd6-30db-497b-a587-44e59b9e1f0b> help.salesforce.com2blob:<https://www.bing.com/ec651c64-71a9-4e79-94f1-3631d6942839> developer.salesforce.com

### 質問 # 136

Every day, Northern Trail Outfitters uploads a summary of the last 24 hours of store transactions to a new file in an Amazon S3 bucket, and files older than seven days are automatically deleted. Each file contains a timestamp in a standardized naming convention.

Which two options should a consultant configure when ingesting this data stream?  
Choose 2 answers

- A. Ensure the refresh mode is set to "Full Refresh."
- **B. Ensure the refresh mode is set to "Upsert".**
- **C. Ensure the filename contains a wildcard to accommodate the timestamp.**
- D. Ensure that deletion of old files is enabled.

正解: B、C

解説:

When ingesting data from an Amazon S3 bucket, the consultant should configure the following options:

The refresh mode should be set to "Upsert", which means that new and updated records will be added or updated in Data Cloud, while existing records will be preserved. This ensures that the data is always up to date and consistent with the source.

The filename should contain a wildcard to accommodate the timestamp, which means that the file name pattern should include a variable part that matches the timestamp format. For example, if the file name is store\_transactions\_2023-12-18.csv, the wildcard could be store\_transactions\_\*.csv. This ensures that the ingestion process can identify and process the correct file every day.

The other options are not necessary or relevant for this scenario:

Deletion of old files is a feature of the Amazon S3 bucket, not the Data Cloud ingestion process. Data Cloud does not delete any files from the source, nor does it require the source files to be deleted after ingestion.

Full Refresh is a refresh mode that deletes all existing records in Data Cloud and replaces them with the records from the source file. This is not suitable for this scenario, as it would result in data loss and inconsistency, especially if the source file only contains the summary of the last 24 hours of transactions. References: Ingest Data from Amazon S3, Refresh Modes

### 質問 # 137

What should a user do to pause a segment activation with the intent of using that segment again?

- A. Skip the activation.

- B. Stop the publish schedule.
- **C. Deactivate the segment.**
- D. Delete the segment.

正解: C

解説:

The correct answer is A. Deactivate the segment. If a segment is no longer needed, it can be deactivated through Data Cloud and applies to all chosen targets. A deactivated segment no longer publishes, but it can be reactivated at any time<sup>1</sup>. This option allows the user to pause a segment activation with the intent of using that segment again.

The other options are incorrect for the following reasons:

B). Delete the segment. This option permanently removes the segment from Data Cloud and cannot be undone<sup>2</sup>. This option does not allow the user to use the segment again.

C). Skip the activation. This option skips the current activation cycle for the segment, but does not affect the future activation cycles<sup>3</sup>. This option does not pause the segment activation indefinitely.

D). Stop the publish schedule. This option stops the segment from publishing to the chosen targets, but does not deactivate the segment<sup>4</sup>. This option does not pause the segment activation completely.

1: Deactivated Segment article on Salesforce Help

2: Delete a Segment article on Salesforce Help

3: Skip an Activation article on Salesforce Help

4: Stop a Publish Schedule article on Salesforce Help

### 質問 # 138

A customer has a custom Customer Email\_\_c object related to the standard Contact object in Salesforce CRM.

This custom object

stores the email address a Contact that they want to use for activation.

To which data entity is mapped?

- A. Individual
- B. Custom customer Email\_\_c object
- **C. Contact Point\_Email**
- D. Contact

正解: C

解説:

The Contact Point\_Email object is the data entity that represents an email address associated with an individual in Data Cloud. It is part of the Customer 360 Data Model, which is a standardized data model that defines common entities and relationships for customer data. The Contact Point\_Email object can be mapped to any custom or standard object that stores email addresses in Salesforce CRM, such as the custom Customer Email\_\_c object. The other options are not the correct data entities to map to because:

A). The Contact object is the data entity that represents a person who is associated with an account that is a customer, partner, or competitor in Salesforce CRM. It is not the data entity that represents an email address in Data Cloud.

C). The custom Customer Email\_\_c object is not a data entity in Data Cloud, but a custom object in Salesforce CRM. It can be mapped to a data entity in Data Cloud, such as the Contact Point\_Email object, but it is not a data entity itself.

D). The Individual object is the data entity that represents a unique person in Data Cloud. It is the core entity for managing consent and privacy preferences, and it can be related to one or more contact points, such as email addresses, phone numbers, or social media handles. It is not the data entity that represents an email address in Data Cloud. References: Customer 360 Data Model: Individual and Contact Points - Salesforce, Contact Point\_Email | Object Reference for the Salesforce Platform | Salesforce Developers,

[Contact | Object Reference for the Salesforce Platform | Salesforce Developers], [Individual | Object Reference for the Salesforce Platform | Salesforce Developers]

### 質問 # 139

Where is value suggestion for attributes in segmentation enabled when creating the DMO?

- A. Data Transformation
- B. Data Mapping
- **C. Segment Setup**

- D. Data Stream Setup

正解: C

解説:

Value suggestion for attributes in segmentation is a feature that allows you to see and select the possible values for a text field when creating segment filters. You can enable or disable this feature for each data model object (DMO) field in the DMO record home. Value suggestion can be enabled for up to 500 attributes for your entire org. It can take up to 24 hours for suggested values to appear. To use value suggestion when creating segment filters, you need to drag the attribute onto the canvas and start typing in the Value field for an attribute. You can also select multiple values for some operators. Value suggestion is not available for attributes with more than 255 characters or for relationships that are one-to-many (1:N).
