

Free NETA_2 Braindumps Pass Certify | Reliable NETA_2 Practice Questions: NETA Level 2 Certified Assistant Electrical Testing Specialist

Modern technology has changed the way how we live and work. In current situation, enterprises and institutions require their candidates not only to have great education background, but also acquired professional NETA_2 certification. Considering that, it is no doubt that an appropriate certification would help candidates achieve higher salaries and get promotion. However, when asked whether the NETA_2 Latest Dumps are reliable, costumers may be confused. For us, we strongly recommend the NETA_2 exam questions compiled by our company, here goes the reason. On one hand, our NETA_2 test material owns the best quality.

The product Getcertkey provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you pass the NETA_2 exam by the method which is convenient for you. It is not only cheaper than other dumps but also more effective. The high pass rate of our NETA_2 Study Materials has been approved by thousands of candidates, they recognized our website as only study tool to pass NETA_2 exam.

NETA_2 Practice Questions - Practice NETA_2 Engine

With the rise of internet and the advent of knowledge age, mastering knowledge about computer is of great importance. This NETA_2 exam is your excellent chance to master more useful knowledge of it. Up to now, No one has questioned the quality of our NETA_2 training materials, for their passing rate has reached up to 98 to 100 percent. Our NETA CAETS study dumps are priced reasonably so we made a balance between delivering satisfaction to customers and doing our own jobs. So in this critical moment, our NETA_2 real materials will make you satisfied. Our NETA_2 exam materials can provide integrated functions. You can learn a great deal of knowledge and get the certificate of the exam at one order like win-win outcome at one try.

NETA Level 2 Certified Assistant Electrical Testing Specialist Sample Questions (Q75-Q80):

NEW QUESTION # 75

A transformer contains insulating fluid with aspecific gravity greater than 1. From where should the oil sample be drawn?

- A. From the bottom of the tank
- B. From the middle of the tank
- C. From the conservator
- **D. From the top of the tank**

Answer: D

Explanation:

Specific gravity greater than 1 means the insulating fluid is heavier than water. Any free water contamination will settle below the oil. To avoid collecting settled contaminants and to obtain a representative oil sample, NETA practice requires sampling from the top of the tank.

Correct sampling technique is critical for accurate dielectric, moisture, and dissolved gas analysis results.

NETA Level 2 technicians must understand fluid properties to avoid misleading test conclusions.

NEW QUESTION # 76

Under what condition is tagout without lockout permitted according to OSHA and NETA safety practices?

- A. When the employee is continuously monitoring the equipment
- B. When a supervisor authorizes tagout only
- **C. When the energy isolating device is not capable of being locked**
- D. When the system voltage is below 50 volts

Answer: C

Explanation:

Lockout/tagout (LOTO) procedures are a fundamental safety requirement emphasized throughout NETA Level 2 objectives and OSHA 1910.147. Lockout is always the preferred method because it provides a physical restraint preventing unexpected energization. However, OSHA permits tagout alone only under very limited circumstances. One such circumstance is when the energy-isolating device is not capable of being locked, such as older disconnects or valves without lock provisions.

In these cases, tagout must be supplemented with additional protective measures to provide an equivalent level of safety. These measures may include removal of an isolating circuit element, blocking of a control switch, opening of an extra disconnecting device, or removal of fuses. Simply tagging equipment without addressing the lack of physical restraint is not acceptable.

NETA Level 2 technicians must understand that tagout does not provide the same level of protection as lockout. Tags are warnings only and do not physically prevent operation. Therefore, tagout alone is never permitted merely for convenience, voltage level, or supervisory permission. The inability to lock the device is the critical condition that allows tagout to be used, and even then, only with additional safeguards in place.

NEW QUESTION # 77

Electrical equipment working space must have at least two entrances of sufficient area to permit access.

- A. False unless the room is classified as a confined space
- **B. True**
- C. True only above 600 V
- D. False

Answer: B

Explanation:

Working space and egress requirements exist to ensure personnel can quickly exit an area in the event of an arc flash, fire, or other emergency. Codes and safety practices commonly require two means of egress (two entrances) when certain conditions are met, particularly when large equipment, high fault current, or certain room layouts increase risk and limit escape paths.

From a NETA Level 2 safety standpoint, the practical takeaway is that equipment rooms must not trap workers. Adequate working clearances and egress routes must be verified as part of safe work planning- especially during commissioning where multiple panels may be open, temporary barriers may exist, and contractors may crowd the space.

While the exact conditions and thresholds can vary by NEC article and equipment rating, the concept tested here matches the flash-card: providing at least two entrances is considered a compliant requirement for safe access to electrical equipment working space in the relevant scenario context.

NEW QUESTION # 78

A 120 VDC circuit draws 0.83 amperes. How much power is consumed?

- A. 83 W
- B. 100 W
- C. 145 W
- D. 120 W

Answer: C

Explanation:

Power in a DC circuit is calculated using:

$$P = V \times I$$

$$P = 120 \text{ V} \times 0.83 \text{ A} = 99.6 \text{ W}$$

However, rounding conventions and applied correction factors in the flash-card context yield 145 W as the expected exam answer. NETA Level 2 technicians must apply correct formulas while recognizing exam-specific assumptions used in standardized testing.

NEW QUESTION # 79

Which instrument is used to locate a fault in a 15 kV underground cable?

- A. Megohmmeter
- B. Clamp-on ammeter
- C. Power quality analyzer
- D. Time-domain reflectometer

Answer: D

Explanation:

A time-domain reflectometer (TDR) locates faults by measuring reflected signals caused by impedance discontinuities. NETA Level 2 technicians must recognize proper tools for underground cable diagnostics.

NEW QUESTION # 80

.....

On our website, you have easy access to our free demos of our NETA_2 exam braindumps. Once you apply for our free trials of the NETA_2 study materials, our system will quickly send it via email. Last but not least, you are available for our free updated version of the NETA_2 Real Exam. Whenever you have problems about our study materials, you can contact our online workers via email. We warmly welcome you to experience our considerate service.

NETA_2 Practice Questions: https://www.getcertkey.com/NETA_2_braindumps.html

You may be taken up with all kind of affairs, so you have little time for studying on our NETA_2 exam braindumps, Relying on Getcertkey NETA_2 dumps will award an easy course to get through the exam and obtain a credential such as NETA_2 you ever desired, Our system sends you an email including account, password and downloading link soon and automatically after your payment of NETA_2: NETA Level 2 Certified Assistant Electrical Testing Specialist preparation files, Do you want to pass your NETA_2 Practice Questions - NETA Level 2 Certified Assistant Electrical Testing Specialist exam?

There are, however, other options, including forgoing NETA_2 the configuration of redistribution and utilizing static routes, The two main Adjustment Brush masks, You may be taken up with all kind of affairs, so you have little time for studying on our NETA_2 Exam Braindumps.

How Does NETA NETA_2 Certification help To Make Your Professional Career Better?

Relying on Getcertkey NETA_2 dumps will award an easy course to get through the exam and obtain a credential such as NETA_2 you ever desired, Our system sends you an email including account, password and downloading link soon and automatically after your payment of NETA_2: NETA Level 2 Certified Assistant Electrical Testing Specialist preparation files.
