

Microsoft AZ-120 Quiz & AZ-120 study guide & AZ-120 training materials

DOWNLOAD the newest Prep4cram AZ-120 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1Kf7WWoy-D-1sY_8AMD6AZXDJdi7wywPc

IT certification exam is very popular examination in the current society, especially in the IT industry. IT certification test qualification is widely recognized by the international community. Promotion, salary raise and improving your job skills, IT certification exam is your best choice. I believe that you must think so. Then, don't hesitate to take Microsoft AZ-120 Exam which is the most popular test in the recent. If you have no idea how to prepare the certification materials for the exam, Prep4cram serve you. Prep4cram can provide you with everything you need.

Before you really attend the AZ-120 exam and choose your materials, we want to remind you of the importance of holding a certificate like this one. Obtaining a AZ-120 certificate likes this one can help you master a lot of agreeable outcomes in the future, like higher salary, the opportunities to promotion and being trusted by the superiors and colleagues. All these agreeable outcomes are no longer dreams for you. And with the aid of our AZ-120 Exam Preparation to improve your grade and change your states of life and get amazing changes in career, everything is possible. It all starts from our AZ-120 learning questions.

Positive AZ-120 Feedback & Free AZ-120 Braindumps

What is the selling point of a product? It is the core competitiveness of this product that is ahead of other similar brands. The core competitiveness of the AZ-120 study materials, as users can see, we have a strong team of experts, the AZ-120 study materials are advancing with the times, updated in real time, so that's why we can with such a large share in the market. Through user feedback recommendations, we've come to the conclusion that the AZ-120 Study Materials have a small problem at present, in the rest of the company development plan, we will continue to strengthen our service awareness, let users more satisfied with our AZ-120 study materials, we hope to keep long-term with customers, rather than a short high sale.

The Microsoft AZ-120 Exam is ideal for professionals who have experience in managing SAP solutions and want to enhance their skills in the cloud computing domain. Planning and Administering Microsoft Azure for SAP Workloads certification showcases their expertise in Azure infrastructure and SAP workloads, which is highly valued by employers worldwide. Additionally, the certification provides a career progression path for IT professionals who want to specialize in cloud computing.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q257-Q262):

NEW QUESTION # 257

You have an SAP environment on Azure.

our on-premises network connects to Azure by using a site-to-site VPN connection.

6u need to alert technical support if the network bandwidth usage between the on-premises network and Azure exceeds 900 Mbps 10 minutes.

What should you use?

- A. Azure Enhanced Monitoring for SAP
- B. Azure Monitor
- C. Azure Network Watcher
- D. NIPING

Answer: C

NEW QUESTION # 258

You recently migrated an SAP HANA environment to Azure.

You plan to back up SAP HANA databases to disk on the virtual machines, and then move the backup files to Azure Blob storage for retention.

Which command should you run to move the backups to the Blob storage?

- A. azcopy
- B. backint
- C. robocopy
- D. scp

Answer: A

Explanation:

To store directories and files on Azure storage, one could use CLI or PowerShell. There is also a ready-to-use utility, AzCopy, for copying data to Azure storage.

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-machines/workloads/sap/sap-hana-backup-file-level> Operationalize Azure SAP Architecture Testlet 1 Case Study This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd. is a manufacturing company that has 15,000 employees.

The company uses SAP for sales and manufacturing.

Contoso has sales offices in New York and London and manufacturing facilities in Boston and Seattle.

Existing Environment

Active Directory

The network contains an on-premises Active Directory domain named ad.contoso.com. User email addresses use a domain name of contoso.com.

SAP Environment

The current SAP environment contains the following components:

- * SAP Solution Manager
 - * SAP ERP Central Component (SAP ECC)
 - * SAP Supply Chain Management (SAP SCM)
 - * SAP application servers that run Windows Server 2008 R2
 - * SAP HANA database servers that run SUSE Linux Enterprise Server 12 (SLES 12)
- Problem Statements Contoso identifies the following issues in its current environment:
- * The SAP HANA environment lacks adequate resources.
 - * The Windows servers are nearing the end of support.
 - * The datacenters are at maximum capacity.

Requirements

Planned Changes

Contoso identifies the following planned changes:

- * Deploy Azure Virtual WAN.
- * Migrate the application servers to Windows Server 2016.
- * Deploy ExpressRoute connections to all of the offices and manufacturing facilities.
- * Deploy SAP landscapes to Azure for development, quality assurance, and production.

All resources for the production landscape will be in a resource group named SAPProduction.

Business goals

Contoso identifies the following business goals:

- * Minimize costs whenever possible.
- * Migrate SAP to Azure without causing downtime.
- * Ensure that all SAP deployments to Azure are supported by SAP.
- * Ensure that all the production databases can withstand the failure of an Azure region.
- * Ensure that all the production application servers can restore daily backups from the last 21 days.

Technical Requirements

Contoso identifies the following technical requirements:

- * Inspect all web queries.
- * Deploy an SAP HANA cluster to two datacenters.
- * Minimize the bandwidth used for database synchronization.
- * Use Active Directory accounts to administer Azure resources.
- * Ensure that each production application server has four 1-TB data disks.
- * Ensure that an application server can be restored from a backup created during the last five days within 15 minutes.
- * Implement an approval process to ensure that an SAP administrator is notified before another administrator attempts to make changes to the Azure virtual machines that host SAP.

It is estimated that during the migration, the bandwidth required between Azure and the New York office will be 1 Gbps. After the migration, a traffic burst of up to 3 Gbps will occur.

Proposed Backup Policy

An Azure administrator proposes the backup policy shown in the following exhibit.

        "Password": "[parameters('domainPassword')]"
      }
    }
  }
]
}
}
}

```

NEW QUESTION # 259

Your company has an SAP environment that contains the following components:

- * SAP systems based on SAP HANA and SAP Adaptive Server Enterprise (SAP ASE) that run on SUSE
- * Linux Enterprise Server 12 (SLES 12)
- * Multiple SAP applications

The company plans to migrate all the applications to Azure.

You need to get a comprehensive list of all the applications that are part of the SAP environment.

What should you use?

- A. the SAP license information
- B. the data volume management report
- C. the network inventory and locations
- **D. the SAP Solution Manager**

Answer: D

Explanation:

Explanation

The SAP Solution Manager is a centralized robust application management and administration solution used to implement, support, operate and monitor your SAP enterprise solutions, SAP Solution Manager is a platform providing integrated content, tools, methodologies and access to SAP systems.

NEW QUESTION # 260

You have an SAP landscape on Azure.

You plan to deploy a new SAP application server by using an Azure Resource Manager template.

You need to ensure that all new servers are deployed with Azure Disk Encryption enabled.

How should you complete the relevant component of the template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
"resources": [
{
  "type": "Microsoft.Compute/virtualMachines/
"name": "[concat(parameters
('vmName'), '/DiskEncryption')]",
  "location": [parameters('location')]",
  "apiVersion": "2017-03-30",
  "properties": {
    "publisher": "Microsoft.Azure.Security",
    "type":
    "Disk"
    "KeyVault"
    "Extensions"
    "AzureDiskEncryption"

"typeHandlerVersion": "2.2",
  "autoUpgradeMinorVersion": true,
  "forceUpdateTag": "2",
  "settings": {
    "EncryptionOperation": "EnableEncryption",
    "KeyVaultURL": "[reference(parameters('keyVaultResourceID'), '2016-10-01').vaultUri]",
    "KeyVaultResourceId": "[parameters('keyVaultResourceID')]",
    "KeyEncryptionKeyURL": "[parameters('keyEncryptionKeyURL')]",
    "KeyVaultResourceId": "[parameters('keyVaultResourceID')]",
    "KeyEncryptionAlgorithm": "RSA-OAEP",
    "VolumeType": "All",
    "ResizeOSDisk": false
  }
}
}
]
```

Answer:

Explanation:

```

"resources": [
{
  "type": "Microsoft.Compute/virtualMachines/
"name": "[concat(parameters
('vmName'), '/DiskEncryption')]",
  "location": [parameters('location')]",
  "apiVersion": "2017-03-30",
  "properties": {
    "publisher": "Microsoft.Azure.Security",
    "type":
    "Disk"
    "KeyVault"
    "Extensions"
    "AzureDiskEncryption"
  }
  "typeHandlerVersion": "2.2",
  "autoUpgradeMinorVersion": true,
  "forceUpdateTag": "2",
  "settings": {
    "EncryptionOperation": "EnableEncryption",
    "KeyVaultURL": "[reference(parameters('keyVaultResourceID'), '2016-10-01').vaultUri]",
    "KeyVaultResourceId": "[parameters('keyVaultResourceID')]",
    "KeyEncryptionKeyURL": "[parameters('keyEncryptionKeyURL')]",
    "KeyVaultResourceId": "[parameters('keyVaultResourceID')]",
    "KeyEncryptionAlgorithm": "RSA-OAEP",
    "VolumeType": "All",
    "ResizeOSDisk": false
  }
}
]

```

NEW QUESTION # 261

for each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements | Yes | No |
|--|-----------------------|-----------------------|
| When configuring an Azure virtual machine, the Azure Enhanced Monitoring features are required to monitor SAP application performance. | <input type="radio"/> | <input type="radio"/> |
| To successfully start an Azure virtual machine that contains SAP, you must have Azure Enhanced Monitoring installed. | <input type="radio"/> | <input type="radio"/> |
| If you deploy SAP by using the Azure Resource Manager templates for SAP, Azure Enhanced Monitoring is installed automatically. | <input type="radio"/> | <input type="radio"/> |

Answer:

Explanation:

| Statements | Yes | No |
|--|----------------------------------|----------------------------------|
| When configuring an Azure virtual machine, the Azure Enhanced Monitoring features are required to monitor SAP application performance. | <input type="radio"/> | <input type="radio"/> |
| To successfully start an Azure virtual machine that contains SAP, you must have Azure Enhanced Monitoring installed. | <input type="radio"/> | <input checked="" type="radio"/> |
| If you deploy SAP by using the Azure Resource Manager templates for SAP, Azure Enhanced Monitoring is installed automatically. | <input checked="" type="radio"/> | <input type="radio"/> |

NEW QUESTION # 262

.....

All the AZ-120 study materials of our company are designed by the experts and professors in the field. The quality of our study materials is guaranteed. According to the actual situation of all customers, we will make the suitable study plan for all customers. If you buy the AZ-120 Study Materials from our company, we can promise that you will get the professional training to help you pass your exam easily. By our professional training, you will pass your exam and get the related certification in the shortest time.
