Our software helps you to get familiar with the format of the original Nutanix Certified Associate v6.10 (NCA-6.10) test.

Nutanix Certified Associate v6.10 Sample Questions (Q69-Q74):

NEW QUESTION # 69

Which statement best describes the Storage Pool?

- A. Group of vDisks
- B. Group of boot drives
- **C. Group of physical disks**
- D. Group of Storage Containers

Answer: C

Explanation:

The correct answer is B. Group of physical disks.

In Nutanix architecture:

- * A Storage Pool is the aggregation of physical storage devices (SSD, HDD) across all nodes in a cluster.
- * Each storage pool backs one or more Storage Containers, which are logical partitions used for data placement.
- * Storage pools cannot span clusters and are always confined to the cluster in which they are defined.

Clarifications:

- * A (Storage Containers): These are logical groupings within storage pools.
- * C (Boot Drives): These are not part of the pool.
- * D (vDisks): These exist within VMs and are backed by containers, not pools directly.

Prism UI Navigation Path:

Storage > Storage Pools

Official Reference:

- * Nutanix Bible - Storage Pool Definition
- * Nutanix Storage Admin Guide
- * Excerpt: "A storage pool is made up of physical disks from one or more nodes and serves as the physical storage foundation for containers."

NEW QUESTION # 70

After starting LCM updates, an administrator would like to see a detailed view of each update as it progresses.

Which Prism Element dashboard should the administrator use to monitor the LCM updates?

- A. Hardware
- **B. Tasks**
- C. Analysis
- D. Alerts

Answer: B

Explanation:

The Tasks dashboard in Prism Element provides detailed visibility into the progress of all ongoing and completed tasks, including Life Cycle Manager (LCM) updates. Administrators can monitor the step-by-step status of LCM operations, track failures, and identify bottlenecks.

- * A. Analysis: Incorrect, as this is used for performance monitoring, not task progress.
- * B. Tasks: Correct, as it displays detailed progress for updates and other operations.
- * C. Hardware: Incorrect, as this focuses on the state and configuration of hardware components.
- * D. Alerts: Incorrect, as this shows system alerts and issues, not detailed task progress.

Nutanix Life Cycle Manager Guide: Monitoring Updates.

Prism Element Administration Guide: Tasks Dashboard.

NEW QUESTION # 71

An administrator wants to enable Windows Defender Credential Guard. What must be enabled when creating the VM?

- **A. UEFI**
- B. HA
- C. Legacy BIOS
- D. Live Migration

Answer: A

Explanation:

To enable Windows Defender Credential Guard, the VM must be configured with UEFI (Unified Extensible Firmware Interface) instead of Legacy BIOS. UEFI provides the necessary support for Secure Boot and Virtualization-Based Security (VBS), both of which are prerequisites for Credential Guard.

Steps:

- * When creating or editing the VM, select UEFI as the firmware type.
- * Ensure Secure Boot and VBS are enabled in the OS configuration.

Microsoft Windows Defender Credential Guard Requirements.
Nutanix AHV VM Configuration Guide - UEFI Support.

NEW QUESTION # 72

What is the purpose of the Recycle Bin?

- **A. Keeps deleted VMs for 24 hours for recovery.**
- B. Stores the OpLog's most recent deleted data in case of a CVM failure.
- C. Centralizes the deleted data from the different VMs in the cluster.
- D. Allows administrators to undo the last five actions.

Answer: A

NEW QUESTION # 73

An administrator needs to license a new AOS-based cluster with no add-on packages via Nutanix Cloud Platform Package Licensing.

What license type would fulfill this requirement?

- A. Nutanix Database Service (NDB)
- B. Nutanix Cloud Manager (NCM)
- **C. Nutanix Cloud Infrastructure (NCI)**
- D. Nutanix Unified Storage (NUS)

Answer: C

Explanation:

To license a new AOS-based cluster with no add-on packages, the appropriate license type is Nutanix Cloud Infrastructure (NCI). The NCI license provides the fundamental capabilities required for Nutanix clusters, including:

- * Storage and data management.
- * Core virtualization features.
- * Compute resources for workloads.

NCI is designed for organizations that need the essential features of the Nutanix platform without additional add-ons such as database services (NDB) or advanced storage options (NUS).

Other options:

- * A. Nutanix Cloud Manager (NCM): Focuses on management capabilities for multi-cloud and operational tasks, not core infrastructure licensing.
- * C. Nutanix Unified Storage (NUS): Specifically provides unified file and object storage capabilities, not relevant for a base AOS cluster.
- * D. Nutanix Database Service (NDB): A dedicated licensing tier for database management features.
