Vce C_CPI_2506 Files - Questions C_CPI_2506 Pdf

There are some loopholes or systemic problems in the use of a product, which is why a lot of online products are maintained for a very late period. The C_CPI_2506 test material is not exceptional also, in order to let the users to achieve the best product experience, if there is some learning platform system vulnerabilities or bugs, we will check the operation of the C_CPI_2506 quiz guide in the first time, let the professional service personnel to help user to solve any problems. The C_CPI_2506 prepare torrent has many professionals, and they monitor the use of the user environment and the safety of the learning platform timely, for there are some problems with those still in the incubation period of strict control, thus to maintain the C_CPI_2506 quiz guide timely, let the user comfortable working in a better environment.

SAP C_CPI_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 2	<ul style="list-style-type: none">• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 3	<ul style="list-style-type: none">• SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

Topic 4	<ul style="list-style-type: none"> • SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

SAP Certified Associate - Integration Developer Sample Questions (Q22-Q27):

NEW QUESTION # 22

You download the Performance-Traceability policy from the SAP Business Accelerator Hub and implement it in an API proxy. What can you use to view the data covered the policy?

- A. A third party monitoring tool
- B. SAP Analytics Cloud
- C. The API monitor under Monitor# Integration APIs
- D. SAP Cloud ALM

Answer: C

Explanation:

When you implement the Performance-Traceability policy in API Management:

It enables detailed monitoring of API calls, including latency, performance metrics, and message traces.

This data is available in the API Monitor (Monitor # Integration APIs) within the SAP Integration Suite cockpit.

Other options:

SAP Cloud ALM # General monitoring, not API trace-specific.

Third-party monitoring # Possible but not where SAP policy data is viewed.

SAP Analytics Cloud # For analytics, not direct monitoring of API proxy performance.

Thus, the correct monitoring location is API monitor under Monitor # Integration APIs.

NEW QUESTION # 23

When does the "Trace" log level expire and when will the log files be re-moved?

- A. Expiration: 10 minutes Removal: After 1 hour
- B. Expiration: 15 minutes Removal: After 24 hours
- C. Expiration. 10 minutes Removal. After 24 hours
- D. Expiration: 15 minutes Removal: After 10 hours

Answer: A

Explanation:

The "Trace" log level expires after 10 minutes and the log files are removed after 1 hour. The "Trace" log level is the most detailed log level that can be set for an integration flow. It records all the information about the message processing, such as headers, properties, payloads, attachments, and exceptions. However, it also consumes more resources and storage space than other log levels. Therefore, it is recommended to use it only for troubleshooting purposes and for a short duration. The "Trace" log level can be activated from the Monitor Message Processing view or from the integration flow editor. Reference: Log Levels | SAP Help Portal, Activating Trace Log Level | SAP Help Portal

NEW QUESTION # 24

What are some message protocols that the API Management capability within SAP Integration Suite supports? Note: There are 3 correct answers to this question.

- A. IDoc
- B. REST
- C. SOAP
- D. Data
- E. RFC

Answer: B,C,D

Explanation:

The API Management capability within SAP Integration Suite supports the following message protocols: SOAP, REST, and Data. SOAP is a protocol for exchanging structured XML messages between web services. REST is an architectural style for designing web services that use HTTP methods and formats. Data is a protocol for sending and receiving binary or text data over HTTP or HTTPS. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 25

What kind of editor can you use to manipulate integration flows?

- **A. Graphical editor**
- B. Command-line editor
- C. Code editor

Answer: A

Explanation:

To manipulate integration flows, you can use a graphical editor that is provided by SAP Integration Suite. The graphical editor allows you to visualize and edit your integration flows using a drag-and-drop interface. It also provides a palette of icons that represent different integration components and actions, such as senders, receivers, routers, mappers, transformers, and so on. You can use the graphical editor to design and configure complex integration scenarios in a user-friendly way. Reference: Overview of Integration Flow Editor | SAP Help Portal, Design and Deploy Your First Integration Flow | SAP Tutorials

NEW QUESTION # 26

Which Integration Flow element is best suited for executing custom Logic on the received cloud event data?

- A. Use a Java connector
- B. Employ a Mule Expression component
- C. Use an external REST API
- **D. Run a Groovy script**

Answer: D

Explanation:

For executing custom logic inside an integration flow:

Groovy script (via Script step) is the supported mechanism in SAP Cloud Integration.

External REST APIs can enrich data but are not for embedded custom logic execution.

Mule components are not part of SAP CPI.

Java connectors are not directly supported in SAP CPI runtime.

Thus, the best suited for executing custom logic is Groovy script.

NEW QUESTION # 27
