Axis Network Video Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

In order to comply with SMPTE standards of HDTV, the camera must meet the following:

- A. Frame rate, aspect ratio, resolution, color fidelity
- B. Light sensitivity, aspect ratio, resolution, color fidelity
- C. Light sensitivity, color fidelity, frame rate, aspect ratio
- D. Aspect ratio, resolution, light sensitivity, frame rate

Answer: A

Explanation:

To comply with SMPTE (Society of Motion Picture and Television Engineers) standards for HDTV, the camera must meet specific criteria including frame rate, aspect ratio, resolution, and color fidelity. These standards ensure high-quality video suitable for professional broadcast and security applications. Axis cameras designed for HDTV compliance adhere to these standards, providing high-definition video quality.

For detailed standards, refer to Axis Communications' documentation on HDTV compliance.

NEW QUESTION # 12

What is causing the issue in the image to the right?

- A. Too long exposure time
- B. Wrong WDR settings
- C. Too short exposure time
- D. Stuck IR-cut filter

Answer: D

Explanation:

"If the IR-cut filter is stuck or not functioning properly, it can cause a color cast or unnatural tint in the image during daylight, similar to what is shown in the right image."

- Axis Communications Academy, Network Video Fundamentals, 2022

"A stuck IR-cut filter often causes an unnatural magenta or pinkish hue in daylight scenes."

NEW QUESTION # 13

Which types of reports are available in AXIS Site Designer? (Select three)

- A. Warranty report
- B. Installation report
- C. Maintenance plan
- D. Bill of materials
- **E. License keys report**
- F. Sales quote

Answer: E

Explanation:

AXIS Site Designer offers various types of reports to assist in project planning and implementation. These include:

- * License keys report: Provides details on all license keys required for the project.
- * Installation report: Offers a comprehensive overview of installation details, including camera placements and configurations.
- * Bill of materials: Lists all the hardware and components needed for the project, ensuring that nothing is overlooked during the procurement process.

These reports help streamline the design, installation, and management of surveillance systems.

NEW QUESTION # 14

Increase of bandwidth and storage can be a result of (Choose two)

- **A. High noise level.**
- B. Changing from Motion JPEG to H.264.
- C. The use of High PoE.
- **D. Image resolution.**
- E. Arctic Temperature Control.

Answer: A,D

Explanation:

An increase in bandwidth and storage can be caused by high noise levels and high image resolution. High noise levels, often due to low-light conditions, result in larger file sizes because the noise needs to be encoded along with the actual image data. Higher image resolution increases the amount of data captured, thus requiring more bandwidth for transmission and more storage space.

NEW QUESTION # 15

For an outdoor camera, what is the potential consequence of not using this connector?

- A. Water ingress
- B. Reduced bandwidth
- C. Slow PTZ control
- D. IR and heaters won't work

Answer: A

Explanation:

For outdoor cameras, not using the proper connectors, such as weatherproof or waterproof connectors, can lead to water ingress. This can damage the camera's internal components, leading to malfunctions or complete failure of the device. Axis outdoor cameras are designed with specific connectors to ensure they are sealed against environmental factors like moisture, dust, and temperature extremes. According to Axis installation guides, ensuring the correct connectors are used is crucial for maintaining the camera's IP rating and long-term reliability.

NEW QUESTION # 16

.....
