are certified, organizations can be confident that they have the necessary skills and knowledge to effectively manage their release trains.

Scaled Agile SAFe Release Train Engineer Sample Questions (Q33-Q38):

NEW QUESTION # 33

What are two examples of team-level events? (Choose two.)

- A. Backlog refinement
- B. System Demo
- C. Daily stand-up
- D. Program Increment Planning

Answer: C

Explanation:

Backlog refinement and daily stand-up are both team-level events within the SAFe framework.

* Backlog refinement is a recurring event for Agile teams where team members collaborate to clarify and understand backlog items, ensuring that the backlog remains populated with items that are ready to be pulled into upcoming iterations¹.

* Daily stand-up is a short, time-boxed event for the Agile team that happens at the start of each day to synchronize activities and create a plan for the next 24 hours. This meeting is an opportunity for team members to discuss what they did the day before, what they plan to do today, and any impediments they are facing¹.

Both of these events are crucial for maintaining the flow of value through continuous delivery and are consistent with the principles of Lean and Agile found in the SAFe framework. They are designed to foster better communication, collaboration, and transparency among team members, which are key aspects of the SAFe core values¹.

NEW QUESTION # 34

What can a Release Train Engineer use to support relentless improvement for the Program Increment?

- A. Product Owner sync
- B. Iteration retrospective
- C. Release management meeting
- D. Inspect and Adapt event

Answer: D

NEW QUESTION # 35

How can a Release Train Engineer be aware of employee satisfaction?

- A. Address and resolve any problems areas
- B. Conduct an employee Net Promoter Score survey
- C. Survey full-time employees
- D. Gather employee Metrics immediately after the Agile Release Train launches

Answer: B

Explanation:

The Release Train Engineer (RTE) in SAFe is responsible for facilitating ART events and processes, and part of this role involves understanding and improving team and employee satisfaction. One effective method for assessing employee satisfaction within an organization is through the use of an employee Net Promoter Score (eNPS) survey¹. This survey measures the willingness of employees to recommend their workplace to friends and acquaintances. An eNPS survey is a tool that can provide insights into employee loyalty and satisfaction, which aligns with the RTE's responsibility to create an environment that motivates employees and keeps them healthy². By conducting such surveys, the RTE can gather valuable feedback, identify areas of improvement, and take action to enhance the overall work environment, thereby supporting the teams in delivering value¹.

NEW QUESTION # 36

Which statement describes the three elements that the Innovation and Planning Iteration provides?

- Answer: C**

Answer: B
