

High-quality 1Z0-1163-1 Test Collection Pdf - Easy and Guaranteed 1Z0-1163-1 Exam Success

P.S. Free & New 1Z0-1163-1 dumps are available on Google Drive shared by Pass4Leader: https://drive.google.com/open?id=1CB_Gq8wS-BAIL0jKn-sf-I8-83tX0tIO

Almost everyone is trying to pass the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) certification exam to upgrade their CVs and land desired jobs. Every applicant of the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) exam faces just one problem and that is not finding real and Latest 1Z0-1163-1 Exam Questions. Applicants are always confused about where to buy actual 1Z0-1163-1 Exam Questions and prepare successfully for the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) exam in a short time.

The Oracle PDF Questions format designed by the Pass4Leader will facilitate its consumers. Its portability helps you carry on with the study anywhere because it functions on all smart devices. You can also make notes or print out the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) pdf questions. The simple, systematic, and user-friendly Interface of the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) PDF dumps format will make your preparation convenient.

1Z0-1163-1 Sure-Pass Study Materials - 1Z0-1163-1 Quiz Guide & 1Z0-1163-1 Guide Torrent

Pass4Leader provides exam dumps designed by experts to ensure that the candidates' success. This means that there is no need to worry about your results since everything 1Z0-1163-1 exam dumps are verified and updated by professionals. Oracle 1Z0-1163-1 Exam are made to be a model of actual exam dumps. Therefore, it can help users to feel in a real exam such as a real exam. This will improve your confidence and lessen stress to be able to pass the actual tests.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.
Topic 2	<ul style="list-style-type: none"> • OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.
Topic 3	<ul style="list-style-type: none"> • OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.
Topic 4	<ul style="list-style-type: none"> • OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q32-Q37):

NEW QUESTION # 32

What is the role of automation in creating POs from contract fulfillment in Oracle Fusion Cloud Procurement?

- A. It enhances supplier qualification by providing visibility into supplier responses.
- **B. It ensures that POs are created accurately based on contract terms, reducing manual errors, and improving efficiency.**
- C. It facilitates the approval process by routing POs to the appropriate approvers, based on invoice rules and limits.

Answer: B

Explanation:

In Oracle Fusion Cloud Procurement, automation plays a critical role in creating purchase orders (POs) from contract fulfillment by ensuring that POs are generated directly from agreed contract terms with high accuracy and minimal manual intervention. This process leverages predefined contract data-such as item details, pricing, quantities, and delivery schedules-to populate POs automatically, reducing errors like incorrect pricing or quantities that often occur in manual entry. For instance, if a contract specifies 100 units of a product at \$10 each, automation ensures the PO reflects this exactly, bypassing the need for manual rekeying. Option A is incorrect because routing POs for approval is a subsequent step, not the primary role of automation in PO creation. Option C is unrelated, as supplier qualification pertains to evaluating suppliers, not PO generation. This automation improves efficiency by speeding up the procurement cycle, ensures compliance with contract terms, and frees procurement staff to focus on strategic tasks rather than clerical work. It also integrates with supplier collaboration tools to confirm details, further enhancing accuracy.

NEW QUESTION # 33

Which two Oracle Redwood Design System UX features, when integrated with Oracle Fusion Applications SCM, deliver a superior user experience?

- **A. Simplified User Interface (UI).**
- B. Automated Task Management.
- C. Enhanced Mobile Accessibility.
- **D. Advanced Data Visualization.**

Answer: A,D

Explanation:

The Oracle Redwood Design System enhances Oracle Fusion Applications SCM's user experience with Simplified User Interface (UI) (C) and Advanced Data Visualization (D). The Simplified UI offers an intuitive, clutter-free design with consistent layouts and minimal clicks-e.g., a planner can access demand forecasts in two steps instead of navigating complex menus, boosting productivity. Advanced Data Visualization provides interactive charts and dashboards (e.g., a heat map of inventory levels), enabling users to quickly interpret complex data and make informed decisions. Option A (Enhanced Mobile Accessibility) is valuable but less transformative than UI simplicity and visualization for daily SCM tasks. Option B (Automated Task Management) is a functional feature, not a UX design element. Together, C and D reduce learning curves, enhance decision-making, and elevate user satisfaction.

NEW QUESTION # 34

What is the primary objective of the Order Promising process in Oracle Fusion Cloud SCM?

- A. It guarantees same-day shipping for all orders.
- B. It only manages orders for direct-to-customer deliveries.
- C. It provides accurate order commitment dates based on supply and demand availability.

Answer: C

Explanation:

The Order Promising process in Oracle Fusion Cloud SCM, specifically through the Global Order Promising (GOP) module, aims to provide accurate and reliable order commitment dates by analyzing real-time supply and demand data. This process evaluates factors such as current inventory levels, production schedules, supplier lead times, and transportation constraints to determine feasible delivery dates for customer orders. It ensures businesses can promise delivery dates that align with actual capabilities, enhancing customer satisfaction and operational reliability. Option A is incorrect because Order Promising is not limited to direct-to-customer deliveries-it applies to all order types, including B2B and internal transfers. Option B is also wrong as it overpromises "same-day shipping," which is not guaranteed by Oracle Fusion SCM; instead, the system focuses on realistic commitments based on constraints. For example, if a customer orders a product with limited stock and a two-day production lead time, Order Promising calculates the earliest possible delivery date rather than assuming immediate shipment. This precision reduces overpromising and underdelivering, a common issue in manual systems.

NEW QUESTION # 35

What is the purpose of the Available to Promise (ATP) process in Oracle Fusion Cloud SCM?

- A. It manages only supplier payments without impacting inventory levels.
- B. It ensures product availability commitments based on inventory and supply constraints.
- C. It guarantees immediate product shipment for all orders.

Answer: B

Explanation:

The Available to Promise (ATP) process in Oracle Fusion Cloud SCM is designed to determine product availability and provide realistic commitments to customers based on current inventory levels and supply constraints, such as production capacity and supplier lead times. ATP calculates how much stock is "available to promise" for new orders by subtracting existing commitments from on-hand inventory and factoring in planned supply. For example, if a warehouse has 50 units of a product, with 20 already allocated to prior orders, ATP shows 30 units available for new promises. Option B is incorrect because ATP has no direct role in managing supplier payments-it focuses on inventory and supply planning. Option C is false as ATP does not guarantee immediate shipment; it provides feasible dates based on availability, not an unrealistic promise of instant delivery. This process supports accurate order promising, prevents stockouts, and aligns customer expectations with operational reality, making it a cornerstone of effective supply chain management.

NEW QUESTION # 36

What is the primary purpose of the Predict Demand process in Oracle Fusion Cloud SCM?

- A. It focuses only on local inventory availability.
- B. It guarantees same-day delivery for all orders.
- C. It uses machine learning and statistical forecasting to predict demand.
- D. It eliminates the need for supplier collaboration.

Answer: C

Explanation:

The Predict Demand process (B) in Oracle Fusion Cloud SCM aims to forecast customer demand using advanced tools like machine learning and statistical forecasting. Machine learning analyzes historical sales, market trends, and external factors (e.g., weather or economic indicators) to predict future demand with high accuracy, while statistical forecasting provides a baseline using mathematical models like moving averages. For example, it might predict a 20% increase in demand for air conditioners in summer based on past patterns. Option A is incorrect-demand prediction isn't limited to local inventory but informs broader supply planning. Option C is false; supplier collaboration remains essential to fulfill predicted demand. Option D is unrealistic-Predict Demand focuses on forecasting, not delivery guarantees. This process ensures businesses can proactively adjust inventory and production, reducing costs and improving service levels.

NEW QUESTION # 37

• • • • •

With the 1Z0-1163-1 exam, you will harvest many points of theories that others ignore and can offer strong prove for managers. So the 1Z0-1163-1 exam is a great beginning. However, since there was lots of competition in this industry, the smartest way to win the battle is improving the quality of our 1Z0-1163-1 Learning Materials, which we did a great job. With passing rate up to 98 to 100 percent, you will get through the 1Z0-1163-1 exam with ease.
