

# Dumps Oracle 1Z1-182 Collection - 1Z1-182 Exam Forum

BONUS!!! Download part of Itcertmaster 1Z1-182 dumps for free: [https://drive.google.com/open?id=12UXJKTzNR5jmB7wEAoqtlar0R\\_A6FPxf](https://drive.google.com/open?id=12UXJKTzNR5jmB7wEAoqtlar0R_A6FPxf)

There are many advantages of our 1Z1-182 exam briandump and it is worthy for you to buy it. You can download and try out our 1Z1-182 guide questions demo before the purchase and use them immediately after you pay for them successfully. Once you pay for it, we will send to you within 5-10 minutes. Then you can learn and practice it. We update the 1Z1-182 Torrent question frequently to make sure that you have the latest 1Z1-182 exam questions to pass the exam. You may enter in the big company and double their wages after you pass the 1Z1-182 exam.

We provide three versions to let the clients choose the most suitable equipment on their hands to learn the 1Z1-182 exam guide such as the smart phones, the laptops and the tablet computers. We provide the professional staff to reply your problems about our 1Z1-182 study materials online in the whole day and the timely and periodical update to the clients. So you will definitely feel it is your fortune to buy our 1Z1-182 Exam Guide question. If you want to pass the 1Z1-182 exam, you should buy our 1Z1-182 exam questions.

## Dumps 1Z1-182 Collection | Oracle 1Z1-182 Exam Forum: Oracle Database 23ai Administration Associate Latest Released

As a busy working person it will cost a lot of time and energy to prepare for upcoming test, what's to be done? You can try our latest Oracle 1Z1-182 practice exam online materials. You can know more about exam information and master all valid exam key knowledge points. 1Z1-182 Practice Exam Online is excellent product of all examination questions with high passing rate. It will improve your studying efficiency and low exam cost.

## Oracle Database 23ai Administration Associate Sample Questions (Q82-Q87):

### NEW QUESTION # 82

Which three statements are true about using SQL\*Plus?

- A. It can run Recovery Manager (RMAN) commands.
- B. It must be downloaded from the Oracle Technology Network (OTN).
- C. It can run scripts entered at the SQL prompt.
- D. It has both command-line and graphical user interfaces (GUI).
- E. It has its own commands that are separate from any SQL statements.
- F. It can run scripts passed to it by a shell script.

**Answer: C,E,F**

Explanation:

A .True. sqlplus @script.sql works from shell scripts.

- B .False. RMAN uses its own client, not SQL\*Plus.
- C .False. Bundled with Oracle DB software.
- D .False. Command-line only; no GUI in 23ai.
- E .True. @script runs scripts interactively.
- F .True. Commands like SHOW PARAMETER are unique.

#### NEW QUESTION # 83

Which three actions are ways to apply the principle of least privilege?

- A. Revoking execute privilege on UTL\_SMTP, UTL\_TCP, UTL\_HTTP, and UTL\_FILE from the roles/users (assuming typo for duplicate option).
- B. Setting the O7\_DICTIONARY\_ACCESSIBILITY parameter to TRUE.
- C. Enabling Unified Auditing.
- D. Setting the REMOTE\_OS\_AUTHENT parameter to TRUE.
- E. Using Access Control Lists (ACLs).

**Answer: A,C,E**

Explanation:

- A .True. Auditing tracks privilege use, enforcing least privilege.
- B .True. Revoking unnecessary PL/SQL access limits capabilities.
- C .True. ACLs restrict network access precisely.
- D .False. TRUE relaxes dictionary access, violating least privilege.
- E .False. TRUE allows risky OS auth, weakening security.

#### NEW QUESTION # 84

Which three statements are true about an SPFILE?

- A. It contains only static initialization parameters.
- B. It contains initialization parameters whose values can be changed using the ALTER SYSTEM statement.
- C. It must exist for a database instance to start.
- D. It can be used to create a PFILE.
- E. It can be created by SYS from an idle instance.

**Answer: B,D,E**

Explanation:

- A .True. CREATE SPFILE FROM PFILE works when idle.
- B .False. Includes dynamic parameters too.
- C .True. CREATE PFILE FROM SPFILE generates a PFILE.
- D .False. A PFILE can start the instance if no SPFILE exists.
- E .True. Dynamic parameters (e.g., DB\_CACHE\_SIZE) are modifiable.

#### NEW QUESTION # 85

Which two account management capabilities can be configured using Oracle profiles?

- A. The number of days for which an account may be logged in to one or more sessions before it is locked.
- B. The ability to prevent a password from ever being reused.
- C. The maximum number of sessions permitted for a user before the password must be changed.
- D. The number of days for which an account may be inactive before it is locked.
- E. The maximum amount of CPU time allowed for a user's sessions before their account is locked.

**Answer: B,D**

Explanation:

- A .False. Session limits don't tie to password changes.
- B .False. CPU limits don't lock accounts.
- C .False. No direct "logged-in days" parameter.

- D . True. PASSWORD\_REUSE\_MAX=UNLIMITED prevents reuse.
- E . True. PASSWORD\_LOCK\_TIME sets inactivity lockout.

### NEW QUESTION # 86

Which statement is true about database links?

- A. A public database link can be created only by SYS.
- B. Private database link creation requires the same user to exist in both the local and the remote databases.
- C. A database link can be created only between two Oracle databases.
- **D. A database link created in a database allows a connection from that database's instance to the target database's instance, but not vice versa.**
- E. A public database link can be used by a user connected to the local database instance to connect to any schema in the remote database instance.

**Answer: D**

Explanation:

Database links enable cross-database queries in Oracle. Let's analyze each option with extensive detail:

A . A public database link can be created only by SYS.

False. Any user with the CREATE PUBLIC DATABASE LINK privilege (not just SYS) can create a public link (e.g., CREATE PUBLIC DATABASE LINK remote\_db CONNECT TO scott IDENTIFIED BY tiger USING 'orcl'). While SYS typically has this privilege, it's not exclusive to SYS.

Mechanics: Privilege is granted via GRANT CREATE PUBLIC DATABASE LINK TO user;. Public links are accessible to all users in the local DB.

Why Incorrect: Overly restrictive; Oracle's security model allows delegation.

B . A database link can be created only between two Oracle databases.

False. Database links can connect to non-Oracle databases using Oracle Heterogeneous Services or gateways (e.g., ODBC or JDBC drivers), such as linking to SQL Server. Example: CREATE DATABASE LINK mssql\_link USING 'hsodbc';.

Mechanics: Requires configuration of hs\_ parameters in init.ora and a gateway listener.

Historical Note: Heterogeneous links were introduced in 8i, expanded in 23ai for cloud integration.

C . A database link created in a database allows a connection from that database's instance to the target database's instance, but not vice versa.

True. A database link is unidirectional; it enables queries from the local instance to the remote instance (e.g., SELECT \* FROM emp@remote\_db), but the remote instance can't use it to query back unless a separate link is created there.

Mechanics: Stored in DBA\_DB\_LINKS, the link defines a one-way connection via a TNS alias or connect string.

Practical Use: Ensures controlled access; bidirectional access requires explicit configuration.

Edge Case: Loops are prevented unless explicitly designed with mutual links.

D . A public database link can be used by a user connected to the local database instance to connect to any schema in the remote database instance.

False. Public links allow all local users to use them, but access to remote schemas depends on the link's credentials (e.g., CONNECT TO scott) and the user's remote privileges. "Any schema" overstates it; access is limited to what the link's user can see.

Why Incorrect: Misrepresents privilege scope; remote schema access isn't universal.

E . Private database link creation requires the same user to exist in both the local and the remote databases.

False. A private link (e.g., CREATE DATABASE LINK my\_link CONNECT TO scott IDENTIFIED BY tiger USING 'orcl') requires the remote user (scott) to exist, but the local creator (e.g., HR) need not match. The link is owned locally and authenticated remotely.

Mechanics: Only the CREATE DATABASE LINK privilege is needed locally.

### NEW QUESTION # 87

.....

The dream of IT in front of the reality is always tiny. But the dream to pass 1Z1-182 certification exam, with the help of Itcertmaster, can be absolutely realized. The service of our Itcertmaster is high-quality, the accuracy of 1Z1-182 Certification Exam training materials is very high, the passing rate of 1Z1-182 exam is as high as 100%. As long as you choose Itcertmaster, we guarantee that you can pass the 1Z1-182 certification exam!

**1Z1-182 Exam Forum:** <https://www.itcertmaster.com/1Z1-182.html>

If you fail in the 1Z1-182 Exam Forum - Oracle Database 23ai Administration Associate exam, we promise to give you a full refund

with normal procedures; or you can freely change for another exam test, Oracle Dumps 1Z1-182 Collection In "Practice Exam" you can practice the questions and review the correct answers as you go, Oracle Dumps 1Z1-182 Collection With practices, knowledge is deeply consolidated in your mind, Oracle Dumps 1Z1-182 Collection Dreaming to be a certified professional in this line?

The upside is that you're protected from the Dumps 1Z1-182 Collection careless slip of the tongue, Define custom tags and filters to minimize coding. If you fail in the Oracle Database 23ai Administration Associate exam, we promise to give 1Z1-182 Valid Dumps Files you a full refund with normal procedures; or you can freely change for another exam test.

## Oracle 1Z1-182 Exam Dumps - Latest Preparation Material [2026]

In "Practice Exam" you can practice the questions and review the correct 1Z1-182 answers as you go, With practices, knowledge is deeply consolidated in your mind, Dreaming to be a certified professional in this line?

It is crucial to keep yourself survive in the competitive tide.
