我々の目標はC_BCFIN_2502試験に準備するあなたに試験に合格させることです。この目標を実現するには、我が社のTech4Examは試験改革のとともにめざましく推進していき、最も専門的なC_BCFIN_2502問題集をリリースしています。現時点で我々のSAP C_BCFIN_2502問題集を使用しているあなたは試験にうまくパースできると信じられます。心配なく我々の真題を利用してください。

SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions 認定 C_BCFIN_2502 試験問題 (Q22-Q27):

質問 # 22

What are future features with which AI agents are expected to facilitate the Quote to Cash process?

Note: There are 2 correct answers to this question.

- A. Automatically solve dispute cases without supervision.
- **B. Identify high-risk collections transactions.**
- **C. Recommend working-capital strategies to treasury.**
- D. Proactively cut business ties with unreliable customers.

正解: B、C

解説:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

As SAP moves toward "Autonomous Finance," AI agents are expected to evolve from simple automation to proactive decision support within the Quote-to-Cash (Q2C) and Treasury cycles. One key future feature is the ability for AI to identify high-risk collections transactions before they become problematic. By analyzing vast amounts of historical payment behavior, external credit scores, and market trends, AI can flag specific customers or invoices that are likely to result in a dispute or late payment, allowing the collections team to intervene early.

Another advanced capability is the use of AI to recommend working-capital strategies to treasury. In this scenario, the AI agent analyzes the company's current cash position, upcoming payables, and projected receivables to suggest the most efficient use of capital-such as whether to take advantage of early payment discounts or to invest excess liquidity. While AI will significantly assist in solving dispute cases (Option A), doing so "without supervision" is generally not the goal for complex financial disputes, as human oversight remains critical for relationship management. Similarly, cutting ties with customers (Option B) remains a strategic human decision. The value of AI in SAP's roadmap lies in its ability to provide predictive "risk identification" and "strategic recommendations" to enhance human decision-making.

質問 # 23

What is the primary function of SAP Asset Management?

- A. To automate payroll processing
- B. To enhance customer relationship management
- C. To manage employee benefits
- **D. To optimize fixed asset management**

正解: D

質問 # 24

Which of the following is a benefit of using SAP Analytics Cloud?

- **A. Real-time insights and predictive analytics**
- B. Manual data integration
- C. Limited data visualization
- D. No support for financial reporting

正解: A

質問 # 25

Which of the following is a key benefit of SAP Business Suite?

- A. Manual data entry
- B. Batch-based reporting
- C. Limited integration
- **D. Real-time data sharing**

正解: D

質問 # 26

Which solution can you integrate with the Global Tax solutions to manage corporate income tax?

- **A. SAP Profitability and Performance Management**
- B. SAP Global Trade Services
- C. SAP Document and Reporting Compliance
- D. SAP Watch List Screening

正解: A

解説:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

In the SAP Financial Management landscape, managing corporate income tax necessitates the ability to handle complex data modeling and high-volume calculations. SAP Profitability and Performance Management (PaPM) is the primary solution for this requirement. While SAP Document and Reporting Compliance is tailored for electronic invoicing and real-time statutory reporting, PaPM provides the sophisticated calculation engine required for tax provisioning, transfer pricing, and complex tax allocations. Integrating PaPM with Global Tax solutions allows finance teams to automate the consolidation of tax- relevant data from disparate sources. This ensures that the tax department utilizes the "Single Source of Truth" provided by the SAP S/4HANA Universal Journal. By leveraging PaPM, CFOs can ensure that their corporate income tax calculations are transparent, auditable, and compliant with evolving international standards like Pillar Two. This integration streamlines the end-of-year tax accounting process, moving it from a manual, spreadsheet-heavy task to an automated, defensible workflow that provides a clear view of the effective tax rate (ETR) and its impact on the organization's overall financial health.
