Quiz Authoritative Fortinet - NSE6_FSR-7.3 - Certification Fortinet NSE 6 - FortiSOAR 7.3 Administrator Exam Cost

What's more, part of that Free4Dump NSE6_FSR-7.3 dumps now are free: https://drive.google.com/open?id=1Tc6T-GN1Mm1-lj0Tl7cbpWSINBHYK4IK

First of all, we have the best and most first-class operating system, in addition, we also solemnly assure users that users can receive the information from the NSE6_FSR-7.3 certification guide within 5-10 minutes after their payment. Second, once we have written the latest version of the NSE6_FSR-7.3 certification guide, our products will send them the latest version of the NSE6_FSR-7.3 Test Practice question free of charge for one year after the user buys the NSE6_FSR-7.3 exam questions. Last but not least, our perfect customer service staff will provide users with the satisfaction in the hours.

Fortinet NSE6_FSR-7.3 Exam Syllabus Topics:

Topic	Details
Topic 1	• System Configuration: FortiSOAR requires careful setup of applications for FortiSoar System Administrators. It covers system fixtures, and proxy settings to function optimally.
Topic 2	• Security Management: This section covers how Security Engineers implement role-based access control (RBAC) and set up team structures within FortiSOAR to streamline security management.
Topic 3	• SOC and SOAR Overview: Security Engineers can gain an understanding of SOC and SOAR deployment requirements, including licensing management for FortiSOAR.
Topic 4	• System Operation: For System Engineers, this section covers Elasticsearch data management that may need to be externalized or migrated to accommodate system needs. Additionally, this section covers configuring the recommendation engine and utilizing the war room functionality.

Topic 5	• System Monitoring and Maintenance: For FortiSOAR Administrators, this domain covers using various tools for system monitoring to ensure consistent performance. This includes how to regularly oversee FortiSOAR processes, along with other critical functions.

New Fortinet NSE6_FSR-7.3 Test Testking & Exam NSE6_FSR-7.3 Papers

In this way, the Fortinet NSE6_FSR-7.3 certified professionals can not only validate their skills and knowledge level but also put their careers on the right track. By doing this you can achieve your career objectives. To avail of all these benefits you need to pass the NSE6_FSR-7.3 Exam which is a difficult exam that demands firm commitment and complete NSE6_FSR-7.3 exam questions preparation.

Fortinet NSE 6 - FortiSOAR 7.3 Administrator Sample Questions (Q22-Q27):

NEW QUESTION # 22
Which two statements about appliance users are true? (Choose two.)

- A. Appliance users use time-expiring tokens for primary authentication.
- B. Appliance users do not have a login ID and do not add to the license count.
- C. Appliance users use two-factor authentication for messages sent to the API.
- D. Appliance users represent non-human users.

Answer: B,D

Explanation:
In FortiSOAR, appliance users are accounts that represent non-human entities, such as system processes or integrations. These users do not require login IDs and therefore do not contribute to the licensing user count.
Appliance users are configured for backend tasks or to interact with external systems, enabling automated processes without consuming standard user licenses. This approach optimizes system resources and keeps licensing costs manageable.

NEW QUESTION # 23
When configuring an HA cluster with an externalized PostgreSQL database, which two tiles on the database server need to be configured to trust all FortiSOAR nodes' incoming connections? (Choose two.)

- A. db_external_config.yml.
- B. db_config.yml
- C. pg_hba.conf
- D. postgreaq1.conf

Answer: C,D

Explanation:
In a FortiSOAR High Availability (HA) cluster setup with an externalized PostgreSQL database, it is necessary to configure the database server to allow incoming connections from all FortiSOAR nodes. This configuration involves modifying the pg_hba.conf file to set up host-based authentication and control which IP addresses can connect. The postgresql.conf file must also be adjusted to enable listening on all necessary IP addresses, which is critical for FortiSOAR nodes to connect to the database server securely and reliably.
Together, these configurations ensure that all FortiSOAR nodes can access the database, facilitating effective HA functionality.

NEW QUESTION # 24
Which two ports must be open between FortiSOAR HA nodes'* (Choose two.)

- A. Port 25
- B. Port 5432

- C. Port 9200
- D. Port 6380

Answer: B,C

Explanation:
In a FortiSOAR HA configuration, certain ports must be open for communication between nodes. Port 5432 is required for PostgreSQL database communication, which is essential for data replication between HA nodes. Port 9200 is used by Elasticsearch, which FortiSOAR leverages for indexing and search functions across the nodes. These ports must be accessible between nodes to ensure seamless operation and data consistency within the cluster.

NEW QUESTION # 25
Select two statements that are true about FortiSOAR themes.
(Choose two.)

- A. Non-administrator users can change the theme by editing their user profile.
- B. Selecting Revert Theme allows the user to revert the user profile theme.
- C. There are three theme options available: Dark, Light, and Sky.
- D. FortiSOAR theme can be configured to apply to all users on the system.

Answer: A,D

NEW QUESTION # 26
Which playbook collection includes system-level playbooks that FortiSOAR uses to auto-populate date fields when the status of incident or alert records changes to Resolved or Closed?

- A. Utilities Playbooks
- B. Approval/Manual Task Playbooks
- C. SLA Management Playbooks
- D. Schedule Management Playbooks

Answer: C

Explanation:
The SLA Management Playbooks collection in FortiSOAR includes system-level playbooks designed to auto-populate date fields when the status of incident or alert records changes to Resolved or Closed. This functionality ensures that relevant date fields, such as resolution date or closure date, are accurately filled based on SLA criteria. By using SLA Management Playbooks, FortiSOAR automatically maintains date-related data integrity, which is essential for tracking and reporting purposes.

NEW QUESTION # 27
