If you are confusing while preparing for your test, you can choose to trust our information resource and experienced experts rather than waste a lot of time on learning aimlessly. Our Microsoft SC-401 exam guide materials are edited by professional experts based on latest and exact information about the real test. Generally the passing rate is high up to 99.79%. If you want to pass exam as soon as possible, our SC-401 Exam Guide Materials will be most useful product for you.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q157-Q162):

NEW QUESTION # 157

You have a Microsoft 365 E5 subscription.

You plan to use Microsoft Purview insider risk management.

You need to create an insider risk management policy that will detect data theft from Microsoft SharePoint Online by users that submitted their resignation or are near their employment termination date.

What should you do first?

- A. Configure an HR data connector.
- B. Configure Office indicators.
- C. Onboard devices to Microsoft Defender for Endpoint.
- D. Configure a Physical badging connector.

Answer: A

Explanation:

<https://learn.microsoft.com/en-us/purview/import-hr-data?tabs=microsoft-purview-portal>

NEW QUESTION # 158

You have a Microsoft 365 E5 subscription that has data loss prevention (DLP) implemented.

You need to create a custom sensitive info type. The solution must meet the following requirements:

*Match product serial numbers that contain a 10-character alphanumeric string.

*Ensure that the abbreviation of SN appears within six characters of each product serial number.

*Exclude a test serial number of 1111111111 from a match.

Which pattern settings should you configure for each requirement? To answer, drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 159

HOTSPOT

You need to meet the technical requirements for the confidential documents.

What should you create first, and what should you use for the detection method? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

To detect and protect confidential documents, we need a custom rule to identify project codes that start with 999 (since they are classified as confidential).

Box 1: A Sensitive Info Type (SIT) allows Microsoft Purview DLP policies to recognize structured data (e.g., project codes). DLP policies require a sensitive info type to detect content based on patterns, keywords, or dictionary terms. A sensitivity label alone does not define detection logic-it is used for classification and protection after content is identified.

Box 2: Since project codes follow a structured 10-digit pattern, we should use a Regular Expression (Regex) to match project codes that start with 999.

Example Regex pattern:

999\d{7}

This pattern detects a 10-digit number starting with "999".

NEW QUESTION # 160

You have a Microsoft 365 E5 subscription.

You need to create static retention policies for the following locations:

*Teams chats

*Exchange email

*SharePoint sites

*Microsoft 365 Groups

*Teams channel messages

What is the minimum number of retention policies required?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

Answer: A

Explanation:

In Microsoft Purview Data Lifecycle Management, different Microsoft 365 locations require separate retention policies because they fall under different storage and compliance models.

Teams Chats & Teams Channel Messages (1 Policy) require a separate retention policy because Teams messages are stored differently than Exchange and SharePoint content. One policy can cover both Teams chats and Teams channel messages. Exchange Email (1 Policy) requires its own separate policy since emails are managed differently than Teams or SharePoint content. SharePoint Sites & Microsoft 365 Groups (1 Policy) are both stored in SharePoint Online, so they can be managed under one policy.

NEW QUESTION # 161

Hotspot Question

You have a Microsoft 365 E5 subscription.

You are implementing insider risk management.

You need to create an insider risk management notice template and format the message body of the notice template.

How should you configure the template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Microsoft Purview portal

Create insider risk management notice templates

To create a new insider risk management notice template, you'll use the notice creation tool in Insider risk management solution in the Microsoft Purview portal.

Box 2: HTML

HTML for notices

If you'd like to create more than a simple text-based email message for notifications, you can create a more detailed message by using HTML in the message body field of a notice template.
