## 220-1201 Simulations Pdf - 100% Pass 2026 220-1201: CompTIA A+ Certification Exam: Core 1 First-grade New Test Blueprint

Before you purchase our product you can have a free download and tryout of our 220-1201 study tool. We provide the demo on

our pages of our product on the websites and thus you have an understanding of part of our titles and the form of our 220-1201 test torrent. We guarantee to you if you fail in we will refund you in full immediately and the process is simple. If only you provide us the screenshot or the scanning copy of the 220-1201 failure marks we will refund you immediately. If you have doubts or other questions please contact us by emails or contact the online customer service and we will reply you and solve your problem as quickly as we can. So feel relieved when you buy our 220-1201 guide torrent.

## CompTIA A+ Certification Exam: Core 1 Sample Questions (Q353-Q358):

### NEW QUESTION # 353

Which of the following is designed to be used in commercial spaces?

- A. **Plenum cabling**
- B. USB 3.1 Gen 2
- C. Cat 8
- D. Straight tip fiber connector

**Answer: A**

Explanation:

Plenum cabling is designed for use in commercial spaces where cables run through air ducts or plenum spaces, as it has fire-resistant properties and emits less toxic smoke.

### NEW QUESTION # 354

Which of the following internet connection types is the best for extremely high data transfer with symmetrical upload and download speeds?

- A. Satellite
- B. DSL
- C. Cellular
- D. **Fiber**

**Answer: D**

Explanation:

Fiber optic connections provide the highest data transfer rates and symmetrical upload and download speeds. This makes fiber the ideal choice for applications requiring high-speed connectivity, such as video conferencing, large file transfers, and cloud-based workflows.

Reference: CompTIA A+ Certification Exam Core 1 Objectives - Domain 2.0 Networking - Objective 2.7:

Compare and contrast internet connection types, network types, and their features.

### NEW QUESTION # 355

#### SIMULATION 8

A third-party contractor recently installed a new switch, router, and cabling for a small corporate office. After the installation, users started experiencing issues connecting to resources over the network.

#### INSTRUCTIONS

Click on each PC and server to review outputs. From the remediation section on the right, select an issue and solution for each device.

**Answer:**

Explanation:

Looking at the network configurations and outputs from both PCs and servers, here are the possible issues and solutions:

1. PC 1

Issue: The IP address for PC1 is 192.168.1.1, which conflicts with Server 1 (which also uses 192.168.1.1).

Solution: Change the IP address on PC1 to a unique one within the range, like 192.168.1.3.

2. PC 2

Issue: PC 2 is configured with 192.168.1.2, which conflicts with Server 2 that has the same IP address. Solution: Update the IP address on PC 2 to something unique, like 192.168.1.4.

3. Server 1

Issue: The IP address for Server 1 is 192.168.1.1, which conflicts with PC1. Solution: Since Server 1 and PC1 are using the same IP address, change one of them. For Server 1, you could change the IP address to 192.168.1.5.

4. Server 2

Issue: Server 2 is using the IP address 192.168.1.2, which conflicts with PC2. Solution: Update Server 2 to use a different IP address, such as 192.168.1.6.

General Remediation:

The primary problem here is overlapping IP addresses, leading to connectivity issues. Each device on the network must have a unique IP address. After making these changes, ensure that all devices can communicate properly by testing the connection between devices and verifying they can access shared resources.

### NEW QUESTION # 356

A technician is setting up a new multifunction device to be used over a shared network connection. Copier functions need to be restricted to only office employees. Which of the following should the technician perform after configuring the device to use a print server that exists on the domain?

- A. SMTP implementation
- B. Firmware update
- **C. User authentication**
- D. SMB configuration

**Answer: C**

Explanation:

User authentication allows access to device functions (like printing and copying) to be restricted to authorized personnel. This is typically implemented on networked multifunction devices for security and auditing.

From CompTIA A+ 220-1101 Official Study Guide, Objective 3.4 - Printer and device security:

"Enable user authentication on shared multifunction devices to restrict access to specific features for authorized users only." Verified Source:

\* CompTIA A+ Core 1 (220-1101) Official Study Guide, Chapter 3: Printer Security

\* CompTIA Exam Objectives 220-1101, Domain 3.4

### NEW QUESTION # 357

Which of the following can be used to logically segment networks?

- A. MAC
- B. NIC
- C. DSL
- **D. VLAN**

**Answer: D**

Explanation:

A VLAN (Virtual Local Area Network) is a network technology used to logically segment a physical network into multiple distinct broadcast domains, even if they share the same hardware.

### NEW QUESTION # 358

.....

220-1201 exam dumps have a higher pass rate than products in the same industry. If you want to pass 220-1201 certification, then it is necessary to choose a product with a high pass rate. Our study materials guarantee the pass rate from professional knowledge, services, and flexible plan settings. According to user needs, 220-1201 exam prep provides everything possible to ensure their success. The 99% pass rate is the proud result of our study materials.
