

Oracle 1z0-1075-25 Free Exam Questions & Dump 1z0-1075-25 File

Oracle 1Z0-1075-25 Oracle Manufacturing Cloud 2025 Implementation Professional QUESTION & ANSWERS

Visit Now: <https://www.dumps-certify.com>

You can easily download these formats of Oracle 1z0-1075-25 actual dumps and use them to prepare for the Oracle 1z0-1075-25 certification test. You do not need to enroll yourself in expensive 1z0-1075-25 Exam Training classes. With the Oracle 1z0-1075-25 valid dumps, you can easily prepare well for the actual Oracle Manufacturing Cloud 2025 Implementation Professional exam at home.

Our 1z0-1075-25 study materials are compiled and verified by the first-rate experts in the industry domestically and they are linked closely with the real exam. Our products' contents cover the entire syllabus of the exam and refer to the past years' exam papers. Our test bank provides all the questions which may appear in the real exam and all the important information about the exam. You can use the practice test software to test whether you have mastered the 1z0-1075-25 Study Materials and the function of stimulating the exam to be familiar with the real exam's pace, atmosphere and environment. So our 1z0-1075-25 study materials are real-exam-based and convenient for the clients to prepare for the exam.

Dump 1z0-1075-25 File & 1z0-1075-25 Reliable Test Cram

Only 20-30 hours on our 1z0-1075-25 learning guide are needed for the client to prepare for the test and it saves our client's time and energy. Most people may wish to use the shortest time to prepare for the 1z0-1075-25 test and then pass the test with our 1z0-1075-25 Study Materials successfully because they have to spend their most time and energy on their jobs, learning, family lives and other important things. And our 1z0-1075-25 exam braindumps won't let you down!

Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q25-Q30):

NEW QUESTION # 25

You are defining a standard operation for visual inspection. You want the completion of this standard operation to be reported in all work orders that reference it.

Which setup task must you perform to achieve this?

- A. Select the Automatically Transact check box while defining the standard operation.
- B. Ensure that the Charge Type of the resource is Automatic.
- C. Deselect the Count Point check box while defining the standard operation.
- D. Select the Count Point check box while defining the standard operation.

Answer: D

Explanation:

In Oracle Manufacturing Cloud, when defining a standard operation such as visual inspection, marking it as a Count Point ensures that its completion will be tracked and reported for all work orders referencing it. A Count Point operation is one where progress must be explicitly recorded, allowing visibility into work order completion.

* Selecting the Count Point check box ensures that this operation becomes a mandatory checkpoint where users must report completion in all related work orders. This is essential for operations like visual inspection, where reporting completion is critical to production quality.

Oracle Manufacturing Cloud documentation on defining standard operations explains the significance of using the Count Point functionality to enforce operation completion reporting.

NEW QUESTION # 26

Which two reports provide work order cost-related information to Costing users?

- A. Purchase Variance Summary
- B. Receipt Accounting Dashboard
- C. Work Order Operational Analysis
- D. WIP Balance by Plant

Answer: C,D

Explanation:

The following reports provide cost-related information to Costing users in Oracle Manufacturing Cloud:

* Work Order Operational Analysis (A) : This report provides detailed information on the operations performed in a work order, including cost-related data, helping costing users analyze production efficiency and associated costs.

* WIP Balance by Plant (C) : This report gives costing users insight into work-in-progress (WIP) balances for each plant, showing the costs associated with incomplete work orders and materials in the production process.

Incorrect options:

* Receipt Accounting Dashboard (B) is used for receipt-related accounting, not work order costs.

* Purchase Variance Summary (D) focuses on purchase price variances, not work order-related costs.

Oracle Cloud SCM Cost Management guides describe how the Work Order Operational Analysis and WIP Balance by Plant reports help costing users track and analyze costs associated with work orders.

NEW QUESTION # 27

A Production Supervisor queries a work order, WO-1025, from the Manage Work Orders page. On the Entering Edit Work Order: WO-1025 page, the supervisor finds a General Information, Operations, and History tab, but no Reservations tab.

What are two reasons for the Reservations tab not being displayed for WO-1025?

- A. It is not a Back-to-Back work order.
- B. It is not a Configured Item work order.
- C. It is not a Pick-to-Order work order.
- D. It is not a Plan-to-Produce work order.
- E. It is not a Drop-Ship work order.

Answer: A,B

Explanation:

In Oracle Manufacturing Cloud, the Reservations tab on the Edit Work Order page is displayed only for specific types of work orders that require reservations of components or materials. The absence of the Reservations tab in work order WO-1025 indicates that the work order is not one of the following types:

* Configured Item Work Order (A) : Configured items are typically built based on specific customer requirements, and reservations of components are often necessary. Since WO-1025 is not a configured item work order, the Reservations tab is not shown.

* Back-to-Back Work Order (E) : Back-to-back work orders are linked to sales orders and require reservations of materials to fulfill the specific demand. Since WO-1025 is not a back-to-back work order, the tab is not displayed.

Incorrect options:

* B, C, D : Drop-Ship, Pick-to-Order, and Plan-to-Produce work orders do not typically require reservations in the same way as configured or back-to-back orders, which is why they are not the reasons for the absence of the Reservations tab.

Oracle Cloud documentation on work order types and the Reservations tab explains the conditions under which reservations are required and when the tab is displayed.

NEW QUESTION # 28

Which is NOT a required setup task for Manufacturing master data?

- A. Manage Work Areas
- B. Manage Work Centers
- C. Manage Plant Parameters
- **D. Manage Plant Profiles**
- E. Manage Production Resources

Answer: D

Explanation:

In Oracle Manufacturing Cloud, setting up the Manufacturing master data involves a series of required tasks to enable production operations. The following are the key setups:

* Manage Production Resources : This setup task is essential for defining resources such as labor, equipment, and tools that are used in the manufacturing process. Resources are vital to the production planning and scheduling functions.

* Manage Plant Parameters : This task is required to define how the plant will operate in terms of material handling, scheduling, costing, and other key operational metrics. These parameters control important aspects of how manufacturing will function at the plant level.

* Manage Work Centers : Work centers represent the physical or logical locations where manufacturing operations occur. They must be set up for scheduling and executing production activities.

* Manage Work Areas : Work areas are required to group related work centers and define operational zones within a plant. This is important for organizing production and ensuring efficient material flow.

* Manage Plant Profiles : This task is not required for setting up manufacturing master data. Plant profiles are typically used for broader plant-level settings but are not directly tied to the manufacturing execution setup.

Oracle Manufacturing Cloud Implementation documentation outlines the mandatory steps needed to set up the manufacturing process, including work centers, work areas, resources, and plant parameters. Plant profiles are part of more administrative configuration and are not directly tied to production execution.

NEW QUESTION # 29

Your customer runs production 24 x 7 x 365 and wants to track Overall Equipment Effectiveness (OEE) online.

Which key setup can they use to achieve this?

- A. Enable IoT Asset Monitoring and turn on " Enable synchronization to IoT Asset Monitoring " In Plant Parameters.
- B. Enable IoT Fleet Monitoring and enable synchronization to IoT Production Monitoring in Plant Parameters.
- C. Enable IoT Production Monitoring and turn on " Enable synchronization to IoT Production
- **D. Enable IoT Production Monitoring and turn on " Enable synchronization to IoT Production Monitoring " In Inventory Organization.**
- E. Enable IoT Asset Monitoring and turn on " Enable synchronization to IoT Asset Monitoring " in Resources.

Answer: D

Explanation:

To track Overall Equipment Effectiveness (OEE) in real-time, Oracle Manufacturing Cloud can integrate with IoT solutions. The correct setup involves:

* Enabling IoT Production Monitoring and turning on synchronization to IoT Production Monitoring in the Inventory Organization . This allows real-time data from the shop floor to be captured, processed, and used to monitor equipment effectiveness, performance, and availability.

Incorrect options:

* IoT Fleet Monitoring (A) and IoT Asset Monitoring (B, D) focus on tracking assets and fleets, which are more relevant for logistics or asset management, not production monitoring for OEE.

Oracle Cloud documentation on IoT Production Monitoring details how to set up the system to track OEE and integrate production data with IoT capabilities.

NEW QUESTION # 30

.....

We offer 24 - hour, 365 – day online customer service to every user on our 1z0-1075-25 study materials. Our service staff will help you solve the problem about the 1z0-1075-25 training materials with the most professional knowledge and enthusiasm. We believe that can completely dispel your worries on 1z0-1075-25 Exam Braindumps. So please feel free to contact us if you have any trouble on our 1z0-1075-25 practice questions.
