

Chrome-Enterprise-Administrator Valid Mock Test - Chrome-Enterprise-Administrator Valid Exam Review

What's more, part of that LatestCram Chrome-Enterprise-Administrator dumps now are free: https://drive.google.com/open?id=1OK7b0GK-6RwqOmTIp_IVgHy8BWsjDF5X

The most important feature of the online version of our Chrome-Enterprise-Administrator learning materials are practicality. The online version is open to all electronic devices, which will allow your device to have common browser functionality so that you can open our products. At the same time, our online version of the Chrome-Enterprise-Administrator Learning Materials can also be implemented offline, which is a big advantage that many of the same educational products are not able to do on the market at present.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 2	<ul style="list-style-type: none"> Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 3	<ul style="list-style-type: none"> Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 4	<ul style="list-style-type: none"> Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.
Topic 5	<ul style="list-style-type: none"> Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.

Chrome-Enterprise-Administrator Valid Exam Review & Chrome-Enterprise-Administrator Exam Syllabus

If you ask me why other site sell cheaper than your LatestCram site, I just want to ask you whether you regard the quality of Chrome-Enterprise-Administrator exam bootcamp PDF as the most important or not. Sometime I even don't want to explain too much. Sometime low-price site sell old version but we sell new updated version. If you want to get the old version of Chrome-Enterprise-Administrator Exam Bootcamp PDF as practice materials, you purchase our new version we can send you old version free of charge, if this Google Chrome-Enterprise-Administrator exam has old version.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q21-Q26):

NEW QUESTION # 21

A company is managing browsers in the Google Admin console Security has scanned extensions in the organization and has determined that there are several extensions installed with ability to set proxy This violates company policy How would an administrator block these extensions'?

- A. Remotely connect to each device and delete the extension from the browser
- B. Send an email to the users notifying them that they must uninstall the detected extensions
- C. Set policy in the Google Admin console to block all extensions from being installed on the browser
- D. Set permission policy in the Google Admin console to block such extensions

Answer: D

Explanation:

The Google Admin console allows administrators to control extension permissions. By configuring the "Permissions and URL access" policy, the administrator can block extensions that request specific permissions, such as the ability to set a proxy. This is a centralized and effective way to enforce the security policy. Remotely connecting to each device (option B) is not scalable. Blocking all extensions (option C) might be too restrictive. Relying on users to uninstall (option D) is not enforceable.

NEW QUESTION # 22

A company has multiple departments, including Engineering, Marketing, Sales, and HR. Each department has different needs and schedules for Chrome updates. For instance, the Engineering team requires the latest updates as soon as they are available to ensure they have the latest features and security patches. However, the HR department prefers a more stable environment and only wants updates after they have been thoroughly tested.

Which feature in the Google Admin console can an administrator use to meet the company's requirements?

- A. Set device policies for each department
- B. Create different user groups for each department
- C. Create active directory forest for each department
- D. Create organizational units for each department

Answer: D

Explanation:

Organizational Units (OUs) in the Google Admin console allow administrators to apply different Chrome policies to different groups of devices or users based on their organizational structure. By creating separate OUs for Engineering and HR (and potentially other departments), the administrator can configure different Chrome update policies for each OU, ensuring Engineering gets rapid updates while HR stays on a more stable release. User groups primarily manage access to services, and device policies are generally applied at the device level, not necessarily tied to departmental needs for update cadences. Active Directory forests are a Microsoft concept and not directly used for managing Chrome update policies in the Google Admin console.

NEW QUESTION # 23

Which operating system must be used to self-host a Chrome extension*?

- A. ChromeOS
- B. Windows 11
- C. macOS
- **D. Linux**

Answer: D

Explanation:

While the provided study guide doesn't explicitly detail the OS requirements for self-hosting Chrome extensions, general web hosting best practices suggest that Linux is a common and robust platform for serving files and managing web-related services. Its open-source nature, command-line interface, and extensive server software support make it well-suited for self-hosting compared to desktop-centric operating systems like Windows 11 or macOS, and the client-focused ChromeOS. Self-hosting typically involves setting up a web server to distribute the extension files, a task commonly performed on Linux servers.

NEW QUESTION # 24

When a Chrome browser under cloud management goes to a potentially risky website, that action is logged in the Audit and Investigation Report as what type of event?"

- A. Site Isolation Violation
- **B. Site Warning Unsafe Site Visit**
- C. Untrusted Site Visit
- D. SSL Error

Answer: B

Explanation:

When Chrome's Safe Browsing feature identifies a website as potentially risky and displays a warning page that the user might bypass to visit the site, this interaction is typically logged in the Audit and Investigation Report as a "Site Warning Unsafe Site Visit" event. This allows administrators to track instances where users might be exposed to potentially malicious content despite browser warnings. SSL errors relate to certificate issues, untrusted site visit is a more general term, and site isolation violation refers to a different security mechanism.

NEW QUESTION # 25

A Chrome administrator is trying to apply a new policy to the Finance organizational unit (OU) in the Google Admin console, but some managed browsers in the Finance OU display an unexpected policy value. What could be causing the discrepancy in policy value for the affected managed browsers?"

- A. Another OU at the same hierarchical level as the Finance OU has the same policy configured with a different value
- B. The Finance OU has Inheritance for the policy set to 'Locally applied'
- **C. A user group has the same policy configured with a different value**
- D. A sub-OU under the Finance OU has Inheritance for the same policy set to 'Finance'

Answer: C

Explanation:

Policy conflicts can arise if the same policy is configured at multiple levels with different values. User group policies have a higher precedence than OU policies. Therefore, if a user within the Finance OU is also a member of a group with a conflicting policy setting, the group policy will override the OU policy. Policies at the same hierarchical level do not typically conflict in this way. If the Finance OU has "Locally applied," it would mean it's not inheriting, but it wouldn't explain a *discrepancy* within the OU itself unless multiple local settings were applied. A sub-OU inheriting from Finance wouldn't cause a discrepancy at the Finance OU level.

NEW QUESTION # 26

.....

we can promise that our Chrome-Enterprise-Administrator study materials will be the best study materials in the world with the high pass rate as 98% to 100%. All these achievements are due to the reason that our Chrome-Enterprise-Administrator exam questions have a high quality that is unique in the market. If you decide to buy our Chrome-Enterprise-Administrator training dumps, we can make sure that you will have the opportunity to enjoy the Chrome-Enterprise-Administrator practice engine from team of experts.
