Salesforce B2B Commerce for Developers Accredited Professional Sample Questions (Q220-Q225):

NEW QUESTION # 220
Where are handlebar Templates defined in the Cloudcraze managed package?

- A. uiProperties file
- B. Configuration Setting configuration
- C. Page Settings configuration
- D. cc_hk_UserInterface extension

Answer: A

Explanation:
Handlebar Templates are defined in the uiProperties file in the cloudcraze managed package. This file contains various properties that control the behavior and appearance of the user interface components. The handlebarTemplates property defines a map of template names and template contents that are used by the handlebars.js templating engine to generate HTML from JSON data. Salesforce B2B Commerce and D2C Commerce Developer Guide,UI Properties,Handlebars Templates

NEW QUESTION # 221
Which format is the custom Salesforce field with the API name
"My_Fiels_Name__c" transformed onto by default in Salesforce B2B Commerce?

- A. myfieldname
- B. MyFieldName
- C. My_Field_Name__c
- D. myFieldName

Answer: D

Explanation:
The format that the custom Salesforce field with the API name My_Field_Name__c is transformed onto by default in Salesforce B2B Commerce is myFieldName. This is done to follow the JavaScript naming convention and to avoid conflicts with the standard Salesforce fields and relationships. The transformation rules are as follows:
Remove any namespace prefix from the field name, such as ccrz__ or cloudcraze__.
Remove any underscores from the field name and capitalize the first letter of each word after an underscore, such as MyFieldName.
Lowercase the first letter of the field name, such as myFieldName. Salesforce B2B Commerce and D2C Commerce Developer Guide,Query Transformation

NEW QUESTION # 222
Which HTML element can be used as a root tag for a Lightning Web Component's HTML file?

- A. <body>
- B. <template>
- C. <html>
- D. <article>

Answer: B

Explanation:
In Lightning Web Components (LWC), the root tag for the component's HTML file must be <template>. This tag defines the markup structure for the component and is essential for the LWC framework to correctly render the component in the Salesforce Lightning Experience. The <template> tag is unique to LWC and is not interchangeable with standard HTML tags like <body>, <article>, or <html>. For more information, see the Salesforce LWC documentation: Salesforce LWC HTML Templates Documentation.

NEW QUESTION # 223
What is a valid way of referencing the CC Cart Object whose API name is E_Cart__c in a SOQL query?

- A. _Cart__c
- B. c.E_Cart__c
- C. ccrz__E_Cart__c
- D. cloudcraze__E_Cart__c

Answer: C

Explanation:
A valid way of referencing the CC Cart Object whose API name is E_Cart__c in a SOQL query is to use ccrz__E_Cart__c. This is the transformed name of the object that is used by the Salesforce B2B Commerce framework. All custom objects and fields that are part of the cloudcraze managed package have the prefix ccrz__ in their API names. For example,SELECT Id, Name FROM ccrz__E_Cart__cwill query the CC Cart Object records. Salesforce B2B Commerce and D2C Commerce Developer Guide,Query Transformation

NEW QUESTION # 224
What are three ways to implement custom post Order processing? (3 answers)

- A. Use a Salesforce workflow rule that executes when an Order record is created.
- B. Use Process builder to implement business processes that execute when an Order record is created.
- C. Use cc_hk_Order.placeTarget to define a new Order Confirmation page which executes additional business logic.
- D. Extend cc_hk_invoice tohandle custom business logic post Order processing
- E. Modify or add custom Cart formula fields to handle logic.

Answer: B,C,D

Explanation:
Three ways to implement custom post Order processing are:
Extend cc_hk_invoice to handle custom business logic post Order processing. This hook allows modifying the invoice data or performing additional actions after an Order is placed. For example, the hook can send an email notification or update a custom field on the invoice record.
Use cc_hk_Order.placeTarget to define a new Order Confirmation page which executes additional business logic. This hook allows specifying a custom Visualforce page that will be displayed after an Order is placed. The custom page can include additional business logic or user interface elements.
Use Process Builder to implement business processes that execute when an Order record is created. Process Builder is a tool that allows creating workflows and actions based on criteria and conditions. For example, Process Builder can create a task, send an email, or update a record when an Order record is created. Salesforce B2B Commerce and D2C Commerce Developer Guide,Hooks, Process Builder

NEW QUESTION # 225
......

Once you have selected the AP-202 study materials, please add them to your cart. Then when you finish browsing our web pages, you can directly come to the shopping cart page and submit your orders of the AP-202 study materials. Our payment system will soon start to work. Then certain money will soon be deducted from your credit card to pay for the AP-202 study materials. The whole payment process only lasts a few seconds as long as there has money in your credit card. Then our system will soon deal with your orders according to the sequence of payment. Usually, you will receive the AP-202 Study Materials no more than five minutes. Then you can begin your new learning journey of our study materials. All in all, our payment system and delivery system are highly efficient.
