

# Latest OGEA-101 Dumps Ppt & OGEA-101 Test Questions Fee

Download TOGAF Enterprise OGEA-101 PDF Dumps for Exam Prep

- C. In between phases
- D. Known as "Version 0.1"

**Answer: A**

**Explanation:**

In the ADM documents which are under development and have not undergone any formal review and approval process are called "draft". This indicates that they are subject to change and refinement as the architecture development progresses.

Reference: The TOGAF® Standard | The Open Group Website, Section 4.2.5 Architecture Deliverables.

5. Complete the sentence The TOGAF standard covers the development of four architecture domains: Business, Data, Technology and \_\_\_\_\_.

- A. Segment
- B. Transition
- C. Capability
- D. Application

**Answer: D**

**Explanation:**

The TOGAF standard covers the development of four architecture domains: Business, Data, Technology and Application. These domains represent different aspects of an enterprise's architecture and provide a consistent way of describing, analyzing, and designing them.

Reference: The TOGAF® Standard | The Open Group Website, Section 2.2 Architecture Development Method (ADM).

6. Which of the following are interests important to the stakeholders in a system?

- A. Requirements
- B. Principles
- C. Concerns
- D. Architecture views

**Answer: C**

**Explanation:**

Concerns are interests important to the stakeholders in a system. They are used to identify and classify the system's stakeholders and to guide the selection of viewpoints for the architecture description.

Reference: The TOGAF® Standard | The Open Group Website, Section 3.2.1 Architecture Viewpoints

7. What is an objective of the ADM Implementation Governance Phase?

- A. To provide continual monitoring of the governance framework
- B. To ensure conformance for the target architecture
- C. To finalize the Implementation and Migration Plan
- D. To establish the resources for architecture governance

**Answer: B**

**Explanation:**

The objective of the ADM Implementation Governance Phase is to provide an architectural oversight of the implementation and to ensure conformance for the target architecture. This phase involves establishing procedures and processes to monitor and control the implementation projects and to verify

Just like the old saying goes, motivation is what gets you started, and habit is what keeps you going. A good habit, especially a good study habit, will have an inestimable effect in help you gain the success. The OGEA-101 exam prep from our company will offer the help for you to develop your good study habits. If you buy and use our study materials, you will cultivate a good habit in study. More importantly, the good habits will help you find the scientific prop learning methods and promote you study efficiency, and then it will be conducive to helping you pass the OGEA-101 Exam in a short time. So hurry to buy the OGEA-101 test guide from our company, you will benefit a lot from it.

## The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>• ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Architecture Content Framework: Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Architecture Governance: This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Business Architecture: This topic of The Open Group OGEA-101 Exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam.</li> </ul>

## OGEA-101 Test Questions Fee & OGEA-101 Best Practice

In order to get timely assistance when you encounter problems, our staff will be online 24 hours a day. Regardless of the problem you encountered during the use of OGEA-101 guide materials, you can send us an email or contact our online customer service. As for the technical issues you are worried about on the OGEA-101 Exam Questions, we will also provide professional personnel to assist you remotely. And if you have any problem on our OGEA-101 learning guide, you can contact with us via email or online.

### The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q152-Q157):

#### NEW QUESTION # 152

Consider the illustration.

What are the items labelled A, B and C?

- A. A-Enterprise Strategic Architecture, B-Segment Architecture, C-Solutions Architecture
- **B. A-Enterprise Continuum, B-Architecture Continuum, C-Solutions Continuum**
- C. A-Architecture Vision, B-Business Architecture, C-Information Systems Architecture
- D. A-Enterprise Architecture, B-Architecture Building Blocks, C-Solutions Building Blocks

**Answer: B**

Explanation:

The illustration shows the relationship between the Enterprise Continuum, the Architecture Continuum, and the Solutions Continuum, which are key concepts in the TOGAF framework. The Enterprise Continuum is a view of the Architecture Repository that shows how generic foundation architectures can be leveraged and specialized to support the requirements of an individual organization. The Architecture Continuum specifies a structured classification for architectural artifacts, such as models, patterns, and descriptions, that can be reused and adapted across different domains and levels of abstraction. The Solutions Continuum identifies implemented solutions that support various stages of business and IT capability evolution, such as common systems, industry solutions, and organization-specific solutions. The illustration also shows how the architecture context and requirements are influenced by external factors, such as business drivers, stakeholders, and standards, and how they shape the generic and specific architectures and solutions. The illustration also shows how the deployed solutions become part of the architecture context for future iterations of the architecture development cycle. References:

### NEW QUESTION # 153

In the ADM, what is the name for a document deliverable that has completed a review and is approved?

- A. version 0.9
- **B. final**
- C. approved
- D. ratified

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation

In the TOGAF ADM, deliverables go through a lifecycle of development, review, approval, and usage.

TOGAF distinguishes between draft deliverables (work-in-progress) and final deliverables (those that have been formally reviewed and signed off).

\* Draft deliverables are produced as working versions of the required outputs in each ADM phase. These may carry version labels such as 0.1, 0.5, 0.9, etc., and are subject to stakeholder review and refinement.

\* Once the document has been reviewed and approved by the relevant stakeholders (e.g., Architecture Board, governance bodies), it becomes a final deliverable.

\* Final deliverables are baseline-controlled items and are formally stored in the Architecture Repository as an approved architecture artifact.

Thus, the correct term for a deliverable that has completed review and is approved is "final".

Why the other options are incorrect

\* B. Approved: While true in general language, TOGAF uses the formal term "final deliverable", not "approved deliverable."

\* C. Ratified: This term is not used in TOGAF to describe the state of a deliverable.

\* D. Version 0.9: This is a draft numbering convention, not the status of an approved deliverable.

References

\* The Open Group, TOGAF Standard, Version 9.2, Part II: ADM - description of deliverables, artifacts, and building blocks.

\* The Open Group, TOGAF 9 Certified Study Guide - explanation of draft vs. final deliverables in the ADM lifecycle.

#### NEW QUESTION # 154

Refer to the table below:

Phase	Output & Outcome	Essential Knowledge
?	A set of work packages that address the set of gaps, with an indication of value produced and effort required, and dependencies between the work packages to reach the adjusted target.	Dependency between the set of changes. (Work Package & Gap dependency) Value, effort, and risk associated with each change and work package. How stakeholder priority and preference adjust in response to value, effort, and risk of change.

Which ADM Phase(s) does this describe?

- A. Phase F
- B. Phase A
- C. Phase E
- D. Phase B, C and D

**Answer: A**

#### NEW QUESTION # 155

What structural framework does the TOGAF Standard define to support the management, leverage, and storage of architectural work products?

- A. The Architecture Repository
- B. The Enterprise Architecture Capability Model
- C. The Architecture Landscape
- D. The Architecture Capability

**Answer: A**

Explanation:

\* The Architecture Repository is the structural framework defined by TOGAF to store, manage, and leverage architecture artifacts, including reference models, standards, governance logs, and deliverables.

\* The Architecture Capability refers to governance and processes.

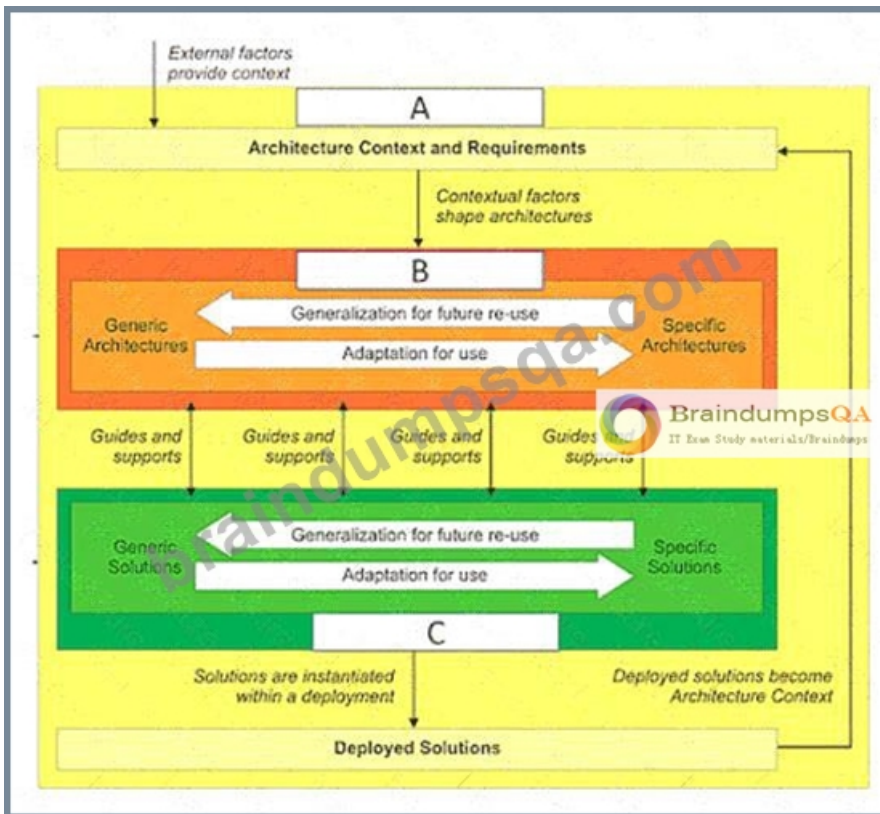

\* The Architecture Landscape shows Strategic, Segment, and Capability architectures, not storage.

\* The Enterprise Architecture Capability Model is not a defined TOGAF concept.

Reference: TOGAF Standard, Version 9.2, Part V: Enterprise Continuum and Tools - Architecture Repository.

#### NEW QUESTION # 156

Consider the illustration.

What are the items labelled A, B and C?

- A. A-Enterprise Strategic Architecture, B-Segment Architecture, C-Solutions Architecture
- **B. A-Enterprise Continuum, B-Architecture Continuum, C-Solutions Continuum**
- C. A-Architecture Vision, B-Business Architecture, C-Information Systems Architecture
- D. A-Enterprise Architecture, B-Architecture Building Blocks, C-Solutions Building Blocks

**Answer: B**

Explanation:

The illustration shows the relationship between the Enterprise Continuum, the Architecture Continuum, and the Solutions Continuum, which are key concepts in the TOGAF framework. The Enterprise Continuum is a view of the Architecture Repository that shows how generic foundation architectures can be leveraged and specialized to support the requirements of an individual organization. The Architecture Continuum specifies a structured classification for architectural artifacts, such as models, patterns, and descriptions, that can be reused and adapted across different domains and levels of abstraction. The Solutions Continuum identifies implemented solutions that support various stages of business and IT capability evolution, such as common systems, industry solutions, and organization-specific solutions. The illustration also shows how the architecture context and requirements are influenced by external factors, such as business drivers, stakeholders, and standards, and how they shape the generic and specific architectures and solutions. The illustration also shows how the deployed solutions become part of the architecture context for future iterations of the architecture development cycle. References:
