

Pass Guaranteed Quiz 2026 Latest Cisco 300-540: Training Designing and Implementing Cisco Service Provider Cloud Network Infrastructure For Exam

P.S. Free & New 300-540 dumps are available on Google Drive shared by PrepAwayExam: <https://drive.google.com/open?id=1TRs5TeTkAhUht-4P30CHWY1kY7Fs0QLv>

We can promise that you would like to welcome this opportunity to kill two birds with one stone. If you choose our 300-540 test questions as your study tool, you will be glad to study for your exam and develop self-discipline, our 300-540 latest question adopt diversified teaching methods, and we can sure that you will have passion to learn by our 300-540 learning braindump. We believe that our 300-540 exam questions will help you successfully pass your 300-540 exam and hope you will like our 300-540 practice engine.

Once you establish your grip on our 300-540 exam materials, the real exam questions will be a piece of cake for you. There are three different versions of our 300-540 study questions for you to choose: the PDF, Software and APP online. Though the displays are totally different, the content of the 300-540 Practice Guide is the same. You can pass the exam with no matter whice version you want to buy.

Buy Today and Save Money with Free Cisco 300-540 Questions Updates

The study system of our company will provide all customers with the best study materials. If you buy the 300-540 latest questions of our company, you will have the right to enjoy all the 300-540 certification training dumps from our company. More importantly, there are a lot of experts in our company; the first duty of these experts is to update the study system of our company day and night for all customers. By updating the study system of the 300-540 training materials, we can guarantee that our company can provide the newest information about the exam for all people. We believe that getting the newest information about the exam will help all customers pass the 300-540 Exam easily. If you purchase our study materials, you will have the opportunity to get the newest information about the 300-540 exam. More importantly, the updating system of our company is free for all customers. It means that you can enjoy the updating system of our company for free.

Cisco 300-540 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Cloud Interconnect: This section of the exam measures the skills of Service Provider Network Engineers and covers how large networks interconnect with cloud platforms and carrier-neutral facilities. Candidates are expected to understand various connectivity options to cloud providers, customer sites, and other neutral facilities, as well as evaluate WAN connectivity models such as direct connect, MPLS or segment routing, and IPsec VPN links. The domain also includes the ability to troubleshoot advanced data center interconnect solutions, including EVPN VXLAN, EVPN over SR• MPLS, ACI-based connectivity, and pseudowire architectures supporting cloud-to-cloud and cloud-to-edge communication.
Topic 2	<ul style="list-style-type: none">• Virtualized Architecture: This section of the exam measures the skills of Cloud Network Engineers and covers the foundational concepts of virtualized infrastructures used in modern service provider and cloud environments. Candidates are expected to understand constraints in IaaS designs, determine appropriate cloud service models, and demonstrate awareness of container orchestration compared to traditional virtual machines. The exam also evaluates the ability to implement key virtualization functions such as NFV, VNF, NSO, and virtualized Cisco platforms. Learners must be able to deploy NFV with automation tools, manage VNF onboarding, work with NSO-driven orchestration, and use protocols like NETCONF, RESTCONF, REST APIs, and gNMI within automated cloud ecosystems. A general understanding of supporting platforms such as OpenStack also forms part of the required knowledge in this domain.
Topic 3	<ul style="list-style-type: none">• High Availability: This section of the exam measures the skills of Cloud Infrastructure Architects and covers the design and implementation of redundancy and resiliency mechanisms in virtualized network functions and distributed cloud platforms. It includes data plane redundancy for VNFs, high availability within a single VIM control plane, and resilient compute, vNIC, and top-of-rack switching. The exam requires an understanding of multi-homing, EVLAG configurations, virtual private cloud deployment, and ECMP strategies for NFVI integrations with physical routing protocols such as BGP, OSPF, and IS-IS. Candidates must also recommend suitable high-availability models involving DNS, routing, and load balancing.
Topic 4	<ul style="list-style-type: none">• Security: This section of the exam measures the skills of Network Security Engineers and covers the implementation of infrastructure-level protection in cloud and NFVI ecosystems. It includes topics such as ACLs, uRPF, RTBH, router hardening, BGP flowspec, TACACS, and MACSEC. Candidates should understand DoS mitigation methods and apply security practices within NFVI, focusing on API protection, securing the control and management plane, and segmentation strategies in service provider cloud environments. The domain also evaluates basic knowledge of TLS, mTLS, and general cloud security solutions related to DNS protection, zero-day defenses, and malware detection.
Topic 5	<ul style="list-style-type: none">• Service Assurance and Optimization: This section of the exam measures the skills of Cloud Operations Engineers and covers assurance mechanisms used to maintain performance, stability, and visibility across NFVI environments. It includes network assurance concepts such as MANO frameworks, VNF workload monitoring, VIM control plane KPIs, and streaming telemetry with gRPC and gNMI. Candidates must understand cloud infrastructure performance monitoring tools, including SR-PM, NetFlow, IPFIX, syslog, SNMP traps, RMON, cloud agents, and automated fault management systems. The domain also touches on diagnosing NFVI-related errors and optimizing VNFs using techniques such as SR-IOV and software-accelerated virtual switching technologies like DPDK and VPP.

Cisco Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Sample Questions (Q86-Q91):

NEW QUESTION # 86

Secure NFVI control and management plane involves:

- A. Public internet access
- B. Removing all passwords
- C. Unrestricted API access

- **D. Authentication and encryption**

Answer: D

NEW QUESTION # 87

To secure API communication, it is essential to implement:

- **A. Rate limiting and authentication**
- B. Public API keys only
- C. Unencrypted data exchange
- D. Unrestricted access policies

Answer: A

NEW QUESTION # 88

SR-PM is related to:

- A. Storage replication performance management
- B. Security risk performance management
- C. Software redundancy performance metrics
- **D. Segment routing performance monitoring**

Answer: D

NEW QUESTION # 89

FaaS is an ideal cloud service model for:

- A. Data-intensive, long-running processes
- **B. Event-driven, short-lived microservices**
- C. Applications requiring extensive customization of the underlying OS
- D. Large, monolithic applications

Answer: B

NEW QUESTION # 90

The implementation of _____ in high availability designs helps to manage traffic flow and prevent overloads.

- **A. load balancers**
- B. firewalls
- C. routing protocols
- D. DNS

Answer: A

NEW QUESTION # 91

.....

The free demo Cisco 300-540 exam questions are available for instant download. Download the Cisco Certification Exams dumps demo free of cost and explores the top features of Designing and Implementing Cisco Service Provider Cloud Network Infrastructure (300-540) exam questions and if you feel that the 300-540 exam questions can be helpful in Cisco 300-540 exam preparation then take your buying decision. Best of luck!!!
