BIO 182 - Exam 1 Review Questions With 100% Correct Answers 2024

Mendel's principle of independent assortment corresponds to which part of meiosis? - answer✓✓random alignment of homologs on the metaphase plate during metaphase I

Alleles - answer✓✓Alternate forms of a gene

Males inherit X chromosome from what parent? - answer✓✓Mother

Men give X chromosome to what gender children? - answer✓✓Girls/daughters

Law of Segregation - answer✓✓Mendel's law that states that the pairs of homologous chromosomes separate in meiosis so that only one chromosome from each pair is present in each gamete

Law of Dominance - answer✓✓recessive alleles will always be masked by dominant alleles

law of independent assortment - answer✓✓Each member of a pair of homologous chromosomes separates independently of the members of other pairs so the results are random

genes on different chromosomes are inherited - answer✓✓independently

Hardy-Weinberg equilibrium - answer✓✓The condition describing a non-evolving population (one that is in genetic equilibrium).

bottleneck effect - answer✓✓genetic drift. surviving organisms of disaster may not represent the entire original population, but may change alleles in the new population.

founder effect - answer✓✓organisms arriving in a new area to start a new population may not represent original population they came from because the initial sample is random.

gene flow - answer✓✓Movement of alleles into or out of a population due to the migration of individuals to or from the population

sexual selection - answer✓✓A form of natural selection in which individuals with certain inherited characteristics are more likely than other individuals to obtain mates.

gene pool - answer✓✓all of the alleles in all the individuals that make up a population

modern synthesis - answer✓✓Darwinian evolution + Mendelian genetics

stabilizing selection - answer✓✓selection that favors average phenotypes

Love is precious and the price of freedom is higher. Do you think that learning day and night has deprived you of your freedom? Then let Our 1Z1-182 guide tests free you from the depths of pain. With 1Z1-182 guide tests, learning will no longer be a burden in your life. You can save much time and money to do other things what meaningful. You will no longer feel tired because of your studies, if you decide to choose and practice our 1Z1-182 Test Answers. Your life will be even more exciting.

Oracle 1Z1-182 Exam Syllabus Topics:

Topic	Details
Topic 1	Managing Users, Roles, and Privileges: This domain evaluates the expertise of Security Administrators in implementing user security measures. It focuses on creating and managing users, roles, and privileges to ensure secure access to Oracle databases.
Topic 2	Managing Undo: This domain measures the skills of Database Administrators in using undo data effectively. It compares undo data with redo data and explains temporary undo usage for efficient transaction management.

Topic 3	Automated Maintenance: This section measures the skills of Database Administrators in describing automated maintenance tasks within Oracle databases. It focuses on applying automated features to streamline routine maintenance activities.
Topic 4	Introduction to Auditing: This domain tests the abilities of Compliance Specialists in implementing database auditing practices. It includes creating, modifying, and maintaining auditing policies while applying value-based auditing techniques like Fine-Grained Auditing (FGA).
Topic 5	Managing Tablespaces and Datafiles: This section assesses the abilities of Storage Administrators in creating, modifying, and describing tablespaces. It also covers recognizing data storage requirements and understanding datafile placement for efficient storage management.
Topic 6	Configuring Oracle Net Services: This section measures the skills of Network Administrators and Database Administrators in configuring Oracle Net Services. It includes identifying administration components, describing connection methods, and ensuring seamless communication between clients and databases.

Pass Guaranteed 2026 Oracle 1Z1-182 –Accurate Latest Exam Review

Since the content of the examination is also updating daily, you will need real and latest Oracle 1Z1-182 Exam Dumps to prepare successfully for the 1Z1-182 certification exam in a short time. People who don't study from updated Oracle Database 23ai Administration Associate (1Z1-182) questions fail the examination and loss time and money.

Oracle Database 23ai Administration Associate Sample Questions (Q65-Q70):

NEW QUESTION # 65

How do you validate that the database was migrated to Unified Auditing?

- A. By executing DBMS_AUDIT_MGMT PL/SQL package in Verify mode.
- B. By using the LSINVENTORY Command to query the Oracle Database Software Library.
- C. By querying the DBA_UNIFIED_AUDIT_OPTION view.
- D. By querying V\$OPTION for parameter Unified Auditing.

Answer: D

Explanation:

Unified Auditing is enabled at database creation or migration in 23ai. Let's analyze:

A . By querying V\$OPTION for parameter Unified Auditing.

True. SELECT VALUE FROM V\$OPTION WHERE PARAMETER = 'Unified Auditing'; returns TRUE if enabled. It's the definitive way to confirm Unified Auditing is active at the database level.

Mechanics:V\$OPTION reflects compiled-in features; TRUE indicates the binary was linked with Unified Auditing (uniaudit=on during relink).

Practical Use:Quick, reliable check post-migration or upgrade.

B . By using the LSINVENTORY Command to query the Oracle Database Software Library.

False. LSINVENTORY (from OPatch) lists installed software components, not runtime features like auditing mode.

C . By querying the DBA_UNIFIED_AUDIT_OPTION view.

False. This view doesn't exist; DBA_AUDIT_POLICIES or UNIFIED_AUDIT_TRAIL show policies and records but not migration status.

D . By executing DBMS_AUDIT_MGMT PL/SQL package in Verify mode.

False. No "Verify mode" exists in DBMS_AUDIT_MGMT; it manages audit trails, not migration validation.

NEW QUESTION # 66

Which two tasks can be performed in the NOMOUNT state?

- A. Full database recovery.
- **B. Creating a database.**
- **C. Re-creating control files.**
- D. Renaming data files.
- E. Enabling online redo log archiving.

Answer: B,C

Explanation:

- A .False. Requires MOUNT to access data files.
- B .False. Requires MOUNT for redo logs.
- C .True. CREATE DATABASE runs in NOMOUNT.
- D .True. CREATE CONTROLFILE is possible.
- E .False. Recovery needs MOUNT or OPEN.

NEW QUESTION # 67

You want to view the initialization parameter settings for only a specific PDB. Which of the following statements is true?

- A. From the CDB root, execute `SELECT NAME, VALUE, ISPDB_MODIFIABLE FROM v$parameter;`
- B. From the PDB, execute `SELECT db_uniq_name, pdb_uid, name, value$ FROM pdb_spfile$;`
- C. From the CDB root, execute `SELECT db_uniq_name, pdb_uid, name, value$ FROM pdb_spfiles;`
- **D. From the PDB, execute `SELECT NAME, VALUE, ISPDB_MODIFIABLE FROM v$parameter;`**

Answer: D

Explanation:

- A .Incorrect syntax and view (pdb_spfile\$ is not a valid view; PDB_SPFILES\$ exists but lacks value\$).
- B .From CDB root, V\$PARAMETER shows all parameters, not PDB-specific ones.
- C .pdb_spfiles is not a valid view; PDB_SPFILES\$ exists but requires scoping to a PDB.
- D .True. From the PDB, V\$PARAMETER shows parameters specific to that PDB, including inherited and PDB-modified values, with ISPDB_MODIFIABLE indicating alterability.

NEW QUESTION # 68

Which two statements are true about the DUAL table?

- A. It can display multiple rows but only a single column.
- B. It can display multiple rows and columns.
- C. It can be used to display only constants or pseudo columns.
- D. It can be accessed only by the SYS user.
- **E. It consists of a single row and single column of VARCHAR2 data type.**
- **F. It can be accessed by any user who has the SELECT privilege in any schema.**

Answer: E,F

Explanation:

- A .True. DUAL is public; any user with SELECT can query it.
- B .True. One row, one VARCHAR2 column (DUMMY).
- C .False. Fixed at one row.
- D .False. Not restricted to SYS.
- E .False. One row, one column only.
- F .False. Can return expressions, not just constants.

NEW QUESTION # 69

Which of the following is true about the status of a PDB that has been unplugged from a CDB?

- A. The STATUS column in CDB_PDBS of the unplugged PDB will be DISABLED.
- B. The STATUS column in CDB_PDBS of the unplugged PDB will be REMOVED.
- **C. The STATUS column in CDB_PDBS of the unplugged PDB will be UNPLUGGED.**
