

OGEA-101 Valid Exam Notes | Valid Exam OGEA-101 Braindumps

110-1 **1-6-1-9, 2-1-2-3 & 2-5**
Part 1: Multiple Choice (2% x 10 = 20%)
Ex:
() 1. Kareem let his forest _____ naturally, without using fertilizers or insecticides.
(A) to grow (B) grew (C) growing (D) grow

() 2. It _____ a long time to come up with a solution to the town's flooding problem. (A)
spent (B) cost (C) took (D) get

Part 2: Translation and Writing (8% x 10 = 80%)
Ex:
1. Ashley

Our company constantly increases the capital investment on the research and innovation of our OGEA-101 study materials and expands the influences of our study materials in the domestic and international market. Because the high quality and passing rate of our OGEA-101 study materials more than 90 percent that clients choose to buy our study materials when they prepare for the test OGEA-101 Certification. We have established a good reputation among the industry and the constantly-enlarged client base. Our sales volume and income are constantly increasing and the clients' credibility towards our OGEA-101 study materials stay high.

The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.
Topic 2	<ul style="list-style-type: none">Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.

Topic 3	<ul style="list-style-type: none"> • Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.
Topic 4	<ul style="list-style-type: none"> • Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.
Topic 5	<ul style="list-style-type: none"> • Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 Exam.
Topic 6	<ul style="list-style-type: none"> • Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.
Topic 7	<ul style="list-style-type: none"> • ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.

Valid Exam OGEA-101 Braindumps - Valid OGEA-101 Test Simulator

It is a popular belief that only professional experts can be the leading one to do some adept job. And similarly, only high quality and high accuracy OGEA-101 exam questions like ours can give you confidence and reliable backup to get the certificate smoothly because our experts have extracted the most frequent-tested points for your reference. Our OGEA-101 exam questions generally raised the standard of practice materials in the market with the spreading of higher standard of knowledge in this area. So your personal effort is brilliant but insufficient to pass the TOGAF Enterprise Architecture Part 1 Exam exam and our OGEA-101 Test Guide can facilitate the process smoothly & successfully. Our TOGAF Enterprise Architecture Part 1 Exam practice materials are successful by ensuring that what we delivered is valuable and in line with the syllabus of this exam.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q73-Q78):

NEW QUESTION # 73

In the ADM, what is the name for documents that are not finished and not approved?

- A. incomplete
- B. version 0.1
- **C. draft**
- D. interim

Answer: C

Explanation:

* In TOGAF, draft deliverables are those that are not yet finished or approved. They are work-in- progress versions that may have version numbers like 0.1, 0.5, or 0.9.

* Once reviewed and approved, they become final deliverables.

Reference: TOGAF Standard, Version 9.2, Deliverables, Artifacts, and Building Blocks.

NEW QUESTION # 74

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission

The joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture.

A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle

A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.

Which deliverables match these descriptions?

- A. 1 Architecture Principles - 2 Architecture Contracts - 3 Request for Architecture Work - 4 Architecture Requirements Specification
- B. 1 Architecture Requirements Specification - 2 Architecture Principles - 3 Architecture Vision - 4 Architecture Contracts
- C. 1 Architecture Principles - 2 Architecture Contracts - 3 Architecture Requirements Specification - 4 Request for Architecture Work Explanation:
- D. 1 Architecture Contracts - 2 Architecture Requirements Specification - 3 Architecture Vision - 4 Architecture Principles

Answer: A

Explanation:

According to the TOGAF standard, the deliverables that match the descriptions are as follows:

1 Architecture Principles: These are general rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission¹. They reflect a level of consensus among the various elements of the enterprise, and form the basis for making future IT decisions¹.

2 Architecture Contracts: These are the joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture². They are used to ensure that the architecture is implemented and governed according to the agreed-upon specifications and standards².

3 Request for Architecture Work: This is a document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle³. It defines the scope, schedule, budget, deliverables, and stakeholders of the architecture project³.

4 Architecture Requirements Specification: This is a set of quantitative statements that outline what an implementation project must do in order to comply with the architecture⁴. It defines the requirements for each architecture domain, as well as the relationships and dependencies among them⁴.

1: Architecture Principles 2: Architecture Contracts 3: Request for Architecture Work 4: Architecture Requirements Specification

NEW QUESTION # 75

Which statement about Requirements Management is most correct?

- A. Stakeholder requirements are captured once in Phase A and managed throughout the ADM cycle
- B. Requirements Management is a step of all ADM Phases
- C. The purpose of Requirements Management is to process change requests
- D. Requirements Management and stakeholder engagement are placed at the center of architecture development

Answer: D

Explanation:

This statement about Requirements Management is most correct because it reflects the central role of Requirements Management and stakeholder engagement in the ADM cycle. Requirements Management is not a step of all ADM Phases, but rather an ongoing process that ensures that all relevant requirements are elicited, analyzed, prioritized, and addressed throughout the architecture development and transition. Stakeholder engagement is also a continuous activity that involves identifying, communicating, and managing stakeholder expectations and concerns. Reference: The TOGAF Standard | The Open Group Website, Section 3.1 Introduction to the ADM.

NEW QUESTION # 76

Consider the following ADM phases objectives.

Objective

1- Determine whether an incremental approach is required, and if so identify Transition Architectures that will deliver continuous

business value

2- Generate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D

3- Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan

4- Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders Which phase does each objective match?

- A. 1F-2E-3F-4G
- B. 1E-2E-3F-4F
- **C. 1G-2E-3F-4F**
- D. 1E-2F-3E-4F

Answer: C

Explanation:

According to the TOGAF standard, the objectives of each ADM phase are as follows1:

* Phase E: Opportunities and Solutions

o Determine whether an incremental approach is required, and if so identify Transition Architectures that will deliver continuous business value
o Identify and group major work packages within the Architecture Roadmap
o Identify and group major implementation projects to realize the Architecture Roadmap
o Identify dependencies between increments and projects
o Estimate cost, benefit, and risk at a high level for each increment and project
o Conduct initial prioritization and sequencing of the Architecture Roadmap and projects

* Phase F: Migration Planning

o Generate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D
o Confirm the Transition Architectures with relevant stakeholders
o Create the Implementation and Migration Plan, including Transition Architectures, work packages, projects, and other activities
o Confirm and agree the Architecture Roadmap and Implementation and Migration Plan with relevant stakeholders

* Phase G: Implementation Governance

o Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan
o Ensure conformance with the Target Architecture by implementation projects
o Perform appropriate Architecture Governance functions for the solution and any implementation-driven architecture Change Requests
o Ensure that the architecture lifecycle is maintained
o Ensure that the Architecture Governance Framework is executed

* Phase H: Architecture Change Management

o Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
o Manage risks and issues related to the Architecture Roadmap and Implementation and Migration Plan
o Monitor the implementation projects and Transition Architectures
o Manage changes to the architecture baseline
o Manage changes to the Architecture Capability
Therefore, the correct matching of the objectives and the phases is:

* 1G: Determine whether an incremental approach is required, and if so identify Transition Architectures that will deliver continuous business value

* 2E: Generate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D

* 3F: Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan

* 4F: Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders

NEW QUESTION # 77

Which ADM phase focuses on defining the problem to be solved, identifying the stakeholders, their concerns, and requirements?

- **A. Phase A**
- B. Phase
- C. Phase
- D. Preliminary Phase

Answer: A

Explanation:

Phase A: Architecture Vision is the first phase of the Architecture Development Method (ADM) cycle, which is the core of the TOGAF standard. The main purpose of this phase is to define the scope and approach of the architecture development, and to create the Architecture Vision, which is a high-level description of the desired outcomes and benefits of the proposed architecture. To achieve this purpose, this phase focuses on defining the problem to be solved, identifying the stakeholders, their concerns, and requirements, and establishing the business goals and drivers that motivate the architecture work. This phase also involves obtaining

the approval and commitment of the sponsors and other key stakeholders, and initiating the Architecture Governance process.

NEW QUESTION # 78

• • • • •

As a customer you will want to choose low-price and high-passing rate products. Sometime it seems paradoxical. But now our The Open Group OGEA-101 exam questions vce will be a nice choice. If you care about price, there are many companies lower than us, if you care about passing rate I am sure there is little companies higher than us. Our OGEA-101 Exam Questions Vce highlight the quality and value for money; it is really worth to buy in this field.
