The page of our product provide the demo and the aim to provide the demo is to let the you understand part of our titles before their purchase and see what form the software is after the you open it. The client can visit the page of our product on the website. So the client can understand our C_S4TM_2023 Quiz torrent well and decide whether to buy our product or not at their wishes. The client can see the forms of the answers and the titles.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q76-Q81):

NEW QUESTION # 76

You need to plan freight units with multiple stages. In which master data object would you define different carriers for the different stages of your freight units?

- A. Default route
- B. Carrier profile
- C. Transportation lane
- D. Schedule

Answer: C

Explanation:

In SAP S/4HANA Transportation Management, to plan freight units with multiple stages and assign different carriers to each stage, you define the carriers in the transportation lane (C). According to the SAP documentation, transportation lanes specify the valid carriers for specific routes or stages, including multi-leg scenarios. By configuring different carriers for each stage within the transportation lane, the system ensures that the appropriate carrier is assigned during planning for each leg of the transport.

The other options are incorrect:

* Schedule (A) defines departure times and carriers for regular transports but is not used for stage-specific carrier assignments in freight units.

* Default route (B) is used for simplified routing but does not support detailed stage-specific carrier assignments.

* Carrier profile (D) contains carrier attributes but does not define stage-specific assignments for freight units.
