

HITRUST CCSFP완벽한덤프공부자료 - CCSFP시험패스가능한인증공부자료

BONUS!!! Pass4Test CCSFP 시험 문제집 전체 버전을 무료로 다운로드하세요: <https://drive.google.com/open?id=1mGfDiTuDWqZX3U4S2a0lAxhHzNhrrKLN>

많은 시간과 정신력을 투자하고 모험으로 HITRUST 인증 CCSFP 시험에 도전하시겠습니까? 아니면 우리 Pass4Test의 도움으로 시간을 절약하시겠습니까? 요즘 같은 시간인 즉 모든 것인 시대에 여러분은 당연히 Pass4Test의 제품이 딱 이라고 생각합니다. 그리고 우리 또한 그 많은 덤프 판매 사이트 중에서도 단연 일등이고 생각합니다. 우리 Pass4Test 선택함으로 여러분은 성공을 선택한 것입니다.

HITRUST CCSFP 덤프에 대한 자신감이 어디서 시작된 것이냐고 물으신다면 HITRUST CCSFP 덤프를 구매하여 시험을 패스한 분들의 회소식에서 온다고 답해드리고 싶습니다. 저희 HITRUST CCSFP 덤프는 자주 업데이트되고 오래된 문제는 바로 삭제해버리고 최신 문제들을 추가하여 고객님께 가장 정확한 덤프를 제공해드릴 수 있도록 하고 있습니다.

시험패스 가능한 CCSFP 완벽한 덤프 공부자료 덤프 문제

Pass4Test는 여러분이 빠른 시일 내에 HITRUST CCSFP 인증 시험을 효과적으로 터득할 수 있는 사이트입니다. HITRUST CCSFP 덤프는 보장하는 덤프입니다. 만약 시험에서 떨어지셨다고 하면 우리는 무조건 덤프 전액 환불을 약속 드립니다. 우리 Pass4Test 사이트에서 HITRUST CCSFP 관련 자료의 일부분 문제와 답 등 샘플을 제공함으로 여러분은 무료로 다운받아 체험해보실 수 있습니다. 체험 후 우리의 Pass4Test에 신뢰감을 느끼게 됩니다. Pass4Test의 HITRUST CCSFP 덤프로 자신 있는 시험 준비를 하세요.

최신 CSF Practitioner CCSFP 무료 샘플 문제 (Q34-Q39):

질문 # 34

Organizations that process sensitive data face multiple challenges relating to information security and privacy.

- A. True
- B. False

정답: A

설명:

Organizations that process sensitive information such as personally identifiable information (PII), protected health information (PHI), or payment card data must address numerous security and privacy challenges. These include regulatory compliance (e.g., HIPAA, GDPR, PCI-DSS), operational risks such as insider threats, and technical challenges like securing cloud environments, encryption, and access control. HITRUST recognizes these challenges as part of its rationale for developing the CSF. The framework

consolidates multiple standards and regulatory requirements into a single certifiable model, helping organizations manage these complex obligations in a structured way. The assurance program then validates that organizations are applying these controls effectively. Because sensitive data is a primary target for cyber threats and regulatory scrutiny, organizations must account for layered protections, making the statement True.

질문 # 35

Under which version of the CSF did the framework go industry agnostic and HIPAA became its own regulatory factor?

- A. v9.3
- **B. v9.0**
- C. v9.1
- D. v9.2
- E. v9.4

정답: B

설명:

The HITRUST CSF transitioned to an industry-agnostic framework beginning with version 9.0. Prior to v9.0, HITRUST CSF was often perceived as heavily healthcare-focused, since HIPAA was embedded directly into the baseline controls. With v9.0, HIPAA was moved into the regulatory factor category, making it selectable during scoping rather than inherently included for all organizations. This change expanded the CSF's applicability beyond healthcare, making it suitable for industries such as finance, technology, and government contractors. It also aligned with HITRUST's vision of providing a "common security framework" that supports multiple industries while maintaining healthcare compliance capabilities through HIPAA as a regulatory overlay.

질문 # 36

The A1 Security Assessment requirements can only be added to the r2 assessment type.

- **A. False**
- B. True

정답: A

설명:

The A1 Security Assessment factor is an optional module that introduces requirements for evaluating the security and governance of AI-based systems. These requirements are mapped into HITRUST CSF across domains like risk management, monitoring, and governance. Importantly, the A1 factor is not restricted solely to r2 assessments. While r2 provides the most comprehensive assurance model, A1 can also be added to other eligible assessment types such as i1 when the scope involves AI risks. The factor is treated like any other regulatory or organizational factor in MyCSF-its selection generates additional tailored requirement statements. Therefore, the claim that A1 can only be added to r2 is inaccurate. The correct understanding is that A1 can apply to multiple assessment types, depending on scoping decisions.

질문 # 37

If an organization requires an assessment with the highest level of assurance, which assessment type should they choose?

- A. e1 Validated with RDS enabled
- **B. r2 Validated**
- C. i1 Readiness
- D. i1 Validated

정답: B

설명:

The r2 Validated Assessment provides the highest level of assurance within the HITRUST portfolio. It includes all 19 CSF domains and applies a risk-based approach tailored to the organization's industry, regulatory obligations, and technical environment. The r2 incorporates maturity level scoring (Policy, Procedure, Implementation, Measured, and Managed), allowing stakeholders to evaluate both control presence and long-term sustainability. It is also the only assessment type eligible for a two-year certification, provided interim requirements are met. By contrast, i1 and e1 assessments provide lower levels of assurance, designed for cybersecurity hygiene and medium-level assurance, respectively. Organizations with complex environments, sensitive data, or high regulatory expectations generally pursue r2 to provide maximum assurance to stakeholders.

References: HITRUST Assurance Program Overview - "Comparison of e1, i1, and r2 Assessments"; CCSFP Study Guide - "r2 Assessment as the Highest Assurance."

질문 # 38

If most of the evaluative elements associated with a requirement statement do not apply to an assessed entity's control environment, the requirement statement can be marked "N/A".

- A. False
- B. True

정답: A

설명:

HITRUST does not permit marking a requirement statement "Not Applicable" simply because most of the evaluative elements don't apply. Requirement statements are mandatory unless a legitimate scoping or regulatory justification supports exclusion. For example, a control related to cardholder data could be marked N/A only if the organization does not process credit cards. However, if even one evaluative element applies, the requirement must be scored, and the non-applicable elements may be documented as part of evidence.

HITRUST QA reviews all N/A designations, requiring organizations to justify exclusions in the Subscriber Comments field.

Improperly marking requirements as N/A may result in assessment rejection or mandatory CAPs.
