## Expert-Verified Confluent CCAAK Exam Questions for Reliable Preparation

Pass rate is 98.65% for CCAAK exam cram, and we can help you pass the exam just one time. CCAAK training materials cover most of knowledge points for the exam, and you can have a good command of these knowledge points through practicing, and you can also improve your professional ability in the process of learning. In addition, CCAAK Exam Dumps have free demo for you to have a try, so that you can know what the complete version is like. We offer you free update for one year, and the update version will be sent to your mail automatically.

## Confluent Certified Administrator for Apache Kafka Sample Questions (Q17-Q22):

### NEW QUESTION # 17

In certain scenarios, it is necessary to weigh the trade-off between latency and throughput. One method to increase throughput is to configure batching of messages.

In addition to batch.size, what other producer property can be used to accomplish this?

- A. delivery.timeout.ms

- B. compression
- C. sendbufferbytes
- D. **linger.ms**

**Answer: D**

Explanation:

The `linger.ms` property sets the maximum time the producer will wait before sending a batch, even if the batch isn't full. By increasing `linger.ms`, you allow more records to accumulate in the batch.

#### NEW QUESTION # 18

Multiple clients are sharing a Kafka cluster.

As an administrator, how would you ensure that Kafka resources are distributed fairly to all clients?

- A. ACLs
- B. Rebalancing
- C. **Quotas**
- D. Consumer Groups

**Answer: C**

Explanation:

Kafka quotas allow administrators to control and limit the rate of data production and consumption per client (producer/consumer), ensuring fair use of broker resources among multiple clients.

#### NEW QUESTION # 19

You are using Confluent Schema Registry to provide a RESTful interface for storing and retrieving schemas.

Which types of schemas are supported? (Choose three.)

- A. **Avro**
- B. **JSON**
- C. gRPC
- D. Thrift
- E. **Protobuf**

**Answer: A,B,E**

Explanation:

Avro is the original and most commonly used schema format supported by Schema Registry.

Confluent Schema Registry supports JSON Schema for validation and compatibility checks.

Protocol Buffers (Protobuf) are supported for schema management in Schema Registry.

#### NEW QUESTION # 20

You have a Kafka cluster with topics `t1` and `t2`. In the output below, topic `t2` shows Partition 1 with a leader `"-1"`.

What is the most likely reason for this?

...

```
$ kafka-topics --zookeeper localhost:2181 --describe --topic t1
```

```
Topic:t1 PartitionCount 1 ReplicationFactor 1 Configs:
```

```
Topic: t1 Partition: 0 Leader: 0 Replicas: 0 Isr: 0
```

```
$ kafka-topics --zookeeper localhost:2181 --describe --topic t2
```

```
Topic:t2 PartitionCount 2 ReplicationFactor 1 Configs:
```

```
Topic: t2 Partition: 0 Leader: 0 Replicas: 0 Isr: 0
```

```
Topic: t2 Partition: 1 Leader: -1 Replicas: 1 Isr:
```

- A. **Broker 1 failed.**
- B. Leader shows `"-1"` while the log cleaner thread runs on Broker 1.
- C. Compression has been enabled on Broker 1.
- D. Broker 1 has another partition clashing with the same name.

**Answer: A**

Explanation:

A Leader of -1 indicates that no broker is currently the leader for that partition. This usually happens when the only replica for that partition is unavailable, often due to the associated broker (in this case, Broker 1) failing or being offline. Kafka cannot elect a leader if no replica is in the in-sync replica (ISR) list, which leads to leader = -1.

#### NEW QUESTION # 21

What does Kafka replication factor provide? (Choose two.)

- A. Security
- B. Performance
- C. Durability
- D. Availability

**Answer: C,D**

Explanation:

Replication ensures that multiple copies of data exist across different brokers, so data is not lost if one broker fails.

With multiple replicas, Kafka can continue to serve data even if the leader or one replica fails, maintaining service availability.

#### NEW QUESTION # 22

.....

This format of our CCAAK product is easiest to use due to its compatibility with web-browsers. This handy feature makes it your go-to online platform to evaluate your preparation. Conceptual and tough CCAAK questions will prompt on your screen which will test your true concepts. Confluent Certification Exams Questions taken from past papers will also be given to give you a brief idea of the actual difficulty level of the Confluent Certified Administrator for Apache Kafka (CCAAK) exam. Its large question bank prepares you to ace your exam with ease and it will also help you to pinpoint your mistakes and weaknesses and work on them.
