- A. TM purchasing organization to MM purchasing organization
- B. TM charge type to MM service master
- C. TM charge type to MM service material group
- D. TM charge category to MM G/L account

정답: A,B

#### 설명:

In a side-by-side scenario integrating SAP S/4HANA Transportation Management (TM) with Materials Management (MM), specific objects are mapped to ensure seamless data transfer. According to the SAP documentation:

\* TM charge type to MM service master (A) is mapped to link transportation-related charges to service master records in MM, enabling accurate service procurement.

\* TM purchasing organization to MM purchasing organization (C) is mapped to align the organizational structure between TM and MM, ensuring consistent purchasing processes.

The other options are incorrect:

\* TM charge category to MM G/L account (B) is not a standard mapping, as charge categories are higher-level groupings and are not directly linked to G/L accounts.

\* TM charge type to MM service material group (D) is not typically mapped, as service material groups are less specific than service master records.
