Now you have all the necessary information about quick Salesforce Certified B2C Commerce Architect (Arch-303) exam questions preparation. Just take the best decision of your career and enroll in the Salesforce Arch-303 Exam. Download the Salesforce Arch-303 exam real dumps now and start this career advancement journey.

Salesforce Certified B2C Commerce Architect Sample Questions (Q66-Q71):

NEW QUESTION # 66
A business wants to migrate its customer service provider from provider A to provider B. Provider e offers a LINK cartridge to integrate with its commerce solution.
Which three artifacts need to be created by the Architect? Choose 3 answers

- A. Document the data mapping between commerce and customer service provider.

- B. Document the design of implementing a new B2C Commerce cartridge following the Industry standard best practices
- C. Document how the customer online journey flown from landing on the page to placing of the order
- D. Document the customizations required on top of the LINK cartridge based on current commerce implementation and business needs.
- E. Document the data objects, the interface, and data synchronization frequency between the systems.

Answer: B,D,E

Explanation:
When integrating a new LINK cartridge for a customer service provider, the following documents are essential:
* Option A (Document the design of implementing a new B2C Commerce cartridge following the industry standard best practices): This ensures that the cartridge is implemented in a manner that is consistent with established best practices, enhancing maintainability and compatibility.
* Option B (Document the data objects, the interface, and data synchronization frequency between the systems): It's crucial to define how data will flow between the new customer service provider and the commerce system, including the frequency of synchronization to ensure data integrity and timeliness.
* Option D (Document the customizations required on top of the LINK cartridge based on current commerce implementation and business needs): Customizing the cartridge to fit the specific needs and existing setup of the commerce system ensures that the integration adds the intended value without disrupting existing operations.
These artifacts will guide the structured integration and customization of the LINK cartridge, ensuring it meets the business's operational and strategic needs.

NEW QUESTION # 67
The Client is planning to switch to a new Payment Service Provider (PSP). They have approached an Architect to understand the time and effort to Integrate the new PSP The PSP offers a LINK cartridge compatible with SiteGenesisPipelines, but the Client's website is build on Controllers.
Which two options should the Architect take into consideration before starting analysis? Choose 2 answers

- A. Estimate the effort and risk to convert the LINK cartridge from pipelines to controllers.
- B. Produce a proof of concept converting the most essential pipelines into controllers and integrate the cartridge.
- C. Reach out to the PSP development team and ask if a new cartridge version that supports controllers is under development
- D. Look fora different PSP that supports controllers and would not require conversion efforts.

Answer: A,C

Explanation:
When integrating a new Payment Service Provider (PSP) LINK cartridge designed for SiteGenesis Pipelines into a site built on Controllers, consider these options:
* Option A (Estimate the effort and risk to convert the LINK cartridge from pipelines to controllers): Assessing the effort involved in converting the cartridge provides insight into the project scope, helping to manage risk and allocate resources effectively.
* Option B (Reach out to the PSP development team and ask if a new cartridge version that supports controllers is under development): This can potentially save significant development time and resources if a compatible version is already planned or in progress.
These approaches help in making an informed decision on integration strategies, balancing between customization efforts and leveraging existing solutions.

NEW QUESTION # 68
A client has a single site with multiple domains, locales, and languages. Afterlaunch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale.
Which version of aliases,Json file below will accomplish this task?

- A. ▢
- B. ▢
- C. ▢
- D. ▢

Answer: A

Explanation:

Option C correctly addresses the requirement for showing the same maintenance page across multiple locales by having each different domain alias ("nto.eu", "nto.at", "nto.de") mapped to the same www domain ("www. nto.eu"). This setup allows all traffic, regardless of the original locale-specific domain, to be directed to a single, unified maintenance page hosted under the "www.nto.eu" domain. This ensures consistency in the maintenance message presented to all users, irrespective of their regional domain.

NEW QUESTION # 69

A developer is remotely fetching the reviews for a product.
Assume that it's an HTTP GET request and caching needs to be implemented, what consideration should the developer keep in mind for building the caching strategy?

- A. Cached remote include with cache of the HTTP service
- B. Use custom cache
- C. Cache the HTTP service request
- D. Remote include with caching only the reviews

Answer: A

Explanation:
For efficient caching of HTTP GET requests used to fetch product reviews, the best practice is to use a cached remote include combined with caching of the HTTP service itself (Answer D). This method involves caching the output of the remote service call at the service layer and reusing it for subsequent requests. This approach minimizes the number of calls to the remote service, reduces load times, and ensures that the displayed reviews are up-to-date as per the cache's freshness settings. It optimally balances the performance benefits of caching with the need to keep content like reviews current.

NEW QUESTION # 70

The Client is creating a new Storefront and their requirements include:
* ApplePay support
* Log -n through a standard OAuth2 social media account
* One Okie checkout process
* Ay B testing forpromotions
Which two items require technical documentation for customizing the Storefront Reference Architecture?
Choose 2 answers

- A. ApplePay support
- B. log in through a standard OAuth2 social media account
- C. One Click checkout process
- D. A/B testing forpromotions

Answer: B,C

Explanation:
For customizing the Storefront Reference Architecture to meet specific requirements, the following items would require detailed technical documentation:
* Option A (One Click checkout process): Implementing a one-click checkout process involves significant customization to streamline the checkout flow, potentially requiring integration with payment providers and modifications to the user session management.
* Option C (Log in through a standard OAuth2 social media account): Integrating OAuth2 for social media logins involves handling authentication tokens, user sessions, and potentially syncing user data with the B2C Commerce profiles, all of which require detailed security and integration documentation.
These customizations require careful planning and implementation to ensure they work seamlessly with existing Storefront Reference Architecture components and meet security standards.

NEW QUESTION # 71

......

Our company is a professional certificate exam materials provider, and we have worked on this industry for years, therefore we have

rich experiences. Arch-303 exam dumps of us have questions and answers, and it will be easier for you to check the right answers after practicing. Arch-303 Exam Braindumps are famous for high quality, we use the shilled professionals to compile them, and the quality is guarantee. Furthermore, our professional technicians will check the safety of our website, and we will provide you with a safe shopping environment.
