## Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q37-Q42):

### NEW QUESTION # 37

Which two fields are you required to enter when you create a new user account? (Choose two.)

- A. user ID
- B. full name
- C. login class
- D. username

**Answer: C,D**

Explanation:

In Junos OS, when creating a new user account, the minimum required fields are the username and the login class. The username is the identifier for the account, while the login class specifies the level of access or permissions the user has on the device. Login classes allow for the differentiation between various roles, such as read-only access or full administrative rights. Other information, such as full name or user ID, is optional and not strictly necessary for the creation of a functional user account.

### NEW QUESTION # 38

Which two statements are correct about Junos traceoptions? (Choose two.)

- A. Traceoptions are enabled by default.
- B. Traceoptions cannot be enabled in a production environment.
- C. Traceoptions are enabled through configuration.
- D. Traceoption output, by default, is stored in /var/log/<file-name>.

**Answer: C,D**

Explanation:

Traceoptions in Junos OS are used for detailed debugging and troubleshooting of protocols and processes within the system. They are not enabled by default due to the potential performance impact and volume of data generated. Instead, traceoptions are enabled through specific configuration settings under the relevant protocol or process hierarchy. This allows administrators to target their troubleshooting efforts and control the scope of logging. By default, the output generated by traceoptions is stored in files located in the /var/log directory, with the file name typically specified in the traceoptions configuration. This structured approach to logging and debugging helps in diagnosing complex issues without overwhelming the system or the administrator with irrelevant data.

### NEW QUESTION # 39

Which two components are included in a transport header? (Choose two.)

- A. destination MAC address
- **B. destination port number**
- C. source MAC address
- **D. source port number**

**Answer: B,D**

### NEW QUESTION # 40

Which two statements describe the result when you enter ? at the command-line prompt? (Choose two.)

- **A. It displays summary information about the commands and options.**
- **B. It lists the available commands and options.**
- C. It lists tips for the help menu.
- D. It displays help about a text string contained in a statement.

**Answer: A,B**

Explanation:

When you enter ? at the command-line prompt in Junos OS, the system provides assistance in two significant ways. Firstly, it lists the available commands and options that can be used at the current point in the command hierarchy, aiding users in understanding what commands they can execute next. Secondly, it displays summary information about those commands and options, providing brief descriptions or additional context that can help users understand the function of each command or option. This feature is particularly useful for learning the command structure or for quick reference when specific command syntax is forgotten.

### NEW QUESTION # 41

What is the protocol data unit (PDU) of the Data Link Layer?

- A. byte
- B. segment
- **C. frame**
- D. bit

**Answer: C**

Explanation:

In the OSI model, the Data Link Layer is responsible for node-to-node delivery of data. It frames the packets received from the Network Layer and prepares them for physical transmission. The Protocol Data Unit (PDU) for the Data Link Layer is called a "frame." Frames encapsulate the network layer packets, adding a header and a trailer that include the hardware addresses of the source and destination, among other things, facilitating the data link layer services like frame synchronization, flow control, and error checking.

### NEW QUESTION # 42

.....

For candidates who are going to attend the exam, passing the exam is important. JN0-105 exam torrent of us will help you pass the exam successfully. With experienced experts to compile, JN0-105 exam dumps are high quality, and they also cover most knowledge points of the exam, therefore you master the key points of the exam. In addition, JN0-105 Exam Dumps of us will help you pass the exam just one time, if you can't pass the exam during your first attempt, we will give you a full refund. We have online chat service stuff to answer all your questions about the JN0-105 exam torrent, if you have any questions, just consult us.
