2026 Microsoft PL-600 Marvelous New Study Notes

The PL-600 exam requires a lot of preparation, hard work, and practice to be successful. To pass the Microsoft Power Platform Solution Architect (PL-600) test, you need to get updated Microsoft PL-600 dumps. These PL-600 questions are necessary to study for the test and pass it on the first try. Updated PL-600 Practice Questions are essential prepare successfully for the Microsoft Power Platform Solution Architect certification exam. But gaining access to updated PL-600 questions is challenging for the candidates.

Microsoft Power Platform Solution Architect Sample Questions (Q102-Q107):

NEW QUESTION # 102

You need to recommend the appropriate components to meet the inspection requirements.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Solution
Prevent editing of finalized inspection orders.	<div>▼</div> <div>Business rule</div> <div>Security role</div> <div>User permission</div>
Prepare documentation for failed inspection steps.	<div>▼</div> <div>Data flow</div> <div>Business rule</div> <div>Form property</div>

Answer:

Explanation:

Requirement	Solution
Prevent editing of finalized inspection orders.	<div>▼</div> <div>Business rule</div> <div>Security role</div> <div>User permission</div>
Prepare documentation for failed inspection steps.	<div>▼</div> <div>Data flow</div> <div>Business rule</div> <div>Form property</div>

Explanation

Requirement

Solution

 Prevent editing of finalized inspection orders.

	▼
Business rule	
Security role	
User permission	

Prepare documentation for failed inspection steps.

	▼
Data flow	
Business rule	
Form property	

Box 1: Security role

Microsoft Dataverse uses a role-based security model to help secure access to the database.

Scenario:

You must prevent users from changing inspection order data once an inspection is marked as final.

Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.

Box 2: Data flow

Dataflows are a self-service, cloud-based, data preparation technology. Dataflows enable customers to ingest, transform, and load data into Microsoft Dataverse environments, Power BI workspaces, or your organization's Azure Data Lake Storage account.

Scenario: Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance.

Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.

NEW QUESTION # 103

A company uses Microsoft Dataverse to store patient Information-Patient information is managed using Dataverse forms. The company must enforce the following rules to manage data quality:

* Show or hide tabs in the main form based on the column value selected.

* Add a discount code automatically when a new patient row is added.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Solution
Show or hide tabs in the main form based on the column value selected.	<div>Business process flow</div> <div>Plug-in</div> <div>Client script</div> <div>Business rule</div> <div>Business process flow</div>
Add a discount code automatically when a new patient row is added.	<div>Business rule</div> <div>Client script</div> <div>Business rule</div> <div>Classic workflow</div> <div>Business process flow</div>

 Microsoft

Answer:

Explanation:
ANSWER AREA

Requirement

Show or hide tabs in the main form based on the column value selected.

Add a discount code automatically when a new patient row is added.

 Microsoft

Solution

Business process flow	Business process flow
Plug-in	Plug-in
Client script	Client script
Business rule	Business rule
Business process flow	Business process flow
Business rule	Business rule
Client script	Client script
Business rule	Business rule
Classic workflow	Classic workflow
Business process flow	Business process flow

Explanation
ANSWER AREA

Requirement

Show or hide tabs in the main form based on the column value selected.

Add a discount code automatically when a new patient row is added.

 Microsoft

Solution

Business process flow	Business process flow
Business rule	Business rule

NEW QUESTION # 104

You are working with a customer to plan a go-live deployment to their production environment. The solution includes several apps and environment variables. The superuser team manages the production environment that is secured by using a specific environment Azure AD security group.

The following issues have been identified:

- * The super user team cannot access make.powerapps.com to open and set the environment variables.
- * Users are added to the environment Azure AD security group and are not able to access the model-driven app.
- * Users are added to the environment Azure AD security group and are not able to access the canvas app.

You need to resolve the issues.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Issue

The superuser team cannot set the environment variables.

Users cannot access the model-driven app.

Users cannot access the canvas app.

Resolution

Assign the System Customizer role.
Assign the System Customizer role.
Assign the Basic User role.
Assign the Service Reader role.
Assign the Office Collaborator role.

Assign the Basic User role.
Assign the Basic User role.
Assign the Service Reader role.
Assign the Office Collaborator role.
Add the Azure AD Security Group.

Add users to an Azure AD Security Group.
Assign the System Customizer role.
Assign the Service Reader role.
Add users to the superuser team.
Add users to an Azure AD Security Group.

Answer:

Explanation:

The screenshot shows the 'Answer Area' with three issues listed on the left and their corresponding resolutions in dropdown menus on the right. The issues are: 'The superuser team cannot set the environment variables.', 'Users cannot access the model-driven app.', and 'Users cannot access the canvas app.' The resolutions are: 'Assign the System Customizer role.', 'Assign the Basic User role.', and 'Add users to an Azure AD Security Group.' respectively.

Explanation:

Answer Area

Issue

The superuser team cannot set the environment variables.

Users cannot access the model-driven app.

Users cannot access the canvas app.

Resolution

Assign the System Customizer role.
Assign the Basic User role.
Add users to an Azure AD Security Group.

NEW QUESTION # 105

A company plans to deploy multiple Microsoft Dataverse environments. You are supporting the go-live process.

The company reports the following access issues:

- * Users can access account records but cannot read a column in the table.
- * A licensed user receives an insufficient permission error when opening leads.
- * A licensed user does not appear in the list of users available for security assignment.

You need to resolve the issues.

What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer Area	
Issue	Action
Users can access account records but cannot read a column in the table.	<div>Security role</div> <div>Security group</div> <div>Field security profile</div>
A licensed user receives an insufficient permission error when opening leads.	<div>Security role</div> <div>Security group</div> <div>Field security profile</div>
A licensed user does not appear in the list of users available for security assignment.	<div>Security role</div> <div>Security group</div> <div>Field security profile</div>

Answer:

Explanation:

Answer Area	
Issue	Action
Users can access account records but cannot read a column in the table.	<div>Security role</div> <div>Security group</div> <div>Field security profile</div>
A licensed user receives an insufficient permission error when opening leads.	<div>Security role</div> <div>Security group</div> <div>Field security profile</div>
A licensed user does not appear in the list of users available for security assignment.	<div>Security role</div> <div>Security group</div> <div>Field security profile</div>

Explanation

Graphical user interface, text, application, email Description automatically generated

Issue	Action
Users can access account records but cannot read a column in the table.	<div>▼</div> <div>Security role</div> <div>Security group</div> <div>Field security profile</div>
A licensed user receives an insufficient permission error when opening leads.	<div>▼</div> <div>Security role</div> <div>Security group</div> <div>Field security profile</div>
A licensed user does not appear in the list of users available for security assignment.	<div>▼</div> <div>Security role</div> <div>Security group</div> <div>Field security profile</div>

NEW QUESTION # 106

A company wants to create a Power Automate flow that posts marketing events to social media.

The company must ensure that the postings adhere to regulatory requirements for handling of personally identifiable information (PII) data.

a. The company will not post events to unauthorized social media platforms.

You need to ensure that the requirement is met.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a security role to prevent data export.
- B. Configure the relevant connector so that it is part of the Non-Business data group category.
- C. Configure the relevant connector so that it is part of the Blocked data group category.
- D. Create a Data Loss Protection (DLP) policy.
- E. Configure an Azure Active Directory (AAD) security role for the maker to the environment.

Answer: C,D

Explanation:

DLP policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business. If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow. Sometimes you might want to block the usage of certain connectors altogether by classifying them as Blocked.
