

NCP-US-6.10 Passed & NCP-US-6.10 Exam Simulator

BONUS!!! Download part of ITExamReview NCP-US-6.10 dumps for free: <https://drive.google.com/open?id=1IladoCH7AK6v5TbY2fnVAm19dMs2HowM>

Now Nutanix NCP-US-6.10 certification test is very popular. Not having got NCP-US-6.10 certificate, you must want to take the exam. Indeed, Nutanix NCP-US-6.10 test is very difficult exam, but this is not suggested that you cannot get high marks and pass your exam with ease. Without knowing the shortcut of Nutanix NCP-US-6.10 Exam, do you want to know the testing technique? As for the point, I can tell you that ITExamReview Nutanix NCP-US-6.10 study guide is your unique choice.

If you purchase our NCP-US-6.10 preparation questions, it will be very easy for you to easily and efficiently find the exam focus. More importantly, if you take our products into consideration, our NCP-US-6.10 study materials will bring a good academic outcome for you. At the same time, we believe that our NCP-US-6.10 training quiz will be very useful for you to have high quality learning time during your learning process.

>> NCP-US-6.10 Passed <<

Quiz Nutanix - NCP-US-6.10 - Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 High Hit-Rate Passed

The service of NCP-US-6.10 test guide is very prominent. It always considers the needs of customers in the development process. There are three versions of our NCP-US-6.10 learning question, PDF, PC and APP. Each version has its own advantages. You can choose according to your needs. Of course, you can use the trial version of NCP-US-6.10 Exam Training in advance. After you use it, you will have a more profound experience. You can choose your favorite our study materials version according to your feelings. When you use NCP-US-6.10 test guide, you can also get our services at any time.

Nutanix Certified Professional - Unified Storage (NCP-US) v6.10 Sample Questions (Q60-Q65):

NEW QUESTION # 60

Question:

An administrator has been asked to lock a file indefinitely. The lock can be explicitly removed only by authorized users.

Which configuration matches the requirements of this task?

- A. Data Lens Ransomware Protection
- B. Blocked File Types for Files
- C. Nutanix Objects with WORM versioning
- D. Nutanix Objects Legal hold

Answer: D

Explanation:

Legal Hold in Nutanix Objects is a feature designed for compliance and regulatory use cases, ensuring that specific objects (files) cannot be deleted or modified for an indefinite period, even if WORM (Write Once Read Many) policies exist.

Here's how it matches the scenario:

Indefinite Lock:

- * Legal Hold ensures that once applied, the object is locked indefinitely.
- * Unlike WORM retention, which is based on a fixed duration (like days/months), Legal Hold has no expiration until an authorized administrator explicitly removes it.

Authorized Removal Only:

- * Only users with specific Legal Hold management permissions can remove the lock, maintaining compliance and governance integrity.

The NUSA course materials emphasize:

"Legal Hold is a compliance feature that prevents deletion or modification of specific objects. It can only be lifted by authorized administrators, ensuring that the data remains immutable as long as required by legal or regulatory processes." The other options: WORM versioning- locks data for a fixed retention period; it does not provide indefinite locking.

Data Lens Ransomware Protection- focuses on monitoring for anomalies, not explicit file locking.

Blocked File Types for Files- prevents certain files from being uploaded but does not lock already uploaded files.

Thus, to indefinitely lock a file in Nutanix Objects, the administrator should use Legal Hold.

NEW QUESTION # 61

What prerequisite must be met before a Nutanix Files SMB share can be used?

- A. Register the cluster with Prism Central.
- B. Configure directory services.
- C. Enable a strong password policy.
- D. Run afs infra.start

Answer: B

Explanation:

Directory services integration (e.g., Active Directory) is mandatory for SMB shares to:

- * Authenticate users.
- * Apply access controls (ACLs).
- * Enable Kerberos-based security. Without this, SMB shares cannot be accessed by domain-joined clients.
- * Option B: Prism Central registration enables central management but isn't a share prerequisite.
- * Option C: afs infra.start is an invalid command.
- * Option D: Password policies are enforced via directory services but not a standalone prerequisite.

Reference: Nutanix Files Administration Guide:

"Active Directory integration is required before creating SMB shares. File Server VMs must be domain-joined for user authentication." (Chapter: "Configuring SMB Shares") Nutanix Unified Storage Administration (NUSA) Course:

"Directory services configuration is the foundational step for SMB share deployment." (Module: "Nutanix Files SMB Implementation")

NEW QUESTION # 62

Question:

In order to deploy Nutanix Files, which two networks should be created? (Choose two.)

- A. Overlay Network
- B. Storage Network
- C. Management Network

- D. Client Network

Answer: C,D

Explanation:

The Nutanix Files deployment process requires two logical networks for operational separation and performance:

Client Network:

"This is the network through which client devices (Windows, Linux) connect to the file shares hosted by the FSVMs. It ensures that user data access is isolated from management traffic." Management Network:

"This network is used for communication between FSVMs and Prism Central/Prism Element for administrative tasks, health monitoring, and management APIs." The Storage Network is not a separate network for Nutanix Files—it uses the cluster's existing storage network (backed by the Nutanix DSF). The Overlay Network concept is specific to container environments, not Nutanix Files deployments.

NEW QUESTION # 63

Question:

What should be enabled for Windows clients when using the SMB protocol in a Nutanix Files deployment?

- A. Distributed File System
- B. Zettabyte File System
- C. Internet Information Services
- D. Automatic Windows Update

Answer: A

Explanation:

SMB (Server Message Block) protocol is the foundation for file sharing in Windows environments. In a Nutanix Files deployment, enabling Distributed File System (DFS) on Windows clients enhances SMB functionality by:

Allowing namespace-based access to shares.

Providing client failover and load balancing when used with Nutanix Files SMB shares.

According to the NUSA course:

"For Windows clients accessing Nutanix Files via SMB, enabling Distributed File System (DFS) ensures they can dynamically discover and connect to the most optimal FSVM, even during failovers. DFS enhances resiliency and performance by maintaining a consistent namespace." The other options:

Zettabyte File System- not relevant for Windows or SMB.

Internet Information Services- web server technology, not related to SMB shares.

Automatic Windows Update- not directly tied to SMB access.

Thus, enabling Distributed File System (DFS) on Windows clients ensures smooth SMB integration and high availability.

NEW QUESTION # 64

What is the maximum number of object stores that can be deployed per AOS cluster?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

A single AOS cluster supports a maximum of 4 Nutanix Object Stores. Each object store is an independent instance with dedicated resources.

Reference: Nutanix Objects Planning Guide:

"A cluster supports up to four Object Stores, each capable of hosting multiple buckets and scaling independently." (Chapter: "Deployment Limits") Nutanix NUSA Course: "The hard limit of 4 Object Stores per cluster ensures resource isolation and performance stability." (Module: "Objects Sizing and Scaling") According to the Nutanix Unified Storage documentation and the Nutanix Unified Storage Administration (NUSA) course materials, each AOS (Acropolis Operating System) cluster can support a maximum of 4 object stores. This maximum number ensures stability, scalability, and performance consistency within the cluster environment.

The object store in Nutanix Unified Storage is implemented using Nutanix Objects, which leverages a distributed, scale-out architecture. When deploying object stores within an AOS cluster, the system assigns storage resources and metadata handling roles across the cluster nodes to maintain high availability and data protection.

The limitation of 4 object stores per cluster is defined to optimize resource utilization and prevent excessive load on cluster services that manage object metadata and data replication. Each object store is backed by Nutanix's robust storage fabric, which ensures performance and reliability while maintaining strict isolation between different object stores.

In the Nutanix Unified Storage Administration course, the topic of deploying object stores covers:

Deployment Limits: Each AOS cluster is capable of hosting up to 4 object stores, which allows for flexibility while maintaining performance boundaries.

Design Considerations: The 4-object store limit is recommended to avoid resource contention, as object stores have significant metadata and data handling overhead that can impact cluster stability if limits are exceeded.

Scalability: While 4 object stores can be deployed per cluster, Nutanix's architecture allows for horizontal scaling by deploying additional object stores across multiple clusters as needed for different use cases or tenant isolation.

Management of Object Stores: Unified Storage leverages Prism Central and Prism Element to configure and monitor object stores, ensuring easy management of deployed object services within the cluster's limit.

This information is consistently emphasized in the official NCP-US study guide and the NUSA course presentations to ensure administrators and architects understand these design and deployment limitations.

NEW QUESTION # 65

.....

With the rapid development of IT technology, the questions in the IT certification exam are also changing. Therefore, ITExamReview also keeps updating test questions and answers. And if you purchase ITExamReview Nutanix NCP-US-6.10 Practice Test materials, we will provide you with free updates for a year. As long as the questions updates, ITExamReview will immediately send the latest questions and answers to you which guarantees that you can get the latest materials at any time. ITExamReview can not only help you pass the test, but also help you learn the latest knowledge. Never pass up a good chance to have the substantial materials.

NCP-US-6.10 Exam Simulator: <https://www.itexamreview.com/NCP-US-6.10-exam-dumps.html>

You also don't have to spend all your energy to the exam because our NCP-US-6.10 study materials are very efficient. More guarantee is, there is all 365-days free update for you if buy the NCP-US-6.10 test dumps from us. By selecting our NCP-US-6.10 study materials, you do not need to purchase any other products. Our training materials contain the latest exam questions and valid NCP-US-6.10 exam answers for the exam preparation, which will ensure you clear exam 100%.

Illustrator Terminology and Labels, Rather, a code of conduct creates a safe space for people who may be in the minority. You also don't have to spend all your energy to the exam because our NCP-US-6.10 Study Materials are very efficient.

NCP-US-6.10 Passed Reliable Questions Pool Only at ITExamReview

More guarantee is, there is all 365-days free update for you if buy the NCP-US-6.10 test dumps from us. By selecting our NCP-US-6.10 study materials, you do not need to purchase any other products.

Our training materials contain the latest exam questions and valid NCP-US-6.10 exam answers for the exam preparation, which will ensure you clear exam 100%. But actually, Nutanix - NCP-US-6.10 dump cram always deserves trust.
