### SC-300 Study Demo & SC-300 Exam Tutorials

The service of SC-300 test guide is very prominent. It always considers the needs of customers in the development process. There are three versions of our SC-300 learning question, PDF, PC and APP. You can choose according to your needs. Of course, you can use the trial version of SC-300 exam training in advance. After you use it, you will have a more profound experience. You can choose your favorite our SC-300 Study Materials version according to your feelings. I believe that you will be more inclined to choose a good service product, such as SC-300 learning question

### Microsoft Identity and Access Administrator Sample Questions (Q192-Q197):

#### NEW QUESTION # 192

You need to meet the authentication requirements for leaked credentials.  
What should you do?

- A. Configure an authentication method policy in Azure AD.
- **B. Enable password hash synchronization in Azure AD Connect.**
- C. Enable federation with PingFederate in Azure AD Connect.
- D. Configure Azure AD Password Protection.

**Answer: B**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/security/fundamentals/steps-secure-identity>

Topic 1, Litware, Inc

Identity Environment

The network contains an Active Directory forest named litware.com that is linked to an Azure Active Directory (Azure AD) tenant named litware.com. Azure AD Connect uses pass-through authentication and has password hash synchronization disabled.

Litware.com contains a user named User1 who oversees all application development. Litware implements Azure AD Application Proxy.

Fabrikam has an Azure AD tenant named fabrikam.com. The users at Fabrikam access the resources in litware.com by using guest accounts in the litware.com tenant.

Cloud Environment

All the users at Litware have Microsoft 365 Enterprise E5 licenses. All the built-in anomaly detection policies in Microsoft Cloud App Security are enabled.

Litware has an Azure subscription associated to the litware.com Azure AD tenant. The subscription contains an Azure Sentinel instance that uses the Azure Active Directory connector and the Office 365 connector. Azure Sentinel currently collects the Azure AD sign-ins logs and audit logs.

On-premises Environment

The on-premises network contains the servers shown in the following table.

Both Litware offices connect directly to the internet. Both offices connect to virtual networks in the Azure subscription by using a site-to-site VPN connection. All on-premises domain controllers are prevented from accessing the internet.

Delegation Requirements

Litware identifies the following delegation requirements:

- \* Delegate the management of privileged roles by using Azure AD Privileged Identity Management (PIM).
- \* Prevent nonprivileged users from registering applications in the litware.com Azure AD tenant-
- \* Use custom catalogs and custom programs for Identity Governance.
- \* Ensure that User1 can create enterprise applications in Azure AD. Use the principle of least privilege.

Licensing Requirements

Litware recently added a custom user attribute named LWLicenses to the litware.com Active Directory forest. Litware wants to manage the assignment of Azure AD licenses by modifying the value of the LWLicenses attribute. Users who have the appropriate value for LWLicenses must be added automatically to Microsoft 365 group that have the appropriate license assigned.

Management Requirements

Litware wants to create a group named LWGroup1 that will contain all the Azure AD user accounts for Litware but exclude all the Azure AD guest accounts.

Authentication Requirements

Litware identifies the following authentication requirements:

- \* Implement multi-factor authentication (MFA) for all Litware users.
- \* Exempt users from using MFA to authenticate to Azure AD from the Boston office of Litware.
- \* Implement a banned password list for the litware.com forest.
- \* Enforce MFA when accessing on-premises applications.
- \* Automatically detect and remediate externally leaked credentials

Access Requirements

Litware wants to create a group named LWGroup1 that will contain all the Azure AD user accounts for Litware but exclude all the Azure AD guest accounts.

Monitoring Requirements

Litware wants to use the Fusion rule in Azure Sentinel to detect multi-staged that include a combination of suspicious Azure AD sign-ins followed by anomalous Microsoft Office 365 activity.

**NEW QUESTION # 193**

You have a Microsoft Entra tenant named contoso.com that contains an enterprise application named App1.

A contractor uses the credentials of user1@outlook.com

You need to ensure that you can provide the contractor with access to App1. The contractor must be able to authenticate as user1

@outlook.com  
What should you do?

- A. Configure the External collaboration settings
- B. Run the New-Mguser cmdlet
- **C. Run the New-MgInvitation cmdlet**
- D. Implement Microsoft Entra Connect sync.

**Answer: C**

Explanation:

When granting external users (such as contractors) access to Microsoft Entra resources like enterprise applications, the correct method is to invite them as guest users.

The Microsoft SC-300 Study Guide states:

"To collaborate with external users who authenticate using their existing accounts (e.g., Outlook.com, Gmail, or another Entra tenant), you must invite them as guest users using the Microsoft Graph API or the New- MgInvitation PowerShell cmdlet." In this scenario, the contractor uses user1@outlook.com, which is a personal Microsoft account. The New- MgInvitation cmdlet creates a guest user in the tenant that links to their external identity for authentication.

**NEW QUESTION # 194**

You have a Microsoft 365 tenant.

You need to identify users who have leaked credentials. The solution must meet the following requirements.

- \* Identify sign-Ins by users who are suspected of having leaked credentials.
- \* Flag the sign-ins as a high risk event.
- \* Immediately enforce a control to mitigate the risk, while still allowing the user to access applications.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

**NEW QUESTION # 196**

You have a Microsoft 365 E5 subscription that contains three users named User1, User2, and User3.

You need to configure the users as shown in the following table.

Which portal should you use to configure each user? To answer, drag the appropriate portals to the correct users. Each portal may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

## NEW QUESTION # 197

ValidExam is an excellent platform where you get relevant, credible, and unique Microsoft SC-300 exam dumps designed according to the specified pattern, material, and format as suggested by the Microsoft SC-300 exam. To make the Microsoft SC-300 Exam Questions content up-to-date for free of cost up to 365 days after buying them, our certified trainers work strenuously to formulate the exam questions in compliance with the SC-300 dumps.
