Instant DEP-2025 Access & Hot DEP-2025 Spot Questions

It is well known that the best way to improve your competitive advantages in this modern world is to increase your soft power, such as graduation from a first-tier university, fruitful experience in a well-known international company, or even possession of some globally recognized DEP-2025 certifications, which can totally help you highlight your resume and get a promotion in your workplace to a large extend. As a result, our DEP-2025 Study Materials raise in response to the proper time and conditions while an increasing number of people are desperate to achieve success and become the elite.

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.
Topic 2	<ul style="list-style-type: none">• Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.
Topic 3	<ul style="list-style-type: none">• Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.
Topic 4	<ul style="list-style-type: none">• Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 5	<ul style="list-style-type: none">• Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.
Topic 6	<ul style="list-style-type: none">• Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
Topic 7	<ul style="list-style-type: none">• Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.
Topic 8	<ul style="list-style-type: none">• Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Topic 9	<ul style="list-style-type: none">• Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.
Topic 10	<ul style="list-style-type: none">• Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Topic 11	<ul style="list-style-type: none">• Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.

Apple Deployment and Management Exam Sample Questions (Q116-Q121):

NEW QUESTION # 116

Which type of Apple ID is required for User Enrollment?

- **A. Managed Apple ID**
- B. Apple ID
- C. Shared Apple ID
- D. Personal Apple ID

Answer: A

Explanation:

User Enrollment, designed for BYOD, requires a Managed Apple ID to separate personal and managed data cryptographically. Created via Apple Business Manager (ABM) or Apple School Manager (ASM), Managed Apple IDs enable organizational policies while preserving user privacy. Personal Apple IDs (options A and C, the same) are not used for User Enrollment, as they lack organizational control. There's no "Shared Apple ID" (option D); Shared iPad uses Managed Apple IDs differently. The Apple Platform Deployment Guide mandates Managed Apple IDs for User Enrollment.

Reference: Apple Platform Deployment Guide (Chapter: User Enrollment).

NEW QUESTION # 117

Which type of enrollment supports custom apps?

- A. User Enrollment
- **B. All of the above**
- C. Device Enrollment
- D. Automated Device Enrollment

Answer: B

Explanation:

Custom apps, developed in-house and signed with an Apple Developer account, can be deployed through all three enrollment types: Automated Device Enrollment (ADE), Device Enrollment, and User Enrollment. ADE (option A) supports custom app distribution to supervised, organization-owned devices via MDM and Managed Distribution. Device Enrollment (option B) allows custom app installation on enrolled devices, supervised or not, through MDM. User Enrollment (option C) supports custom apps for BYOD, though with limited control over personal devices. The Apple Platform Deployment Guide confirms that custom apps are compatible with all enrollment methods when paired with MDM, making D the correct answer.

Reference: Apple Platform Deployment Guide (Chapter: Custom Apps).

NEW QUESTION # 118

What's the benefit of using MDM?

- A. Separates personal and managed data
- B. Allows personalization
- C. Improves network performance
- **D. Enables remote management**

Answer: D

Explanation:

Mobile Device Management (MDM) enables remote management of devices, allowing administrators to deploy profiles, push apps, enforce policies, and perform actions like wiping or locking devices over the internet via APNs. Personalization (option A) is user-driven and often limited by MDM. Network performance (option C) is enhanced by other features like content caching. Data separation (option D) is specific to User Enrollment, a subset of MDM capabilities. The MDM Protocol Reference emphasizes remote management as MDM's core benefit.

NEW QUESTION # 119

Which two enrollment types result in cryptographic separation of organization Calendar and personal Calendar data on iPhone and iPad devices?

- **A. Automated User Enrollment**
- B. Profile-driven User Enrollment
- **C. Account-driven User Enrollment**
- D. Account-driven Device Enrollment
- E. Automated Device Enrollment

Answer: A,C

Explanation:

Apple introduced User Enrollment to support BYOD (Bring Your Own Device) scenarios. In both Account-driven User Enrollment and Automated User Enrollment, data separation is cryptographically enforced between organizational and personal data. Apple Learning emphasizes that apps like Calendar, Contacts, Notes, and Mail can store both personal and work accounts, but the data is kept in separate containers that cannot interact. For example, an organization's managed calendar events cannot be copied into a user's personal calendar. This guarantees user privacy while protecting organizational data. Automated Device Enrollment, by contrast, fully manages the device and does not enforce the same cryptographic separation.

Profile-driven User Enrollment is deprecated in favor of account-driven. The key principle here is that User Enrollment modes create strong boundaries between personal and managed data.

References: Apple Platform Deployment - "User Enrollment and data separation on iOS and iPadOS."

NEW QUESTION # 120

Which feature can MDM manage to prevent re-use of a lost or stolen Mac?

- A. Activation Lock
- B. Device Lock
- C. Managed Find My
- D. Managed Lost Mode

Answer: A

Explanation:

Activation Lock prevents reuse. The macOS Security Overview states, "Activation Lock, manageable via MDM, prevents a lost or stolen Mac from being reactivated without the owner's credentials." Option C is iOS-specific.

References:

macOS Security Overview, "Activation Lock" section.

Apple Platform Deployment Guide, "Security Features" section.

NEW QUESTION # 121

.....

It is understandable that different people have different preference in terms of DEP-2025 study guide. Taking this into consideration, and in order to cater to the different requirements of people from different countries in the international market, we have prepared three kinds of versions of our DEP-2025 Preparation questions in this website, namely, PDF version, online engine and software version, and you can choose any one of them as you like. No matter you buy any version of our DEP-2025 exam questions, you will get success on your exam!
