

# Free PDF Quiz Juniper - Dumps JN0-460 Torrent

BONUS!!! Download part of 2Pass4sure JN0-460 dumps for free: [https://drive.google.com/open?id=1uG\\_1tJ\\_MBhIPzriO\\_DBFjMUUae5yOmvL](https://drive.google.com/open?id=1uG_1tJ_MBhIPzriO_DBFjMUUae5yOmvL)

The JN0-460 study quiz is made from various experts for examination situation in recent years in the field of systematic analysis of finishing, meet the demand of the students as much as possible, at the same time have a professional staff to check and review JN0-460 practice materials, made the learning of the students enjoy the information of high quality. Due to the variety of examinations, so that students can find the information on JN0-460 guide engine they need quickly.

## Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Wired Assurance Provisioning or Deployment:</b> This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Wired Assurance Fundamentals:</b> This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Campus Fabric Architecture:</b> This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.</li> </ul>

## Juniper JN0-460 Reliable Test Online, JN0-460 VCE Dumps

Many candidates find the Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) exam preparation difficult. They often buy expensive study courses to start their Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) certification exam preparation. However, spending a huge amount on such resources is difficult for many Juniper JN0-460 Exam applicants. The latest Juniper JN0-460 exam dumps are the right option for you to prepare for the Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) certification test at home.

## Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q17-Q22):

### NEW QUESTION # 17

Deploying Campus Fabric Architectures often requires:

- A. Guesswork and improvisation
- B. A comprehensive understanding of network design principles**
- C. Sole reliance on outdated technologies
- D. A disregard for best practices

**Answer: B**

### NEW QUESTION # 18

You have two sites connected to an EVPN network. Each site is using the 172.16.1.0/24 network for its own respective site. How does EVPN prevent overlap in this scenario?

- A. It uses an Ethernet segment identifier (ESI).
- B. It elects a designated forwarder.
- C. It uses a Layer 2 gateway.
- D. It uses a route distinguisher.**

**Answer: D**

Explanation:

EVPN, when used with VXLAN, leverages BGP MPLS/VXLAN control plane mechanisms. To prevent overlapping IP prefixes between different tenants or sites, EVPN uses a Route Distinguisher (RD).

"In EVPN-VXLAN, the route distinguisher (RD) makes routes unique when overlapping IP prefixes or MAC addresses are advertised between multiple tenants or sites." Option A (designated forwarder) applies to multi-homing in EVPN, not prefix uniqueness.

Option B (Layer 2 gateway) does not prevent IP overlap; it bridges VLANs.

Option D (ESI) is used for identifying multi-homed Ethernet segments, not to differentiate overlapping subnets.

Option C(Route Distinguisher) is correct, as it uniquely identifies routes even if the IP addresses are the same across sites.

### NEW QUESTION # 19

How does VXLAN improve Layer 2 tunneling compared to traditional VLANs?

- A. By offering a larger namespace for segment IDs**
- B. By enforcing stricter security policies
- C. By reducing the maximum frame size
- D. By decreasing tunneling overhead

**Answer: A**

### NEW QUESTION # 20

A switch is claimed in a Mist organization using the activation code.

What are two possible device states that the switch will have in this scenario? (Choose two.)

- A. Inactive
- B. Connected**
- C. Unassigned**
- D. Active

**Answer: B,C**

Explanation:

When a switch is claimed into a Mist organization, it appears in one of several states depending on connectivity and site assignment. "After claiming, switches initially appear as Unassigned if they are not yet linked to a site. Once online and connected to Mist Cloud, they transition to Connected status and begin receiving configurations and telemetry." Option A (Connected): Correct- indicates the switch is online and communicating with Mist Cloud.

Option B (Inactive): Incorrect - not a valid device state in Mist.

Option C (Active): Incorrect - "Active" is not a device state label in Mist.

Option D (Unassigned): Correct- indicates the switch has been claimed but not yet assigned to a site.

### NEW QUESTION # 21

Which statement is correct regarding the Mist UI?

- A. The Mist UI is used by clients to connect to wireless networks.
- B. The Mist UI is used to manage network devices.**
- C. The Mist UI is used to distribute routes between your wireless and physical networks.
- D. The Mist UI is used by cloud providers to provision VMs.

**Answer: B**

Explanation:

The Mist UI (User Interface) is Juniper's cloud-based management platform used to manage both wired and wireless devices, including EX, QFX, and SRX platforms.

It provides centralized visibility, configuration, analytics, and AI-driven insights for the entire enterprise network infrastructure. Within Wired Assurance, the Mist UI enables device claiming, switch templates, configuration management, and SLE monitoring.

## NEW QUESTION # 22

We guarantee most JN0-460 exam bootcamp materials are the latest version which is edited based on first-hand information. Our educational experts will handle this information skillfully and publish high passing-rate JN0-460 test preparation materials professionally. Our high quality can make you rest assured. Besides, we provide one year free updates and one year service warranty, you don't need to worry too much if how long our JN0-460 Exam Guide will be valid. Once we release new version you can always download free within one year.
