Best Cisco 300-710 Online Practice Test Engine

Please believe that our BrindumpsIT team have the same will that we are eager to help you pass 300-710 exam. Maybe you are still worrying about how to prepare for the exam, but now we will help you gain confidence. By constantly improving our dumps, our strong technical team can finally take proud to tell you that our 300-710 exam materials will give you unexpected surprises. You can download our free demo to try, and see which version of 300-710 Exam Materials are most suitable for you; then you can enjoy your improvement in IT skills that our products bring to you; and the sense of achievement from passing the 300-710 certification exam.

Cisco 300-710 Exam is a part of the Cisco Certified Network Professional Security (CCNP Security) certification track. Securing Networks with Cisco Firepower certification track is designed to validate the candidates' skills in implementing, maintaining, and troubleshooting the Cisco network security solutions. The CCNP Security certification is aimed at the professionals who have at least three to five years of experience in the field of network security and who are looking to advance their career in this field.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q335-Q340):

NEW QUESTION # 335

A network engineer is planning on replacing an Active/Standby pair of physical Cisco Secure Firewall ASAs with a pair of Cisco

Secure Firewall Threat Defense Virtual appliances. Which two virtual environments support the current High Availability configuration? (Choose two.)

- A. KVM
- B. ESXi
- C. AWS
- D. Azure
- E. Openstack

Answer: B,C

Explanation:

Cisco Secure Firewall Threat Defense Virtual (FTDv) appliances support High Availability (HA) configurations in specific virtual environments. The supported environments for HA setups include:

* ESXi: VMware's ESXi is a widely supported platform for deploying FTDv appliances in HA configurations.

* AWS: Amazon Web Services (AWS) supports FTDv appliances and allows for HA configurations to ensure redundancy and reliability in cloud deployments.

These environments provide the necessary infrastructure and capabilities to support the high availability requirements for FTDv appliances.

NEW QUESTION # 336

An engineer is attempting to add a new FTD device to their FMC behind a NAT device with a NAT ID of ACME001 and a password of Cisco388267669. Which command set must be used in order to accomplish this?

- A. configure manager add <FMC IP> registration key> ACME001
- B. configure manager add ACME001 <registration key> <FMC IP>
- C. configure manager add DONTRESOLVE <FMC IP> AMCE001 <registration key>
- D. configure manager add <FMC IP> ACME001 <registration key>

Answer: A

Explanation:

NEW QUESTION # 337

Drag and drop the steps to restore an automatic device registration failure on the standby Cisco FMC from the left into the correct order on the right. Not all options are used.

Enter the "configure manager add" command at the CLI of the affected device.	Step 1
Unregister the device from the standby Cisco FMC.	Step 2
Register the affected device on the active Cisco FMC.	Step 3
Enter the "configure manager delete" command at the CLI of the affected device.	Step 4
Register the affected device on the standby Cisco FMC.	
Unregister the device from the active Cisco FMC.	

Answer:

Explanation:

Enter the "configure manager add" command at the CLI of the affected device.	Unregister the device from the standby Cisco FMC.
Unregister the device from the standby Cisco FMC.	Enter the "configure manager delete" command at the CLI of the affected device.
Register the affected device on the active Cisco FMC.	Enter the "configure manager add" command at the CLI of the affected device.
Enter the "configure manager delete" command at the CLI of the affected device.	Register the affected device on the active Cisco FMC.
Register the affected device on the standby Cisco FMC.	
Unregister the device from the active Cisco FMC.	

Explanation

Unregister the device from the active Cisco FMC.
Enter the "configure manager delete" command at the CLI of the affected device.
Enter the "configure manager add" command at the CLI of the affected device.
Register the affected device on the active Cisco FMC.

Explanation

NEW QUESTION # 338

What is the benefit of selecting the trace option for packet capture?

- A. The option indicates whether the packet was dropped or successful.
- B. The option limits the number of packets that are captured.
- C. The option captures details of each packet.
- D. The option indicated whether the destination host responds through a different path.

Answer: B

NEW QUESTION # 339

An engineer must deny ICMP traffic to the networks of separate departments that use Cisco Secure Firewall Management Center. The engineer must use the same object on the relevant device for each network. What must be configured in Secure Firewall Management Center?

- A. IP range
- B. Deny ICMP check box
- C. Allow Overrides check box
- D. IP address

Answer: C
