If you indeed have questions, just contact our online service stuff.

SAP Certified Associate - Validating Business Transformation Sample Questions (Q28-Q33):

NEW QUESTION # 28

What is the role of the SAP expert team during RISE implementation?

- A. To manage partners
- B. To perform legal due diligence
- C. To manage SAP licensing
- D. To offer guidance and project onboarding

Answer: D

NEW QUESTION # 29

What are the benefits offered by SAP Cloud ALM for businesses?

(3 correct answers)

- A. It supports process mining with plug & gain
- B. It is instantly available for use as a subscription service
- C. It is available to all customers with Enterprise Support Agreement or cloud contract
- D. It reduces TCO of the solution landscape
- E. It supports only cloud implementation scenarios

Answer: B,C,D

Explanation:

SAP Cloud ALM provides multiple operational and implementation benefits to businesses undergoing transformation. First, it is available to all customers who hold an SAP Enterprise Support Agreement or cloud subscription. This means there are no additional licensing fees, making Cloud ALM a highly accessible lifecycle management platform. Its broad availability encourages consistent adoption across organizations of all sizes.

Second, SAP Cloud ALM is instantly available as a cloud-native subscription service. There is no installation or infrastructure setup required. Customers can begin using Cloud ALM almost immediately after provisioning, accelerating project kickoff and reducing administrative overhead.

Third, one of its major benefits is that it reduces total cost of ownership (TCO) by minimizing on-premise infrastructure requirements and providing standardized, automated tools for monitoring, implementation, testing, and operations. This reduces the need for multiple separate ALM systems and allows customers to centralize lifecycle activities.

Option A is incorrect because process mining with Plug & Gain is a Signavio capability. Option D is incorrect because Cloud ALM supports both cloud and hybrid/on-premise scenarios through integration monitoring and operational support. Therefore, the correct benefits are B, C, and E.

NEW QUESTION # 30

What ensures that architecture documentation is aligned with business capability goals?

- A. Lifecycle Milestones
- B. Fact Sheet Owners
- C. Capability Mapping
- D. RACI Grid Builder

Answer: C

NEW QUESTION # 31

What ensures that architecture documentation is aligned with business capability goals?

- A. Lifecycle Milestones
- B. Fact Sheet Owners
- C. Capability Mapping
- D. RACI Grid Builder

Answer: C

Explanation:

Capability Mapping links business capabilities to applications, interfaces, and technologies. This mapping ensures that architectural artifacts remain connected to strategic business objectives. By organizing IT components according to the business capabilities they support, organizations can validate whether their architecture aligns with transformation goals and identify redundancy, gaps, or misalignment. Other options may support governance tasks, but only capability mapping directly assures alignment with business capabilities.

NEW QUESTION # 32

What is the SAP Readiness Check used for?

- A. Measuring test coverage
- B. Forecasting project revenue

- C. Assessing the landscape's readiness for transformation
- D. Verifying SAP license usage

Answer: C

Explanation:

SAP Readiness Check is a pre-transformation assessment tool used to evaluate whether an existing SAP system is prepared for a major transition, such as converting to SAP S/4HANA or adopting cloud-based operations. It reviews key areas like custom code usage, add-on compatibility, simplification items, data volume, and integration impacts. The purpose is to identify risks, scope the transformation effort, and provide a clear understanding of required preparation activities. It is not used for testing coverage, revenue prediction, or license audits.

NEW QUESTION # 33

.....
