AP-209시험패스가능한공부자료 - AP-209높은통과율시험덤프

여러분은 먼저 우리 DumpTOP사이트에서 제공되는Salesforce인증AP-209시험덤프의 일부분인 데모를 다운받으셔서 체험해보세요. DumpTOP는 여러분이 한번에Salesforce인증AP-209시험을 패스하도록 하겠습니다. 만약Salesforce인증AP-209시험에서 떨어지셨다고 하면 우리는 덤프비용전액 환불입니다.

Salesforce인증 AP-209시험을 패스하여 자격증을 취득하시면 찬란한 미래가 찾아올것입니다. Salesforce인증 AP-209인증시험을 패스하여 취득한 자격증은 IT인사로서의 능력을 증명해주며 IT업계에 종사하는 일원으로서의 자존심입니다. DumpTOP 의 Salesforce인증 AP-209덤프는 시험패스에 초점을 맞추어 제일 간단한 방법으로 시험을 패스하도록 밀어주는 시험공부가이드입니다.구매전Salesforce인증 AP-209무료샘플을 다운받아 적성에 맞는지 확인하고 구매할지 않할지 선택하시면 됩니다.

>> AP-209시험패스 가능한 공부자료 <<

높은 적중율을 자랑하는 AP-209시험패스 가능한 공부자료 공부자료

Salesforce인증사에서 주췌하는 AP-209시험은 IT업계에 종사하는 분이시라면 모두 패스하여 자격증을 취득하고 싶으리라 믿습니다. DumpTOP에서는 여러분이 IT인증자격증을 편하게 취득할수 있게 도와드리는 IT자격증시험대비 시험자료를 제공해드리는 전문 사이트입니다. DumpTOP덤프로 자격증취득의 꿈을 이루세요.

Salesforce AP-209 시험요강:

주제	소개
주제 1	• Optimization: This domain covers using service objectives for automated scheduling, global optimization engine capabilities, troubleshooting optimization issues, and strategies to improve scheduling quality and efficiency.
주제 2	• Mobile: This domain covers offline functionality in the Field Service Mobile app, mobile customization and extension options, technician management capabilities, and communication features between dispatchers, technicians, and customers.
주제 3	• Assets: This domain examines asset architecture including hierarchies and relationships, and strategies for tracking and managing customer assets throughout their lifecycle.
주제 4	• Implementation Strategies and Design: This domain covers the full consulting project lifecycle from planning and requirements gathering through deployment, and determining appropriate deployment strategies and licensing needs for Field Service implementations.

최신 Accredited Professional AP-209 무료샘플문제 (Q34-Q39):

질문 # 34

What should a consultant recommend to help a customer with their initiative to reduce their carbon footprint?

- A. Give 'Minimize Travel' Service Objective the highest weight.
- B. Remove the 'Match Location' Work Rule.
- C. Remove the 'ASAP' Service Objective.
- D. Add the 'Maximum Travel from Home' Work Rule.

정답：A

설명：
Reducing a carbon footprint in field service is primarily achieved by reducing the fuel consumption and distance driven by the fleet.
* Option B is correct.TheMinimize TravelService Objective calculates the travel distance/time for each potential appointment slot. By giving this objective thehighest weightin the Scheduling Policy, the optimization engine will aggressively prioritize schedules that have the shortest routes, even if it means sacrificing other metrics (like "ASAP" or "Preferred Resource"). Shorter routes directly equate to less driving and lower emissions.
* Option A (Remove ASAP) might help slightly by removing the urgency to book "now" (which can cause inefficient routing), but it doesn'tproactivelyoptimize for low mileage like Option B does.
* Option C (Maximum Travel Work Rule) is a hard limit (e.g., "Don't travel more than 50 miles"). While it prevents extreme outliers, it doesn't optimize the routeswithinthat radius.

질문 # 35

Which consideration should a consultant take when advising a customer on their Field Service Mobile App strategy, in a case where the Service Resources are named contractors who provide their own mobile devices?

- A. Field Service Mobile App is optimized for a handful of Android and iOS devices. Refer to 'Salesforce Help and Training' for the latest update
- B. Contractor licenses do not include access to the Field Service Mobile App
- C. Set all records to private to ensure customer data confidentiality
- D. Since all Service Resources are named contractors, 'Collect Service Resource Geolocation History' should be disabled

정답：A

설명：
When dealing with a Bring Your Own Device (BYOD) strategy (common with contractors), device compatibility is the biggest technical hurdle.
* Option B is correct.Salesforce explicitly publishes a list ofsupported devices and operating systems (iOS and Android versions)6.

Since the company does not own the phones, they cannot guarantee every contractor has a compatible device. The consultant must warn the client to check these specs against their contractors' hardware.
* Option Ais a policy decision, not a technical constraint. Youcantrack contractor location if they agree to it.
* Option Cis false; Contractor licenses (Community Plus)doinclude access to the Field Service Mobile App.

질문 # 36

A customer wants to assign work to Resources by postal code coverages, each Resource covering one or more postal codes. The solution must also support Scheduling and Optimization.
What should a consultant recommend to meet the customer's requirements?

- A. Define each postal code as a Service Territory, assign Resources through STM (Service Territory Member) record to the Territory they need to cover
- B. Model each postal code as a record in a custom object, and use the 'Extended Match' Work Rule to assign the Resources to Appointments within their postal code coverage using another custom junction object
- C. Model each postal code as a skill, assign the skill to the relevant Resources, and set the skill as a required skill for each Service Appointment within the postal code area
- D. Use 'Match Fields', set the relevant postal code coverage on the resources level and on the Service Appointment level

정답：B

설명：

Mapping resources to specific Zip Codes (which are not necessarily Service Territories) is a common high- volume requirement.
* Option A is correct.Creating a standard Service Territory foreverypostal code (Option D) creates a hierarchy that is too deep and hurts performance.
* Instead, modeling "Zip Code Coverage" as aCustom Object(or data table) allows for a cleaner data model. You then use theExtended Match Work Rule. This rule is highly flexible; it can verify that the Zip Code on the Service Appointment matches a record in the Zip Codes Covered related list on the Service Resource. This supports optimization without bloating the Territory or Skill tables.
* Option B (Match Fields)only works for 1-to-1 matching (e.g., The Resource hasonezip field). It cannot easily handle a resource covering 50 different zip codes unless you use the custom object approach described in A.

질문 # 37

Green Energy Solutions employs a field workforce and must ensure they have coverage to respond to emergencies, which may occur at any given time. GES' field service organization consists of several business units configured as Service Territories, of which a resource may support simultaneously.
Resources do not work in more than a single timezone at a given time, however, GES is looking for a solution to allow their resources to be available for emergency work in the off-hours, in all the territories that they may support.
Which solution should a consultant recommend?

- A. Create a shift for each Service Territory the Service Resource may belong to, set the time slot type to 'Designated' to apply to emergencies only, and verify that the shift is contained in the Primary Territory membership dates
- B. Create a shift for the Service Resource without a specified Service Territory, set the time slot type to 'Designated' and verify that the shift is contained in the Primary Territory membership dates
- C. Service Resources cannot be assigned to more than one Service Territory
- D. Create a shift for the Service Resource without a specified Service Territory, use recordset filter criteria to apply to emergencies only, and verify that the shift is contained in the Primary Territory membership dates

정답：B

설명：

This scenario requires managing availability for resources who work across multiple territories (Primary and Secondary memberships) specifically for "off-hours" emergencies.
* Option D is correctbecause Shifts in Salesforce Field Service allow you to define ad-hoc availability outside of standard Operating Hours. Crucially, if you create a Shiftwithout specifying a Service Territory, that availability applies to the resource'sPrimary Territoryby default. However, because the resource also holdsSecondary Territory Membershipsfor the other business units, the scheduling engine (specifically the "Match Territory" Work Rule) recognizes this availability as valid for those territories as well, provided the shift falls within the membership dates.
* Setting the Time Slot Type to'Designated'(or 'Extended') is the standard way to mark time for specific work types (like Emergencies) using Work Rules that filter on those time slot types.

* Option B is incorrect because creating a separate shift foreveryterritory is administrative overhead and unnecessary when a single non-territory-specific shift can cover the resource's availability across their memberships.
* Option A is factually incorrect; resources can have multiple territory memberships.

질문 # 38

Universal Containers (UC) sell Service Contracts to their customers. One of the terms of the Service Contract determines that a UC technician will perform annual maintenance on all the customer's Assets until the contract expires.

UC would like to ensure that when a technician is sent to the customer, the maintenance work is completed in a single visit, and all covered Assets are listed on the Work Order's Service Report.

What Maintenance Plan configuration should a consultant recommend UC?

* A. 'Work Order Generation Method' is set to 'One Work Order per Asset' and 'Service Appointment Generation Method' is set to 'One Service Appointment per Work Order'
* B. 'Work Order Generation Method' is set to blank and 'Service Appointment Generation Method' is set to 'One Service Appointment per Work Order'
* C. 'Work Order Generation Method' is set to 'One Work Order Line Item per Asset' and 'Service Appointment Generation Method' is set to 'One Service Appointment per Work Order'
* D. 'Work Order Generation Method' is set to 'One Work Order Line Item per Asset' and 'Service Appointment Generation Method' is set to 'One Service Appointment per Work Order Line Item'

정답：C

설명：

This question tests the Maintenance Plan generation logic.
* Option D is correct.The requirement isSingle Visit(One Appointment) forMultiple Assets.
* One Work Order Line Item per Asset:This groups all the assets under asingleparent Work Order. Each asset gets its own line item (WOLI) for tracking purposes.
* One Service Appointment per Work Order:This creates asingleappointment for the parent Work Order. The technician arrives once and works through the list of line items (Assets).
* Option B("One Work Order per Asset") would create separate Work Orders (and likely separate Appointments) for every single asset, resulting in multiple visits or a cluttered schedule.
* Option C("One SA per WOLI") would explicitly create a separate appointment for every single asset line item, causing massive double-booking/overlap.
