

Exam L3M6 Study Solutions & L3M6 Test Certification Cost

P.S. Free 2026 CIPS L3M6 dumps are available on Google Drive shared by TestSimulate: https://drive.google.com/open?id=1OAHc_z56o_3oUIj5T9Mr8feSpXHbcbWl

Before the clients decide to buy our L3M6 study materials they can firstly be familiar with our products. The clients can understand the detailed information about our products by visiting the pages of our products on our company’s website. Firstly you could know the price and the version of our L3M6 study materials, the quantity of the questions and the answers, the merits to use the products, the discounts, the sale guarantee and the clients’ feedback after the sale. Secondly you could look at the free demos to see if the questions and the answers are valuable. You only need to fill in your mail address and you could download the demos immediately. So you could understand the quality of our L3M6 Study Materials.

CIPS L3M6 Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"> Understand the Environmental Impact of Procurement and Supply: This section evaluates the skills of Supply Chain Analysts in understanding how procurement affects the environment. It explores global challenges such as balancing globalization with green logistics, public awareness, external pressures, and international regulations. The environmental impact of transportation and storage is covered, including air pollution, carbon footprint calculations, noise pollution, accidents, and land use. Additionally, it highlights the government's role in promoting sustainability through policies like greener transport modes, energy efficiency, and emission reduction. |
| Topic 2 | <ul style="list-style-type: none"> Understand Methods for the Storage and Movement of Inventory: This section assesses the expertise of Warehouse Managers in inventory storage and movement methods. It includes principles of warehouse design, focusing on location, layout factors such as flow and space utilization, and flexibility. It also explains various types of warehousing equipment like material handling systems, palletization techniques, packaging standards, and automation technologies that align with environmental standards. |

| | |
|---------|--|
| Topic 3 | <ul style="list-style-type: none"> • Understand the Environmental Impact of Warehousing and Distribution: This section targets Logistics Coordinators and examines how warehousing and distribution contribute to environmental challenges. Topics include air pollution, carbon footprint, noise pollution, accidents, land use, and visual intrusion. It also discusses the environmental costs associated with logistics activities such as greenhouse gas emissions and global warming and strategies to mitigate these impacts. The role of government policies in sustainable logistics is emphasized, including reducing freight intensity, improving utilization rates, promoting greener transport modes, enhancing energy efficiency, and cutting emissions. |
| Topic 4 | <ul style="list-style-type: none"> • Understand the Concepts of Sustainability and Corporate Social Responsibility (CSR): This section of the exam measures the knowledge of Procurement Specialists and covers the foundational concepts of sustainability and CSR. It explains how sustainability involves meeting present needs without compromising future generations' ability to do the same. The focus extends beyond traditional economic criteria, incorporating environmental and social impacts into procurement decisions. CSR emphasizes extending corporate goals to include social responsibility, promoting good citizenship, and encouraging positive impacts on stakeholders, including social, economic, and cultural diversity. |

CIPS L3M6 Test Certification Cost - L3M6 Exam Quick Prep

Our L3M6 study materials can come today. With so many loyal users, our good reputation is not for nothing. To buy our L3M6 exam braindumps, you don't have to worry about information leakage. Selecting a brand like L3M6 learning guide is really the most secure. And we are responsible and professional to protect your message as well. At the same time, if you have any problem when you buy or download our L3M6 Practice Engine, just contact us and we will help you in a minute.

CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q168-Q173):

NEW QUESTION # 168

What does A-G-V stand for?

- **A. Automated guided vehicles**
- B. Aerodynamic guided vehicles
- C. Aerodynamic green vehicles
- D. Automated green vehicles

Answer: A

Explanation:

A-G-V stands for Automated Guided Vehicles, which are robotic vehicles used in warehouses and distribution centers to transport materials without human intervention. These vehicles follow predefined paths, often guided by magnetic strips, lasers, or sensors, to move inventory efficiently. The CIPS L3M6 syllabus highlights AGVs as part of automated material handling systems, which improve efficiency, reduce labor costs, and enhance safety by minimizing human involvement in repetitive tasks. Options like "Aerodynamic green vehicles" or "Automated green vehicles" may sound plausible but are incorrect as they do not align with the standard terminology used in warehousing contexts.

NEW QUESTION # 169

Which group of influencers is concerned with how it impacts them, society, and the environment, including air quality, marine pollution, solid waste and landfills, toxicity and the use of pesticides, water quality, and deforestation?

- **A. Consumers**
- B. Governments
- C. Activists

Answer: A

Explanation:

Consumers (B) care about personal, societal, and environmental impacts, per the CIPS L3M6 syllabus. Activists (A) focus on advocacy, and governments (C) on regulation. Consumer preferences drive CSR in logistics.

Reference:

NEW QUESTION # 170

Of all the transport emissions, what percentage comes from rail, civil aviation, domestic maritime transport, and other methods of transport?

- A. 65%
- B. 95%
- C. 5%
- D. 35%

Answer: C

Explanation:

Of total transport emissions (13% of global GHGs), 5% comes from rail, aviation, maritime, and other modes combined, per CIPS L3M6 data aligned with IPCC estimates. Road transport dominates (95% of transport emissions), leaving these modes as a smaller share. This informs LO2's focus on targeting road logistics for the biggest emission reductions.

Reference:

NEW QUESTION # 171

Shareholders want to obtain maximum return on investment, and therefore it is not a priority for them to behave in a responsible way.

- A. FALSE
- B. TRUE

Answer: A

Explanation:

While shareholders seek high ROI, responsibility is increasingly a priority. The CIPS L3M6 module notes that modern shareholders- especially institutional investors- value sustainability, as irresponsible behavior (e.g., pollution scandals) risks long-term profitability and reputation. For example, fossil fuel divestment trends show shareholders pushing for green practices. This falsifies the statement, aligning with LO2's view that environmental responsibility enhances, rather than detracts from, financial success.

NEW QUESTION # 172

The system by which organizations are directed and controlled is known as what?

- A. Collaborative Governance
- B. Combined Governance
- C. Communal Governance
- D. Corporate Governance

Answer: D

Explanation:

Corporate Governance is the system of rules, policies, and practices by which organizations are directed and controlled. It ensures accountability, transparency, and ethical conduct, supporting CSR and sustainability. The CIPS L3M6 module defines it as foundational to responsible business management.
