## Hot FCP\_FMG\_AD-7.6 Study Demo | Reliable Fortinet Valid Study FCP\_FMG\_AD-7.6 Questions: FCP - FortiManager 7.6 Administrator

The ActualTorrent is one of the leading brands that have been helping Fortinet FCP\_FMG\_AD-7.6 Certification aspirants for many years. Hundreds of Fortinet FCP - FortiManager 7.6 Administrator exam applicants have achieved the FCP - FortiManager 7.6 Administrator in Procurement and Supply Fortinet certification. All these successful Fortinet test candidates have prepared with real

and updated FCP - FortiManager 7.6 Administrator in Procurement and Supply Fortinet Questions of ActualTorrent. If you also want to become FCP - FortiManager 7.6 Administrator in Procurement and Supply Fortinet certified, you should also prepare with our Fortinet FCP - FortiManager 7.6 Administrator actual exam questions.

## Fortinet FCP\_FMG\_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Troubleshooting</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.</li></ul>

## Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q55-Q60):

### NEW QUESTION # 55

An administrator, Trainer, who is assigned the Super\_User profile, is trying to approve a workflow session that was submitted by another administrator, Student. However, Trainer is unable to approve the workflow session.

What can prevent an admin account that has Super\_User rights over the device from approving a workflow session?

- **A. Trainer is not a part of workflow approval group.**
- B. Trainer must first create their own workflow session to approve student session.
- C. Trainer must close Student's workflow session before approving the request.
- D. Trainer does not have full rights over this ADOM.

**Answer: A**

Explanation:

An administrator must be part of an approval group, and have rights over the ADOM in which the session was created.

### NEW QUESTION # 56

An administrator assigned the Training global policy package to the Branches policy package in ADOM1. Later, the administrator created a new policy package named Remotes on ADOM1.

What should the administrator do to sync the Training global policy package with the Remotes policy package in ADOM1?

- **A. Assign the Training global policy package to the Remotes policy package**
- B. Unassign the Training policy package and reassign it to all policy packages within ADOM1
- C. Manually add and assign the Remotes policy package to the Training global policy package
- D. Use the automatically install policies to ADOM devices method to sync from the Training global policy package to the Remotes policy package

**Answer: A**

Explanation:

In FortiManager, global policy packages are not automatically assigned to new policy packages created in an ADOM. To apply a global policy (like "Training") to a new policy package (like

"Remotes"), the administrator must manually assign the global policy to that policy package.

Therefore, the correct step is to assign the Training global policy package to the Remotes policy package.

### NEW QUESTION # 57

An administrator configures a new BGP peer in the FortiManager device-level database of FortiGate. They reinstall the policy package to the managed FortiGate device without any errors. However, when the administrator logs in to FortiGate, they do not see the BGP configuration changes.

What is the most likely reason why FortiManager did not push the BGP peer changes to FortiGate?

- A. Fortigate has a BGP template assigned on the FortiManager database.
- B. The FortiGate firmware version is different from the FortiManager ADOM version.
- C. The administrator must use the Install Wizard and select Install device settings only to push BGP settings
- D. The administrator must run a sanity check on FortiManager to make sure the database is not corrupted.

**Answer: A**

Explanation:

If a BGP template is assigned to the FortiGate device on FortiManager, device-level BGP configurations made directly in the device-level database are overridden by the template settings, so the changes do not get pushed to the device.

### NEW QUESTION # 58

You are moving managed FortiGate devices from one ADOM to a new ADOM.

Which statement correctly describes the expected result?

- A. The shared policy package will not be moved to the new ADOM automatically.
- B. The shared device settings will be installed automatically.
- C. Policy packages will be imported into the new ADOM automatically.
- D. Any unused objects from a previous ADOM are moved to the new ADOM automatically.

**Answer: A**

Explanation:

When you move devices from one ADOM to another ADOM, shared policy packages and objects do not move to the new ADOM. You will need to import policy packages from managed devices.

### NEW QUESTION # 59

The administrator uses FortiManager to push a CLI script using the Remote FortiGate Directly (via CLI) option to configure an IPsec VPN. However, when running the script, the administrator receives the following error:

config vpn ipsec phase2-interface [parameter(s) invalid. detail: object mismatch] What must the administrator do to resolve the script error and successfully apply the IPsec configuration?

- A. Add the end command after finishing the IPsec phase 1-interface configuration block.
- B. Run the script using the policy package or ADOM database method.
- C. Add a second config vpn ipsec phase2-interface block without linking it to phase1.
- D. Use IPsec templates to deploy provisioning templates.

**Answer: B**

Explanation:

When you execute a script directly on a device, the changes are automatically applied on the device. You do not need to take any further action to apply the changes; however, you cannot preview the changes before they are applied.

### NEW QUESTION # 60

.....

Our Fortinet FCP\_FMG\_AD-7.6 training materials are compiled by professional experts. All the necessary points have been mentioned in our FCP - FortiManager 7.6 Administrator FCP\_FMG\_AD-7.6 practice engine particularly. About some tough questions or important points, they left notes under them. Besides, our experts will concern about changes happened in FCP - FortiManager 7.6 Administrator FCP\_FMG\_AD-7.6 study prep all the time.
