NEW QUESTION # 139

Which of the following is a disadvantage of template-based work products?

- A. The structure is not reusable.
- B. Requirements do not look uniform.
- C. Not-included aspects are likely to be omitted.
- D. There are no real disadvantages.

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
Template-based documents and forms enforce a common structure, making requirements more uniform (contradicting A) and inherently reusable across projects (contradicting B). However, they have notable downsides: people may focus on filling the template rather than thinking deeply about content, and any aspect not explicitly represented by a field in the template tends to be overlooked. This can lead to missing important information. Therefore option D correctly captures a documented disadvantage; C is obviously false because the syllabus explicitly lists cons.
