1z0-1080-25 Online Test & Reliable 1z0-1080-25 Test Duration

There are more opportunities for possessing with a certification, and our 1z0-1080-25 study materials are the greatest resource to get a leg up on your competition, and stage yourself for promotion. When it comes to our time-tested 1z0-1080-25 study materials, for one thing, we have a professional team contains a lot of experts who have devoted themselves to the research and development of our 1z0-1080-25 Study Materials, thus we feel confident enough under the intensely competitive market. For another thing, conforming to the real exam our 1z0-1080-25 study materials have the ability to catch the core knowledge.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 2	• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 3	• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 4	• Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 5	• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.

Topic 6	• Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 7	• Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 8	• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 9	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 10	• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 11	• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 12	• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Topic 13	• Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.
Topic 14	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 15	• Design business rules and rulesets":his section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 16	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 17	• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 18	• Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 19	• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 20	• Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 21	• Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 22	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.

Reliable 1z0-1080-25 Test Duration, Valid 1z0-1080-25 Exam Sample

VCEEngine allows all visitors to try a free demo of 1z0-1080-25 pdf questions and practice tests to assess the quality of our 1z0-1080-25 study material. Your money is 100% secure as we will ensure that you crack the Oracle 1z0-1080-25 test on the first attempt. You will also enjoy 24/7 efficient support from our customer support team before and after the purchase of Oracle 1z0-1080-25 Exam Dumps. If you face any issues while using our 1z0-1080-25 PDF dumps or 1z0-1080-25 practice exam software (desktop and web-based), contact VCEEngine customer service for guidance.

Oracle Planning 2025 Implementation Professional Sample Questions (Q103-Q108):

NEW QUESTION # 103
Which three statements are true about importing metadata from a flat file into Planning?

- A. You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server.
- B. When selecting to clear members during import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or is a base member of a shared member that was specified.
- C. Your import file must contain a list of metadata records. Each metadata record contains a delimited list of property values that matches the order designated in the header record.
- D. You can rename or delete members of attribute dimensions during a metadata import.
- E. You can use the import file functionality to import more metadata or to perform incremental updates from the source system.

Answer: B,C,E

Explanation:
In Oracle Planning 2024, importing metadata from a flat file into Planning involves specific rules and capabilities. The three true statements are:
* A. You can rename or delete members of attribute dimensions during a metadata import: Incorrect.
Metadata imports update dimension members (e.g., adding, updating properties), but renaming or deleting attribute dimension members is not directly supported via flat file import-it requires manual action or a separate process.
* B. You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server:
Incorrect. Flat file imports are for metadata (e.g., dimensions, members), not artifacts like forms, dashboards, or infolets, which are managed via Migration or Application tools.
* C. Your import file must contain a list of metadata records. Each metadata record contains a delimited list of property values that matches the order designated in the header record: Correct. The import file format requires a header defining properties (e.g., Name, Parent) and subsequent records with delimited values (e.g., CSV) matching that order, a standard requirement for metadata imports.
* D. When selecting to clear members during import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or is a base member of a shared member that was specified:
Correct. When the "Clear Members" option is selected, unspecified members are removed, but ancestors of specified members and base members of shared members are retained to maintain hierarchy integrity.
* E. You can use the import file functionality to import more metadata or to perform incremental updates from the source system:
Correct. Metadata imports support both full loads and incremental updates, allowing administrators to add or modify members as needed from a source system.
The Oracle documentation verifies that C, D, and E accurately describe the metadata import process, making them the correct answers.
References:
Oracle Planning 2024 Implementation Study Guide: "Importing Metadata from Flat Files" (docs.oracle.com, Published 2024-10-05).
Oracle EPM Cloud Documentation: "Metadata Import Guidelines" (docs.oracle.com, Published 2023-11-25, updated for 2024).

NEW QUESTION # 104
Your administrator creates a Pipeline definition to manage metadata, and data for your Planning application.
Which statement about pipelines is true?

- A. Use pipelines to coordinate the running of a series of jobs as a single process.
- B. Develop pipelines to guide you through the Planning process.

- C. Quickly drill into data slices that are important to you with pipelines.
- D. Use pipelines as a visible, automated, and repeatable system of record for running an application.

Answer: A

Explanation:
In Oracle Planning 2024, a Pipeline is a feature that allows administrators to define and automate a sequence of jobs (e.g., data imports, metadata updates, calculations) as a single, coordinated process. Pipelines streamline the management of metadata and data by executing multiple tasks in a specified order, ensuring dependencies are met, and providing a repeatable workflow for maintaining the Planning application.
* A. Develop pipelines to guide you through the Planning process: Incorrect. Pipelines are not a planning guide; they are an automation tool for executing jobs, not a process framework.
* B. Use pipelines as a visible, automated, and repeatable system of record for running an application:
Incorrect. While pipelines are automated and repeatable, they are not a "system of record" for running the entire application-they focus on specific job sequences.
* C. Use pipelines to coordinate the running of a series of jobs as a single process: Correct. This aligns with the Oracle definition of pipelines, which orchestrate multiple jobs (e.g., import data, refresh database) into one executable process.
* D. Quickly drill into data slices that are important to you with pipelines: Incorrect. Pipelines are not designed for data analysis or drilling into data slices; they are for job automation.
The Oracle documentation emphasizes that pipelines are used to manage and execute a series of jobs efficiently, making C the true statement.

30, updated for 2024).

NEW QUESTION # 105
You want to select a probability distribution for your Strategic Modeling simul-ation. The minimum and maximum are fixed, and you know the most likely values.
Which probability distribution is useful with limited data in situations such as sales estimates, inventory numbers, and marketing costs in Strategic Modeling simul-ations?

- A. Triangular
- B. Lognormal
- C. Uniform
- D. Beta PERT
- E. Normal

Answer: A

Explanation:
In Oracle Planning 2024's Strategic Modeling simulations, selecting a probability distribution for scenarios with fixed minimum and maximum values and a known most likely value (e.g., sales estimates, inventory, marketing costs) points to:
* A. Beta PERT: Incorrect. Beta PERT uses min, max, and most likely values but requires more data to shape the curve accurately, making it less ideal with limited data.
* B. Uniform: Incorrect. Uniform assumes equal probability between min and max, ignoring the most likely value, which doesn't fit this scenario.
* C. Triangular: Correct. The Triangular distribution uses minimum, maximum, and most likely values, making it simple and effective for limited data situations like sales or costs.
* D. Normal: Incorrect. Normal requires mean and standard deviation, not just min, max, and most likely, and assumes more data availability.
* E. Lognormal: Incorrect. Lognormal is skewed and suited for data with a positive range, requiring more statistical input than provided here.
The Oracle documentation recommends the Triangular distribution for its simplicity and suitability with limited data, making C the correct answer.

oracle.com, Published 2024-10-25).
Oracle EPM Cloud Documentation: "Simulation Distributions" (docs.oracle.com, Published 2023-11-30, updated for 2024).

NEW QUESTION # 106

Which two statements are true regarding what you can do when configuring insights?

- A. Use prediction results as input for generating insights.
- B. Define insights for up to 1000 data intersections.
- C. Select either a single type of insight or multiple types of insights.
- D. Create and edit data views to customize the display on the dashboard.

Answer: A,C

NEW QUESTION # 107

Which card in the Application cluster allows you to enable modules?

- A. Enable Features
- B. Configure
- C. Settings
- D. Cube Editor
- E. Tools

Answer: B

Explanation:

In Oracle Planning 2024, the Application cluster in the navigator includes cards for managing application settings and features. The card that allows you to enable modules (e.g., Workforce, Projects) is:

* A. Settings: Incorrect. Settings is not a card in the Application cluster; it's typically a broader system- level option, not specific to module enablement.

* B. Configure: Correct. The Configure card in the Application cluster provides access to the Enable Features page, where administrators can turn on modules like Financials, Workforce, or Projects.

* C. Tools: Incorrect. The Tools card offers utilities (e.g., diagnostics, job scheduling), not module enablement.

* D. Enable Features: Incorrect. While "Enable Features" is the specific action/page, it is accessed via the Configure card, not a standalone card in the Application cluster.

* E. Cube Editor: Incorrect. Cube Editor is for managing cube structures (e.g., dimensions), not enabling modules.

The Oracle documentation specifies that the Configure card is the entry point for enabling modules, making B the correct answer.
