C_BCBTM_2509模擬対策問題、C_BCBTM_2509復習教材

国際的に認められているC_BCBTM_2509認定は、特定の分野の知識を十分に活用できることを意味するのは当然です。ワークロードに圧倒され、息を吸うことができない場合、C_BCBTM_2509準備トレントを選択してみませんか？ 私たちは、最も信頼性が高く正確な試験資料をお客様に提供することに特化しており、お客様が満足のいくスコアを達成することで試験に合格できるよう支援しています。C_BCBTM_2509練習教材を使用すると、試験は簡単になります。

SAP Certified Associate - Positioning SAP Business Transformation Management Solutions 認定 C_BCBTM_2509 試験問題 (Q13-Q18):

質問 # 13

What is the primary function of SAP Signavio Process Intelligence?

- A. A cloud-based process modeling tool for documenting workflows.
- B. An ERP system for managing financial transactions.
- C. A collaboration platform for managing business decisions.
- D. A process mining solution that provides process analytics and insights.

正解: D

解説:

SAP Signavio Process Intelligence is the process mining and analytics component of the SAP Signavio Business Transformation

Suite. It allows organizations to analyze real process data to identify inefficiencies and improvement opportunities.
 "SAP Signavio Process Intelligence is a process mining solution that enables customers to analyze and visualize process flows, uncovering performance issues and improvement opportunities." Reference:
 It connects to operational systems, extracts event logs, and reconstructs end-to-end business processes to deliver data-driven process insights.
 "The solution provides process analytics and actionable insights by comparing actual process execution data against designed models." Incorrect Options:
 A: Refers to SAP Signavio Process Manager, not Process Intelligence.
 B: SAP Signavio is not an ERP; it integrates with SAP ERP systems for analysis.
 C: Collaboration capabilities are provided via SAP Signavio Collaboration Hub, not Process Intelligence.
 Therefore, the verified and correct answer based on SAP's official documentation is:
 D: A process mining solution that provides process analytics and insights.

質問 # 14

What is the primary benefit of using SAP Business Transformation Management solutions early in a RISE project?
 (Note: There are 2 correct answers to this question.)

- A. They automate non-critical business functions without supporting overall ERP transformation.
- **B. They make ERP transformations more cost efficient by providing faster insights into operations.**
- **C. The earlier the solutions are leveraged in a transformation project, the more value they can generate.**
- D. They are primarily focused on human resources management.

正解: B、C

解説:

Leveraging SAP Business Transformation Management (BTM) Solutions early in a RISE with SAP project allows organizations to gain critical insights into their existing processes, applications, and technology landscape. This helps accelerate transformation readiness and reduces rework during design and implementation.

"Early adoption of SAP BTM Solutions within RISE projects maximizes value by providing transparency and actionable insights into business processes and IT landscapes, ensuring cost-efficient and faster ERP transformation." Reference:

Early Value Realization (Answer A):

The earlier BTM tools such as SAP Signavio, SAP LeanIX, and WalkMe are applied, the faster organizations can identify inefficiencies and define transformation scope, which increases long-term value generation.

"The earlier SAP BTM tools are introduced, the more transformation value can be realized through early visibility, stakeholder alignment, and optimized process design." Cost Efficiency through Faster Insights (Answer B):

SAP BTM solutions provide data-driven visibility into as-is processes and dependencies, enabling companies to reduce transformation costs by addressing inefficiencies early.

"SAP BTM enables customers to accelerate decision-making and reduce transformation cost and effort through real-time operational insights." Incorrect Options:

C: BTM solutions do not focus on non-critical automation; they support end-to-end ERP transformation.

D: They are not specific to HR; they span all business domains (Finance, Supply Chain, IT, etc.).

Therefore, the verified and correct answers are:

A: The earlier the solutions are leveraged in a transformation project, the more value they can generate.

B: They make ERP transformations more cost efficient by providing faster insights into operations.

質問 # 15

What is the SAP Signavio Process Manager?

- A. A software for managing customer relationships and sales pipelines.
- B. A tool for automating financial transactions in ERP systems.
- **C. A cloud-based tool for designing, modeling, and improving business processes.**
- D. An analytics solution for process mining and data analysis.

正解: C

解説:

SAP describes SAP Signavio Process Manager as a collaborative, browser-based BPM tool focused on process design and improvement:

"SAP Signavio Process Manager is a cloud-based solution to model, document, and optimize business processes collaboratively

using BPMN 2.0." Reference:

Option B confuses it with a different product in the same portfolio. SAP states that process mining sits in SAP Signavio Process Intelligence (not Process Manager):

"SAP Signavio Process Intelligence is the process mining and analytics solution of the SAP Signavio portfolio." Option C refers to ERP transaction automation, which is not the scope of Process Manager. SAP positions Process Manager for process modeling and documentation, not transaction execution/automation:

"Use SAP Signavio Process Manager to design and document processes and drive process improvement; execution of transactions is handled by operational systems (e.g., ERP)." Option D is about CRM. SAP clarifies that CRM and sales pipeline management are covered by customer experience/CRM solutions, not by Process Manager:

"Process Manager provides process modeling and governance, not CRM pipeline management."

質問 # 16

What makes SAP Signavio and SAP LeanIX a powerful combination?

(Note: There are 2 correct answers to this question.)

- A. Both solutions focus on transforming businesses from a current state to a future state.
- B. We can reduce the time for financial reporting by 70% on average.
- C. We can help our customers lay off 20 to 30 percent of their workforce and therefore reduce costs tremendously.
- D. They help our customers understand the important aspects of a transformation: processes, people, systems, and applications.

正解: A、D

解説:

The integration of SAP Signavio and SAP LeanIX provides a complete business and IT transformation view, connecting processes and enterprise architecture to enable end-to-end transparency and alignment.

"The combination of SAP Signavio and SAP LeanIX helps organizations understand how their business processes and IT landscapes interact, ensuring seamless transformation from the current to the target state." Reference:

Transforming from Current to Future State (Answer A):

SAP Signavio focuses on business process transformation, while SAP LeanIX manages IT architecture and application landscapes.

Together, they help organizations move from as-is to to-be states with data-driven clarity.

"Both solutions support transformation by mapping the current state of processes and technology and defining the future state to align with business goals." Understanding Processes, People, Systems, and Applications (Answer B):

The combined solution helps organizations identify interdependencies between business processes, IT systems, and people, a critical factor for successful digital transformation.

"SAP Signavio and LeanIX provide 360-degree visibility into the transformation landscape - processes, systems, and people - to drive coordinated change." Incorrect Options:

C: Workforce reduction is not an SAP transformation objective.

D: Financial reporting speed is not the focus of these tools.

Verified Correct Answers: A and B.

質問 # 17

How does the SAP Signavio Process Collaboration Hub help organizations?

- A. By replacing existing process modeling tools with AI-driven automation.
- B. By creating marketing strategies based on customer feedback.
- C. By automatically generating legal compliance reports and enabling collaboration.
- D. By providing transparency into processes and enabling collaboration.

正解: D

解説:

The SAP Signavio Process Collaboration Hub is designed to make business processes transparent and accessible across the organization while fostering collaboration among stakeholders.

"The SAP Signavio Process Collaboration Hub provides a central entry point for all users to access, share, and collaborate on process-related information, offering transparency across business processes." Reference:

It allows employees, analysts, and management to view, discuss, and contribute to process improvement initiatives, supporting collaborative transformation and process governance.

"It enables everyone in the organization to access process information, provide feedback, and collaborate for continuous

improvement." Options A, C, and D are incorrect:

A: Compliance reporting is not a function of Collaboration Hub.

C: Marketing strategy and customer feedback analysis are outside its purpose.

D: It does not replace modeling tools; it integrates with Process Manager and Process Intelligence.

Thus, the correct and SAP-verified answer is B: By providing transparency into processes and enabling collaboration.
