

Exam E_S4CPE_2405 Simulator Free, E_S4CPE_2405 Reliable Exam Labs

P.S. Free & New E_S4CPE_2405 dumps are available on Google Drive shared by Prep4King: https://drive.google.com/open?id=1fKCJuGiTnURVsIuWrq_RHpaAO1aYJakP

Our E_S4CPE_2405 study guide has three formats which can meet your different needs: PDF, software and online. If you choose the PDF version, you can download our study material and print it for studying everywhere. With our software version of E_S4CPE_2405 exam material, you can practice in an environment just like the real examination. And you will certainly be satisfied with our online version of our E_S4CPE_2405 training quiz. It is more convenient for you to study and practice anytime, anywhere.

SAP E_S4CPE_2405 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Extensibility, Integration, and Clean Core: This section of the exam measures skills of integration specialists and involves understanding the principles of extending SAP functionality without compromising the clean core approach. It includes integrating SAP with other systems, maintaining system integrity, and ensuring sustainable customizations.
Topic 2	<ul style="list-style-type: none">System Landscapes and Identity Access Management: This section of the exam measures skills of system administrators and focuses on designing and managing SAP system landscapes while ensuring secure and efficient identity access management. It includes concepts related to system environments, user authentication, and authorization controls.
Topic 3	<ul style="list-style-type: none">Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of project managers and emphasizes the importance of adopting a cloud-first approach when implementing SAP solutions. It also includes building the right implementation team and running fit-to-standard workshops to align system configuration with best practices and standard business processes.

E_S4CPE_2405 Reliable Exam Labs & E_S4CPE_2405 Latest Braindumps Pdf

The SAP E_S4CPE_2405 is available in three easy-to-use forms. The first one is SAP E_S4CPE_2405 dumps PDF format. It is printable and portable. You can print SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition (E_S4CPE_2405) questions PDF or access them via your smartphones, tablets, and laptops. The PDF format can be used anywhere and is essential for students who like to learn on the go.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q22-Q27):

NEW QUESTION # 22

Where do you create test cases in SAP Cloud ALM to document formal tests?

- A. Test Execution app
- B. Test Preparation app
- **C. Test Plan app**
- D. Manage Your Test Processes app

Answer: C

NEW QUESTION # 23

Which activity in situation handling is exclusively available for the extended framework?

- A. Adapt predelivered situation handling templates to business requirements
- B. SAP Fiori application extensions
- **C. Develop custom situation handling templates**
- D. Navigate from notification to the app where the situation occurred to get more info and resolve
- E. Collect situation data to prepare the automated response

Answer: C

Explanation:

Situation handling in SAP S/4HANA Cloud Private Edition provides a framework to proactively inform users about specific business situations requiring attention. Within this framework, certain activities are exclusive to the extended framework:

Option A: Adapt predelivered situation handling templates to business requirements This option is incorrect. Adapting predelivered templates is available in both the standard and extended frameworks.

Option B: Navigate from notification to the app where the situation occurred to get more info and resolve This option is incorrect. This navigation capability is a standard feature in situation handling.

Option C: Develop custom situation handling templates

This option is correct. The extended framework allows for the development of custom situation templates tailored to specific business needs, a feature not available in the standard framework.

Option D: Collect situation data to prepare the automated response

This option is incorrect. Data collection for automated responses is part of the standard framework.

In summary, the ability to develop custom situation handling templates is an activity exclusively available in the extended framework of situation handling in SAP S/4HANA Cloud Private Edition.

Situation handling in SAP S/4HANA Cloud Private Edition notifies users of issues or opportunities (e.g., delays, stock shortages). The extended framework enhances this with advanced capabilities. Let's analyze:

* A. Adapt predelivered situation handling templates to business requirements: This is incorrect.

Adapting pre-delivered templates is available in both the standard and extended frameworks, not exclusive to the extended one.

* B. Navigate from notification to the app where the situation occurred to get more info and resolve

This is incorrect. Navigation from notifications to apps is a standard feature across both frameworks, not exclusive to the extended framework.

* C. Develop custom situation handling templates: This is correct. The extended framework allows developers to create fully custom situation handling templates (e.g., using ABAP or BTP tools), offering greater flexibility beyond adapting pre-delivered templates.

This is exclusive to the extended framework in Private Edition.

* D. Collect situation data to prepare the automated report: This is incorrect and incomplete (likely a typo for "report"). Collecting situation data is a standard feature, not exclusive to the extended framework.

* E. SAP Fiori application extensions: This is incorrect. While Fiori extensions can enhance situation handling, this option is unrelated to the situation handling framework's exclusivity and is a general extensibility feature.

In summary, C (Develop custom situation handling templates) is exclusively available in the extended framework.

NEW QUESTION # 24

Where do you find industry cloud solutions to address a customer's unique requirement?

- A. SAP Business Technology Platform
- B. SAP Signavio Process Navigator
- C. SAP Discovery Center
- D. SAP Store

Answer: D

Explanation:

Industry cloud solutions are prebuilt, industry-specific applications or extensions developed by SAP and its partners to address unique customer requirements beyond the standard SAP S/4HANA functionality. Let's analyze where these can be found:

* A. SAP Signavio Process Navigator: This tool provides process models, best practices, and reference content for SAP solutions, including SAP S/4HANA. While it helps with process discovery and optimization, it does not serve as a marketplace for finding or acquiring industry cloud solutions.

* B. SAP Store: This is the correct answer. The SAP Store (store.sap.com) is the official online marketplace where customers can find, try, and buy industry cloud solutions developed by SAP and its ecosystem of partners. These solutions are tailored to specific industries (e.g., manufacturing, retail) and integrate with SAP S/4HANA Cloud Private Edition, often leveraging SAP Business Technology Platform (BTP). SAP documentation highlights the SAP Store as the go-to source for such offerings.

* C. SAP Discovery Center: This platform provides information about SAP Business Technology Platform (BTP) services, missions, and use cases, including industry-specific scenarios. While it offers insights and starting points for building custom solutions, it is not a marketplace for prebuilt industry cloud solutions, making it incorrect here.

* D. SAP Business Technology Platform (BTP): BTP is a platform for extending and customizing SAP solutions (e.g., via integration, analytics, or extensions). While industry cloud solutions may be built on BTP, the platform itself is not a source for finding or purchasing them—it's a technical foundation rather than a marketplace.

In conclusion, the SAP Store is where you find industry cloud solutions to address a customer's unique requirements.

NEW QUESTION # 25

What is identified in a customer's system through the SAP Readiness Check? Note: There are 2 correct answers to this question.

- A. Recommended SAP Business Technology Platform services
- B. Recommended SAP Business Accelerator Hub prebuilt integration content
- C. Related simplification items and corresponding compatibility packages
- D. Overview of financial data quality

Answer: C,D

Explanation:

The SAP Readiness Check is a cloud-based tool used to assess an existing SAP system (e.g., ECC) before transitioning to SAP S/4HANA Cloud Private Edition, identifying key areas of focus. Let's evaluate:

* A. Related simplification items and corresponding compatibility packages: This is correct. SAP Readiness Check analyzes the source system against the S/4HANA simplification database, identifying simplification items (e.g., deprecated features, data model changes) and suggesting compatibility packages or adjustments needed for the conversion to Private Edition.

* B. Recommended SAP Business Accelerator Hub prebuilt integration content: This is incorrect.

The SAP Business Accelerator Hub provides integration content (e.g., APIs, workflows), but Readiness Check does not recommend specific prebuilt content-it focuses on system compatibility, not integration specifics.

* C. Recommended SAP Business Technology Platform services: This is incorrect. While SAP BTP services may be suggested in broader planning (e.g., via Digital Discovery Assessment), Readiness Check does not specifically recommend BTP services-it focuses on system readiness metrics.

* D. Overview of financial data quality: This is correct. Readiness Check includes an analysis of financial data quality (e.g., inconsistencies in FI/CO data), highlighting issues that must be resolved before migrating to SAP S/4HANA Cloud Private Edition to ensure a smooth transition.

In summary, the SAP Readiness Check identifies A(Related simplification items and corresponding compatibility packages) and D(Overview of financial data quality).
