Questions for the Snowflake SOL-C01 Exam - 100% Refund Policy

2026 Latest TestSimulate SOL-C01 PDF Dumps and SOL-C01 Exam Engine Free Share: https://drive.google.com/open?id=1CLWlJwv8ilCU4F10LIzsupfbBaMaXky3

With TestSimulate's help, you do not need to spend a lot of money to participate in related cram or spend a lot of time and effort to review the relevant knowledge, but can easily pass the exam. Simulation test software of Snowflake SOL-C01 Exam is developed by TestSimulate's research of previous real exams. TestSimulate's Snowflake SOL-C01 exam practice questions have a lot of similarities with the real exam practice questions.

Snowflake SOL-C01 Exam Syllabus Topics:

Topic	Details
Topic 1	• Identity and Data Access Management: This domain focuses on Role-Based Access Control (RBAC) including role hierarchies and privileges, along with basic database administration tasks like creating objects, transferring ownership, and executing fundamental SQL commands.
Topic 2	• Interacting with Snowflake and the Architecture: This domain covers Snowflake's elastic architecture, key user interfaces like Snowsight and Notebooks, and the object hierarchy including databases, schemas, tables, and views with practical navigation and code execution skills.

Topic 3	• Data Loading and Virtual Warehouses: This domain covers loading structured, semi-structured, and unstructured data using stages and various methods, virtual warehouse configurations and scaling strategies, and Snowflake Cortex LLM functions for AI-powered operations.
Topic 4	• Data Protection and Data Sharing: This domain addresses continuous data protection through Time Travel and cloning, plus data collaboration capabilities via Snowflake Marketplace and private Data Exchange sharing.

Valid SOL-C01 Test Pass4sure - SOL-C01 Questions Answers

In order to meet the different needs of customers, we have created three versions of our SOL-C01 guide questions. Of course, the content of the three versions is exactly the same, but the displays are the totally different, so you only need to consider which version of our SOL-C01 study braindumps you prefer. Perhaps you can also consult our opinions if you don't know the difference of these three versions. Or you can free download the demos of the SOL-C01 exam braindumps to check it out.

Snowflake Certified SnowPro Associate - Platform Certification Sample Questions (Q148-Q153):

NEW QUESTION # 148
What does the SELECT * statement do in a Snowflake query?

- A. Retrieves only distinct values
- B. Retrieves a limited number of rows
- C. Retrieves all columns from a specified table or view
- D. Retrieves only the primary key column

Answer: C

Explanation:
The SELECT * statement instructs Snowflake to return all columns from the referenced table or view. This is commonly used during data exploration, debugging, initial data profiling, and validation steps. It allows users to quickly view the complete dataset structure without manually specifying each column name.
However, while SELECT * retrieves all columns, it does not limit the number of rows. To restrict rows, developers must include a LIMIT clause (e.g., SELECT * FROM table LIMIT 10;).
The query does not automatically apply DISTINCT or primary key filtering-Snowflake returns all rows exactly as stored unless additional filtering, WHERE conditions, or ordering are provided.
Though SELECT * is convenient, Snowflake best practices recommend explicitly selecting columns in production workloads to optimize performance and avoid unnecessary scanning of unused fields.

NEW QUESTION # 149
You have a custom role named 'TRANSFORM ROLE that needs to load data into a table called
'ORDERS'. You want to ensure that this role can only load data into this specific table and has no other privileges. The table is located in database 'SALES DB' and schema 'PUBLIC'. Which of the following grants provides the LEAST PRIVILEGED access required for 'TRANSFORM ROLE' to perform the data load operation using COPY INTO command?

- A. GRANT INSERT ON TABLE SALES DB.PUBLIC.ORDERS TO ROLE TRANSFORM ROLE; GRANT USAGE ON DATABASE SALES DB TO ROLE TRANSFORM ROLE; GRANT USAGE ON SCHEMA SALES DB.PUBLIC TO ROLE TRANSFORM ROLE;
- B. GRANT ALL PRIVILEGES ON TABLE SALES DB.PUBLIC.ORDERS TO ROLE TRANSFORM ROLE;
- C. GRANT INSERT ON TABLE SALES DB.PUBLIC.ORDERS TO ROLE TRANSFORM ROLE;
- D. GRANT OWNERSHIP ON TABLE SALES DB.PUBLIC.ORDERS TO ROLE TRANSFORM ROLE;
- E. GRANT INSERT, SELECT ON TABLE SALES DB.PUBLIC.ORDERS TO ROLE TRANSFORM ROLE;

Answer: A

Explanation:
The INSERT privilege is required to load data into the table. USAGE privilege on the database and schema is required to access the table. SELECT is not required for COPY INTO operations, only INSERT. OWNERSHIP grants complete control and is overly permissive. ALL PRIVILEGES also grants more privileges than needed.

NEW QUESTION # 150
Which Snowflake component is responsible for data encryption?

- A. Database storage
- B. Virtual warehouse
- C. Cloud services
- D. Data loading utility

Answer: A

Explanation:
Snowflake's database storage layer is responsible for encrypting data at rest. All persisted data-whether structured, semi-structured, or unstructured-is encrypted using strong encryption algorithms such as AES-
256. This process is automatic and transparent to users, ensuring that files and micro-partitions stored in Snowflake-managed cloud storage are encrypted by default. Data in transit is protected separately through TLS.
Virtual warehouses provide compute resources to execute queries and do not perform storage-level encryption. Data loading utilities (such as COPY INTO and client tools) orchestrate data movement but do not handle at-rest encryption. The Cloud Services layer manages metadata, session management, security policies, and query optimization, but the actual encryption of stored data is part of the storage subsystem.

NEW QUESTION # 151
What is the primary benefit of the Snowflake data cloud?

- A. It enables organizations to unite and share their data.
- B. It provides direct access to underlying infrastructure.
- C. It eliminates the need for data governance.
- D. It replaces traditional data warehouses with on-premises solutions.

Answer: A

Explanation:
The Snowflake Data Cloud allows organizations toseamlessly share, access, and collaborate on dataacross departments and external partners, without copying or moving data. Through secure data sharing, listings, and data clean rooms, Snowflake eliminates data silos and dramatically improves data collaboration.
It does not eliminate the need for governance-Snowflake enhances governance via RBAC, masking policies, and centralized controls. It does not provide access to underlying cloud infrastructure; Snowflake abstracts that. It is not an on-premises solution; Snowflake is fully cloud-native.
Thus, the primary benefit is unifying and securely sharing data across the ecosystem.

NEW QUESTION # 152
You have a Snowflake table named 'products' with columns 'product id', 'product_name', and
'price'. You need to create a view called 'expensive_products' that only shows products with a price greater than $100. However, you also want to ensure that only users with the 'PRODUCT VIEWER' role can access this view. What SQL statements are required to achieve this?

- A. Option E
- B. Option C
- C. Option A
- D. Option B
- E. Option D

Answer: C

Explanation:
Option A correctly creates the view with the required filtering and grants 'SELECT privilege to the
'PRODUCT VIEWER role. Option B includes 'WITH GRANT OPTION' which allows the to grant SELECT privileges to other roles, which is not a requirement here. Option C includes granting USAGE on Database, this might be required in your enviroment, so its not wrong, but not directly answering the question, so not ideal. Option D incorrectly uses 'ALTER VIEW expensive_products SET SECURE;' a Secure View, this is used to prevent the view definition from being visible. Option E grants 'ALL' privileges, this is not required, only `SELECT privilege is requested

NEW QUESTION # 153

......

Preparing with outdated SOL-C01 exam questions results in failure and loss of time and money. You can get success in the exam on first attempt and save your resources with the help of updated exam questions. We offer Snowflake SOL-C01 real questions to help pupils in getting ready for the exam in a short time. Students who choose TestSimulate will get the latest and updated exam questions they need to prepare for the SOL-C01 examination in a short time.
