

C_ABAPD_2507 Dump - Training C_ABAPD_2507 Kit

What's more, part of that PracticeDump C_ABAPD_2507 dumps now are free: https://drive.google.com/open?id=1I1ynL_oYpU5lvHCGkDIB-Op1RDlj74Qk

As for the C_ABAPD_2507 study materials themselves, they boost multiple functions to assist the learners to learn the study materials efficiently from different angles. For example, the function to stimulate the C_ABAPD_2507 exam can help the exam candidates be familiar with the atmosphere and the pace of the Real C_ABAPD_2507 Exam and avoid some unexpected problem occur such as the clients answer the questions in a slow speed and with a very anxious mood which is caused by the reason of lacking confidence.

Many people may have different ways and focus of study to pass C_ABAPD_2507 exam in the different time intervals, but we will find that in real life, can take quite a long time to learn C_ABAPD_2507 learning questions to be extremely difficult. You may be taken up with all kind of affairs, and sometimes you have to put down something and deal with the other matters for the latter is more urgent and need to be done immediately. With the help of our C_ABAPD_2507 training guide, your dream won't be delayed anymore.

Training SAP C_ABAPD_2507 Kit | Practice C_ABAPD_2507 Test Online

Our company has been putting emphasis on the development and improvement of C_ABAPD_2507 test prep over ten year without archaic content at all. So we are bravely breaking the stereotype of similar content materials of the exam, but add what the exam truly tests into our C_ABAPD_2507 Exam Guide. So we have adamant attitude to offer help rather than perfunctory attitude. We esteem your variant choices so all these versions of C_ABAPD_2507 study materials are made for your individual preference and inclination.

SAP Certified Associate - Back-End Developer - ABAP Cloud Sample Questions (Q67-Q72):

NEW QUESTION # 67

Which statements apply to the TRY-ENDTRY construct?

Note: There are 3 correct answers to this question.

- A. A CLEANUP clause catches remaining exceptions.
- B. CATCH clauses should be organized ascending from most specific to most general.
- C. A CATCH clause can be used as a handler for several exception classes.
- D. A superclass in a CATCH clause catches exceptions of itself and of its subclasses.
- E. All matching CATCH clauses are always executed.

Answer: B,C,D

NEW QUESTION # 68

Given this code,

```
INTERFACE if1.
```

```
METHODS m1.
```

```
ENDINTERFACE.
```

```
CLASS c11 DEFINITION.
```

```
PUBLIC SECTION.
```

```
INTERFACES if1.
```

```
METHODS m2.
```

```
ENDCLASS.
```

" in a method of another class

```
DATA go_if1 TYPE REF TO if1.
```

```
DATA go_c11 TYPE REF TO c11.
```

```
go_c11 = NEW #( ... ).
```

```
go_if1 = go_c11.
```

What are valid statements? (Select 3 correct answers)

- A. go_if1 may call method m1 with go_if1->m1(...).
- B. go_if1 may call method m2 with go_if1->m2(...).
- C. Instead of go_c11 = NEW #(...) you could use go_if1 = NEW #(...).
- D. go_c11 may call method m1 with go_c11->if1~m1(...).
- E. Instead of go_c11 = NEW #(...) you could use go_if1 = NEW c11(...).

Answer: A,D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

* An interface reference (go_if1) can point to any object of a class that implements that interface.

Therefore, creating an instance with NEW c11(...) and directly assigning it to the interface-typed variable is valid (A).

* Type inference with NEW #(...) cannot infer a class from an interface-typed target (no unique implementing class), so (B) is invalid.

* An interface reference exposes only the interface's methods; it cannot call class-specific methods (so (C) is invalid).

* Calling interface method m1 via the interface reference is valid (D).

* From the class reference, the interface method can be called (implicitly or explicitly qualified) as go_c11->if1~m1(...) (E).

This reflects ABAP OO rules in ABAP Cloud (method visibility via static type, interface implementation, and explicit interface method calls).

Study Guide Reference: ABAP Objects-Interfaces & Class Constructors; ABAP Cloud Back-End Developer-OO fundamentals.

NEW QUESTION # 69

You select a field flight_date with type DATS in the field list of a CDS view.

Which of the following expressions returns the 2-digit month from the field?

(Select 2 correct answers)

- A. left(right(flight_date, 6), 2)
- B. substring(flight_date, 4, 2)
- C. substring(flight_date, 5, 2)
- D. right(left(flight_date, 6), 2)

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation from Exact Extract:

A DATS field is stored as YYYYMMDD.

* Option A: substring(flight_date, 5, 2) # Extracts characters 5-6 # correct month.

* Option B: right(left(flight_date, 6), 2) # Takes first 6 chars YYYYMM, then last 2 # correct month.

* Option C: Wrong, extracts last 2 chars of MMDD, results in day not month.

* Option D: Wrong, starts at 4 # gives YM instead of MM.

Study Guide Reference: ABAP CDS Development Guide - String Functions in CDS.

NEW QUESTION # 70

What RESTful Application Programming feature is used to ensure the uniqueness of a semantic key?

- A. Determination
- B. Action
- C. Validation

Answer: C

NEW QUESTION # 71

The class zcl_demo_class is in a software component with the language version set to "Standard ABAP". The function module "ZF11" is in a software component with the language version set to "ABAP Cloud". Both the class and function module are customer created. Regarding line #6, which of the following is a valid statement?

- A. 'ZF1' can be called whether it has been released or not for cloud development.
- B. 'ZF1' can be called via a wrapper that itself has not been released for cloud development.
- C. 'ZF1' can be called via a wrapper that itself has been released for cloud development.
- D. 'ZF1' must be released for cloud development to be called.

Answer: C

Explanation:

The function module ZF1 is in a software component with the language version set to "ABAP Cloud". This means that it follows the ABAP Cloud Development Model, which requires the usage of public SAP APIs and extension points to access SAP functionality and data. These APIs and extension points are released by SAP and documented in the SAP API Business Hub1. Customer-created function modules are not part of the public SAP APIs and are not released for cloud development. Therefore, calling a function module directly from a class with the language version set to "Standard ABAP" is not allowed and will result in a syntax error. However, there is a possible way to call a function module indirectly from a class with the language version set to "Standard ABAP":

Create a wrapper class or interface for the function module and release it for cloud development. A wrapper is a class or interface that encapsulates the function module and exposes its functionality through public methods or attributes. The wrapper must be created in a software component with the language version set to "ABAP Cloud" and must be marked as released for cloud development using the annotation @EndUserText.label. The wrapper can then be called from a class with the language version set to "Standard ABAP" using the public methods or attributes2.

For example, the following code snippet shows how to create a wrapper class for the function module ZF1 and call it from the class zcl_demo_class:

```
@EndUserText.label: 'Wrapper for ZF1' CLASS zcl_wrapper_zf1 DEFINITION PUBLIC FINAL CREATE PUBLIC. PUBLIC SECTION. CLASS-METHODS: call_zf1 IMPORTING iv_a TYPE i iv_b TYPE i EXPORTING ev_result TYPE i. ENDCLASS.
```

```
CLASS zcl_wrapper_zf1 IMPLEMENTATION. METHOD call_zf1. CALL FUNCTION 'ZF1' EXPORTING a = iv_a b = iv_b IMPORTING result = ev_result. ENDMETHOD. ENDCLASS.
```

```
CLASS zcl_demo_class DEFINITION. METHODS: m1. ENDCLASS.
```

```
CLASS zcl_demo_class IMPLEMENTATION. METHOD m1. DATA(lv_result) = zcl_wrapper_zf1=>call_zf1( iv_a = 2 iv_b = 3
```

). WRITE: / lv_result. ENDMETHOD. ENDCLASS.

The output of this code is:

5

NEW QUESTION # 72

.....

If you choose to use the software version of SAP C_ABAPD_2507 study guide, you will find that you can download our SAP Certified Associate - Back-End Developer - ABAP Cloud C_ABAPD_2507 exam prep on more than one computer and you can practice our C_ABAPD_2507 exam questions offline as well. We strongly believe that the software version of our C_ABAPD_2507 Study Materials will be of great importance for you to prepare for the exam and all of the employees in our company wish you early success!
